Desigualdad, poder y cambio social en Monterrey Menno Vellinga, 1988-01-01 El auge en la tasa de crecimiento de México desde la década de los sesenta hasta las de los ochenta tuvo en Monterrey una significación especial que lo convirtió en un verdadero polo de desarrollo excepcional en América Latina. Pero la crisis económica subsiguiente lo golpeó también de manera igualmente excepcional, y hasta la Fundidora de Monterrey se vino abajo. A pesar de los relativamente altos niveles de acumulación de capital y de los considerables movimientos en la estratificación social logrados hasta entonces, la crisis ha golpeado predominantemente a los estratos sociales más modestos y también a las capas medias.

Inequidad y movilidad social en Monterrey Patricio Solís,2007 En este libro se realiza un recorrido detallado por los cambios en la movilidad y la desigualdad social en Monterrey y a lo largo de la segunda mitad del siglo pasado, sobre la base del estudio clásico realizado por Balán, Browning y Jelin en 1965 (El hombre en una sociedad en desarrollo, Fondo de Cultura Económica, 1977), y un segundo estudio que replica al anterior y se apoya en una encuesta aplicada en el año 2000. En esta obra se sugiere que los cambios estructurales del último cuarto de siglo alteraron significativamente los patrones de movilidad y desigualdad social, aunque con matices que desafian cualquier interpretación simplista de las transformaciones en la estratificación social.

En el cardenismo (1934-1940) Samuel León, Ignacio Marván, 1985 Los cambios políticos que se dieron durante el gobierno cardenista marcaron un cierre en la movilización y reorganización de la clase obrera iniciada desde finales de 1932: así comenzó una nueva época en la historia política de la sociedad mexicana. El curso de las reformas que se analizan en este libro se explicaron, sobre todo, por la compleja evolución de las alianzas políticas de la clase obrera en el cardenismo. Narrar y analizar estos hechos es el objeto central de este libro.
