Michael Staack

The Philosophy of Mixed Martial Arts Jason Holt, Marc Ramsay, 2021-09-09 Mixed martial arts (MMA)—unarmed fighting games permitting techniques derived from a variety of martial arts and combat sports— has exploded from the fringes of sport into a worldwide phenomenon, a sport as controversial as it is compelling. This is the first book to pay MMA the serious philosophical attention it deserves. With contributions from leading international scholars of the philosophy of sport and martial arts, the book explores topics such as whether MMA qualifies as a martial art, the differences between MMA and the traditional martial arts, the aesthetic dimensions of MMA, the limits of consent and choice in MMA and whether MMA can promote moral virtues. It also explores cutting-edge practical and ethical topics, including the role of gender in MMA, and the question of whether trans athletes should be allowed to compete in the women's divisions. The contributors to this anthology take down, ground and pound, and submit many essential questions about this fascinating recent development in the culture of sport and spectacle. This is important reading for anybody with an interest in combat sports, martial arts, or the philosophy, sociology, culture or history of sport.

MMA Vs Boxing Noah Shaw, 2025-05-23 Step into the electrifying world of combat sports with this definitive guide comparing two of the greatest disciplines: Boxing and Mixed Martial Arts (MMA). Innovation in Developmental Psychology, Education, Sports, and Arts: Advances in Research on Individuals and Groups, volume II Radu Predoiu,Alexandra Predoiu,Andrzej Piotrowski,Georgeta Panisoara,2025-03-28 This Research Topic is the second volume of the Research Topic Innovation in Developmental Psychology, Education, Sports, and Arts: Advances in Research on Individuals and Groups Please see the first volume here. Due to the expansion of knowledge around us, we are “besieged” by a multitude of data that attracts our attention and pressures us to interact with it, motivating us to receive information, memorize, and form new skills. The social, emotional, intellectual, and psychomotor development of children, adolescents, and adults needs to be taken into account when determining their ability to meet the demands of education or a specific sport or art. Growth and technological advances in the areas of educational psychology, sport, and art have considerably changed over time, particularly in relation to students’ and athletes’ preparation and performance. In this context, psychology often makes the difference between good and great students (or athletes), between first and last place.

Fighting for Honor T. J. Desch-Obi,2021-04-12 A groundbreaking investigation into the migration of martial arts techniques across continents and centuries The presence of African influence and tradition in the Americas has long been recognized in art, music, language, agriculture, and religion. T. J. Desch-Obi explores another cultural continuity that is as old as eighteenth-century slave settlements in South America and as contemporary as hip-hop culture. In this thorough survey of the history of African martial arts techniques, Desch-Obi maps the translation of numerous physical combat techniques across three continents and several centuries to illustrate how these practices evolved over time and are still recognizable in American culture today. Some of these art traditions were part of African military training while others were for self-defense and spiritual discipline. Grounded in historical and cultural anthropological methodologies, Desch-Obi's investigation traces the influence of well-delineated African traditions on long-observed but misunderstood African and African American cultural activities in North America, Brazil, and the Caribbean. He links the Brazilian martial art capoeira to reports of slave activities recorded in colonial and antebellum North America. Likewise Desch-Obi connects images of the kalenda African stick-fighting techniques to the Haitian Revolution. Throughout the study Desch-Obi examines the ties between physical mastery of these arts and changing perceptions of honor. Including forty-five illustrations, this rich history of the arrival and dissemination of African martial arts in the Atlantic world offers a new vantage for furthering our understanding of the powerful influence of enslaved populations on our collective social history.

Combat Sports Medicine Ramin Kordi,Nicola Maffulli,Randall R. Wroble,W. Angus Wallace,2009-03-01 Sports medicine and sports science are relatively new and rapidly developing fields of knowledge. During the past 2 decades, a significant body of scientific knowledge has been published in these areas. However, there is a demand for practical references which address sports medicine and science in the context of different sports. This demand is higher in some sports including combat sports, which are highly physically and mentally demanding, and cause challenging issues such as risk of blood-borne

infections, weight reduction, head injuries, stress management, and safety for women and children. This book has been developed to meet the needs of the practitioners who work with combat sports athletes in order to improve their health and performance. Combat sports include four Olympic sports (boxing, wrestling, judo, and t- kwondo) and other popular sports such as karate, kick boxing, and Wushu. These sports are popular in most countries of the world, both at competitive and recreational levels. Combat sports are practiced by people of different ages for a variety of reasons such as to gain fitness and health benefits and to learn self-defense.

Global Perspectives on Women in Combat Sports Christopher R. Matthews,Alex Channon,2016-04-29 This volume offers a wide-reaching overview of current academic research on women's participation in combat sports within a range of different national and trans-national contexts, detailing many of the struggles and opportunities experienced by women at various levels of engagement within sports such as boxing, wrestling, and mixed martial arts.

The Martial Arts Studies Reader Paul Bowman,2018-09-20 A decade ago, the question was 'could martial arts ever be studied academically?' Today we are witnessing the global emergence and rapid proliferation of Martial Arts Studies – an exciting and dynamic new field that studies all aspects of martial arts in culture, history, and society. In recent years there have been a proliferation of studies of martial arts and race, gender, class, nation, ethnicity, identity, culture, politics, history, economics, film, media, art, philosophy, gaming, education, embodiment, performance, technology and many other matters. Given the diversity of topics and approaches, the question for new students and researchers is one of how to orientate oneself and gain awareness of the richness and diversity of the field, make sense of different styles of academic approach, and organise one's own study, research and writing. The Martial Arts Studies Reader answers this need, by bringing together pioneers of the field and scholars at its cutting edges to offer authoritative and accessible insights into its key concerns and areas. Each chapter introduces and sets out an approach to and a route through a key issue in a specific area of martial arts studies. Taken together or in isolation, the chapters offer stimulating and exciting insights into this fascinating research area. In this way, The Martial Arts Studies Reader offers the first authoritative field-defining overview of the global and multidisciplinary phenomena of martial arts and martial arts studies.

Myth and Identity in the Martial Arts Alexis McLeod,2024-12-24 *Myth and Identity in the Martial Arts: Creating the Dragon* is a study of the role of myth and ideology in the formation of social identity, focusing on a variety of communities of practice involving the martial arts in East Asian and Western history. Alexis McLeod argues that myths of the martial arts should not be understood as “falsehoods” created as means of legitimizing modern practices, but should instead be understood as narratives that enable individuals and communities to formulate social identities and to accord meaning to

their practices. This book covers six influential sources of myth and identity formation in the history of martial arts: early Chinese and Indian philosophy, the formation bushido thought in the Edo period of Japan, Republican-era Chinese conceptions of nationhood and physical culture, Western contributions and the innovations of Bruce Lee, African American conceptions of martial arts as a response to oppression in the twentieth century, and the contemporary ideologies of mixed martial arts.

Science and Application of High-Intensity Interval Training Laursen, Paul, Buchheit, Martin, 2019 The popularity of high-intensity interval training (HIIT), which consists primarily of repeated bursts of high-intensity exercise, continues to soar because its effectiveness and efficiency have been proven in use by both elite athletes and general fitness enthusiasts. Surprisingly, few resources have attempted to explain both the science behind the HIIT movement and its sport-specific application to athlete training. That's why *Science and Application of High-Intensity Interval Training* is a must-have resource for sport coaches, strength and conditioning professionals, personal trainers, and exercise physiologists, as well as for researchers and sport scientists who study high-intensity interval training.

Armed Martial Arts of Japan G Hurst I, G. Hurst I, II, 1998-07-11 This unique history of Japanese armed martial arts--the only comprehensive treatment of the subject in English--focuses on traditions of swordsmanship and archery from ancient times to the present. G. Cameron Hurst III provides an overview of martial arts in Japanese history and culture, then closely examines the transformation of these fighting skills into sports. He discusses the influence of the Western athletic tradition on the armed martial arts as well as the ways the martial arts have remained distinctly Japanese. During the Tokugawa era (1600-1867), swordsmanship and archery developed from fighting systems into martial arts, transformed by the powerful social forces of peace, urbanization, literacy, and professionalized instruction in art forms. Hurst investigates the changes that occurred as military skills that were no longer necessary took on new purposes: physical fitness, spiritual composure,

character development, and sport. He also considers Western misperceptions of Japanese traditional martial arts and argues that, contrary to common views in the West, Zen Buddhism is associated with the martial arts in only a limited way. The author concludes by exploring the modern organization, teaching, ritual, and philosophy of archery and swordsmanship; relating these martial arts to other art forms and placing them in the broader context of Japanese culture.

Hand and Wrist Injuries In Combat Sports Riccardo Luchetti, Loris Pegoli, Gregory I. Bain, 2018-10-17 This well-illustrated book describes the injuries to the hand and wrist that are commonly encountered among participants in combat sports, explaining the mechanisms of injury and offering state of the art guidance on diagnosis and treatment. It covers both injuries characteristic of individual sports, such as kendo, karate, judo, jiu-jitsu, aikido, and mixed martial arts, and pathologies encountered across the full range of combat sports, including boxing, wrestling, and taekwondo. In addition to management, careful attention is paid to rehabilitation following injury and to psychological aspects of recovery from injury. The book is the result of a collaboration with the International Society for Sport Traumatology of the Hand (ISSPORTH) and has been designed to meet the needs of all practitioners who work with combat sports athletes. While especially helpful for surgeons, physicians, therapists, and rehabilitators, it will also be of value to coaches, trainers, and players. The authors are leading international experts in the field who have been involved with international societies and in some cases have personal experience of combat sports at a high level.

Fighting As Real As It Gets Michael Staack, 2019-07-25 Michael Staack's multi-year ethnography is the first and only comprehensive social-scientific analysis of the combat sport 'Mixed Martial Arts'. Based on systematic training observations, the author meticulously analyses how Mixed Martial Arts practitioners conjointly create and immerse themselves into their own world of ultimate bodily combat. With his examination of concentrative technique demonstrations, cooperative technique train-ings, and chaotic sparring practices, Staack not only provides a sociological illumination of Mixed Martial Arts culture's defining theme - the quest of 'Fighting As Real As It Gets'. Rather further-more, he provides a compelling cultural-sociological case study on practical social constructions of 'authenticity'.

Psychological Factors in Physical Education and Sport Manuel Gómez-López, Marianna Alesi, Carla Maria Chicau Costa Borrego, 2022-02-21

The Invention of Martial Arts Paul Bowman, 2020-12-17 Through popular movies starring Bruce Lee and songs like the disco hit Kung Fu Fighting, martial arts have found a central place in the Western cultural imagination. But what would 'martial arts' be without the explosion of media texts and images that brought it to a wide audience in the late 1960s and early 1970s? In this examination of the media history of what we now call martial arts, author Paul Bowman makes the bold case that the phenomenon of martial arts is chiefly an invention of media representations. Rather than passively taking up a preexisting history of martial arts practices--some of which, of course, predated the martial arts boom in popular culture--

media images and narratives actively constructed martial arts. Grounded in a historical survey of the British media history of martial arts such as Bartitsu, jujutsu, judo, karate, tai chi, and MMA across a range of media, this book thoroughly recasts our understanding of the history of martial arts. By interweaving theories of key thinkers on historiography, such as Foucault and Hobsbawm, and Said's ideas on Orientalism with analyses of both mainstream and marginal media texts, Bowman arrives at the surprising insight that media representations created martial arts rather than the other way around. In this way, he not only deepens our understanding of martial arts but also demonstrates the productive power of media discourses.

Combat Sports in Contemporary Society: An Interdisciplinary Exploration Lazar Toskić, Leonardo Jose Mataruna-Dos-Santos, Alex Ojeda-Aravena, Leonardo Vidal Andreato, Jimmy Youn, 2025-02-24 Combat sports, spanning a diverse array of disciplines from boxing to mixed martial arts, have deep historical roots, tracing back to ancient civilizations. Beyond the physical confrontations emblematic of these sports, they are intricately woven into the socio-cultural, psychological, and technological tapestry of our times. With the burgeoning advancements in sports science and technology, coupled with a heightened focus on mental well-being and societal implications, there emerges a compelling need to delve into combat sports from an interdisciplinary lens. *Frontiers in Sports and Active Living* presents a special issue dedicated to combat sports, aiming to bridge the realms of physiological, psychological, sociological, and technological studies.

Deconstructing Martial Arts Paul Bowman, 2019-06-24 What is the essence of martial arts? What is their place in or relationship with culture and society? *Deconstructing Martial Arts* analyses familiar issues and debates that arise in scholarly, practitioner and popular cultural discussions and treatments of martial arts and argues that martial arts are dynamic and variable constructs whose meanings and values regularly shift, mutate and transform, depending on the context. It argues that deconstructing martial arts is an invaluable approach to both the scholarly study of martial arts in culture and society and also to wider understandings of what and why martial arts are. Placing martial arts in relation to core questions and concerns of media and cultural studies around identity, value, orientalism, and embodiment, *Deconstructing Martial Arts* introduces and elaborates deconstruction as a rewarding method of cultural studies.
