La enseñanza de la geografía en México Javier Castañeda Rincón,2006-01-01 La obra presenta un recorrido histórico de la enseñanza de la geografía en México durante casi dos siglos, los temas que aborda tienen que ver con los contenidos geográficos, los métodos de enseñanza, los libros de texto utilizados, los profesores más sobresalientes y partiendo la historia de las dos instituciones pioneras en México en la formación de geógrafos y profesores de geografía. También incluye la participación de los profesores de geografía del exilio español en México, la única experiencia de investigación geográfica de los profesores a través del ANIG y un estudio comparativo de la geografía de México y el Brasil.

Transformando la sociedad desde las aulas Mercedes Blanchard Giménez,2018-06-15 La experiencia nos dice que desarrollar acciones de Innovación Educativa con claustros completos de profesores, y más si están coordinados con otros centros educativos cercanos, hace posible cambios en la acción educativa, que se traducen en cambios significativos en su modo de hacer en el centro y en el aula. En esta ocasión se ha utilizado una metodología con potencial suficiente para ir cambiando la realidad escolar y la realidad contextual: los Proyectos Integrados. Este modo de trabajo favorece que los estudiantes miren a la realidad social cercana y vayan generando conocimiento para responder a las necesidades del contexto, lo que hace que el aprendizaje cobre vida y se traduzca en búsqueda de respuestas para la vida. El Proyecto se ha llevado a cabo durante cuatro años en distintas zonas de El Salvador a través de un proceso de Investigación-Acción, donde los profesores han sido protagonistas de la innovación, integrando de forma activa a alumnos, familias y agentes sociales del entorno. Su importancia se ha reflejado en los planteamientos de innovación educativa del país y permanece en el tiempo extendiéndose a nuevos centros educativos.

Humana mente Juan Ignacio Pozo Municio,Juan Ignacio Pozo,2001 En su libro ?El hombre que confundió a su mujer con un sombrero?, Oliver Sacks cuenta que, cuando presentó a ese paciente agnóstico un guante, lo definió como una ?superficie continua plegada sobre sí misma. Parece que tiene cinco bolsitas que sobresalen?, pero era incapaz de dar sentido a ese objeto, de verlo como un guante. A diferencia de usted, esa persona agnóstica era incapaz de conocer, es decir de relacionar humana/mente el mundo, la conciencia y la carne, y por tanto también de sentir inquietud ante un guante con seis bolsitas.

Una agnosia similar ha padecido el sujeto de la psicología cognitiva, capaz de procesar información abstracta, desencarnada, pero incapaz de generar conocimiento a partir de ella. La llamada revolución cognitiva pretendió reducir la mente humana a un código binario simple, un procesamiento de información que la situó en un universo plano, digital. Frente a ello, este libro nos sugiere volver humana/mente al mundo analógico, tridimensional, habitado por personas, y por guantes, con sus significados y sus deseos, supone no sólo humanizar la psicología cog-nitiva sino repensar su desarrollo reciente. Pero sólo podemos conocer ese mundo analógico que habita nuestra mente a través de las representaciones encarnadas que nos proporciona el cuerpo y cuyo significado debemos redescribir no sólo por procesos de explicitación consciente, que convierten esas representaciones en verdadero conocimiento sino, sobre todo, por la mediación de objetos culturales, de sistemas culturales de representación, que amplían nuestro horizonte cognitivo al tiempo que humana/mente nos reconstruyen. Es en esa difusa frontera entre el mundo, la conciencia y la carne, donde debemos hacer una psicología del conocimiento, que, más allá de la psicología cognitiva clásica, se ocupe de la construcción mutua entre la

21 segundos contemplando el Universo Mikel Rivero Marcos,2016 Si comprimíramos la edad de nuestro universo en un año, ese sería el tiempo que llevaría la humanidad mirando al cielo. Y en ese tiempo hemos observado el Cosmos y nos hemos preguntado quiénes somos y de dónde venimos. Así, desde un punto de vista objetivo y puramente científico, el lector

verá respondida muchas de esas preguntas aprendiendo el saber humano desde el mismísimo origen del universo al de muchas de las enfermedades de la civilización actual. Cada vez se es más consciente en la comunidad científica de que el universo pudo no necesitar de un creador para existir, ya que las leyes de la física habrían surgido de la nada en un multiverso inflacionario y, por pura probabilidad nos tocó que en el nuestro - uno entre infinitos - se establecieran de esta manera, hace más de 13.000 millones de años. Más tarde, hace 4.600 millones de años nacería nuestro planeta y, con él, surgiría la vida. Una vida únicamente microbiana al principio, sola en la Tierra durante más de 3.000 millones de años antes de que se desarrollara el primer ser vivo multicelular. Entonces explotó la vida y se diversificó, evolucionaron las especies bajo el motor de la selección natural y, hace 21 segundos tan solo, apareció un primate muy peculiar, el ser humano.

Atrapado desde que se hizo sedentario en una sociedad cada vez más compleja, la naturaleza yace ya apartada de nosotros y es el mundo artificial - en el que no evolucionamos -, donde estamos atrapados por el consumismo y un sistema socioeconómico desigualitario y enloquecedor. Universo, Tierra, Vida y Humanos son las cuatro partes de las que se compone este libro y realmente nuestra propia biografía. Espero que lo disfruten.

Adquisición de conocimiento Juan Ignacio Pozo Municio, 2009-11-15 Introducción ? Aprender en la sociedad del conocimiento: De la biología a la cultura ? Cuando nada de lo animal nos es ajeno: Del aprendizaje animal al aprendizaje humano ? Niveles de análisis en la adquisición de conocimiento ? Las monedas del intercambio cognitivo ? El aprendizaje como adquisición de conductas ? El aprendizaje como adquisición de información ? El aprendizaje como adquisición de representaciones ? El aprendizaje como adquisición de conocimiento ? La adquisición de conocimiento en dominios específicos ? La hélice del conocimiento ? Adquisición de conocimiento y cambio conceptual en dominios específicos ? Bibliografía Se dice que vivimos en la sociedad del conocimiento, pero para muchas personas es más bien la sociedad de la información. Convertir la información en auténtico conocimiento requiere dominar nuevos sistemas de representación simbólica (numéricos, artísticos, científicos, gráficos, etc) que no forman parte de nuestro 'equipo cognitivo de serie', y que por tanto no están al alcance de todos, sino que deben adquirirse a través de la cultura y, en último extremo, de la educación. Pero esa adquisición plantea a su vez nuevos retos educativos, culturales y también psicológicos. Este libro se ocupa de uno de esos retos: estudiar los procesos mediante los que construimos y adquirimos el conocimiento. ¿Cuál es su naturaleza psicológica y cómo se diferencia de la simple información? ¿Tienen otros animales esa capacidad de conocer o se trata de una conquista exclusiva/mente humana? ¿Cómo influyen las restricciones biológicas y la cultura en los procesos de adquisición de conocimiento? ¿Son las formas de conocer universales o dependen de la cultura? Recurriendo a investigaciones recientes en diversas áreas como psicología cognitiva, antropología, biología, paleontología, neurociencias, psicología animal o diseño instruccional, J. I.

Geodynamic Evolution of the Southernmost Andes Matías C. Ghiglione,2016-07-07 This book focuses on the strong relation between the tectonic evolution of the Southernmost Andes and their closest southern neighbors, the Scotia Sea and Antarctica. Some episodes are related to processes of global significance such as the opening of the Drake Passage, which is somehow linked to Late Cenozoic cooling. Many of the topics covered in the book are subjects of heated debates; as such, not only the latest data and approaches are presented, but different points of view as well. The chapters examine the interrelation between main geodynamic processes and plate tectonics from a multidisciplinary perspective. This Paleozoic-Cenozoic geodynamic evolution of the Southernmost Andes involved interrelated metamorphic, magmatic, sedimentary, and deformational processes directed by plate tectonics. The main topics cover the evolution of the Rocas Verdes basin and the Cordillera Darwin high-grade metamorphic complex, growth of the Patagonian Batholith, development of the Patagonian Orocline, the opening of the Drake Passage during growth of the Scotia Sea, evolution of the Austral-Magallanes foreland basin and its related fold and thrust belt.

Conflicto y convivencia en el discurso pedagógico oficial durante el tardofranquismo y la transición democrática española (1965-1982) MILITO BARONE Cecilia Cristina ,2021-05-17 En el seno del Departamento de Historia de la Educación y Educación Comparada de la UNED se lleva a cabo desde 1992 una amplia investigación sobre los manuales escolares de los siglos XIX y XX —Proyecto MANES—, proyecto de carácter interdisciplinar e interuniversitario en el que colaboran diversas universidades e instituciones españolas, europeas y latinoamericanas. En la actualidad este grupo de investigación está integrado en el Centro de Investigación MANES. Fruto del trabajo de todos estos años son los diversos títulos que han visto la luz en esta colección. La obra Conflicto y convivencia en el discurso pedagógico oficial durante el tardofranquismo y la transición democrática española (1965-1982) intenta dilucidar bajo qué parámetros se trataron las problemáticas de conflicto y convivencia —tanto a nivel escolar como social— en el discurso pedagógico oficial del tardofranquismo y la transición a la democracia en España. La investigación utiliza como fuentes primarias los enunciados

curriculares (el currículum prescrito), los manuales escolares y las revistas pedagógicas de la época, debiendo destacarse de manera muy especial la aportación metodológica que supone la aplicación del Análisis Crítico del Discurso (ACD) al estudio de los manuales escolares. La autora pone en evidencia que en toda época de cambio hay continuidades y discontinuidades, de manera que, a pesar de los cambios operados en el discurso pedagógico oficial de la Transición, persisten en este periodo importantes aspectos de una visión armónico-funcionalista propia de los años del franquismo.
