A Linguistic Survey of the Malayalam Language in Its Own Terms Ophira Gamliel, 2020-02-26 The book is written for researchers interested in the study of Kerala's language, literature, history, and culture. It outlines the grammar of Malayalam in consideration of up-to-date theoretical linguistics alongside grammatical categories developed by Malayalam grammarians in the 19th century and based on Old Tamil and Sanskrit grammars. The book approaches Malayalam from a holistic perspective in referring to regional language variations, while describing the standardized linguistic register. The sample sentences demonstrating grammatical categories and rules are mostly drawn from actual speech samples. Reading practices draw upon Vaikom Muhammad Basheer's Pattuma's Goat and Sooranad Ravi's prose adaptation of The Story of Niliyamma's Apotheosis, aiming to expose the learners to various aspects of Kerala culture. Additionally, the book includes three chapters on Old Malayalam morphology, demonstrated by verses from classical compositions such as the Unṇunīlsandeśam and the Kṛṣṇagātha, as well as regional literary traditions-a Teyyam song, Arabic- and Jewish-Malayalam verses, and Syriac Malayalam prose-for exposing the learners to the literary traditions in Malayalam dialects and religiolects. Ten indices follow with charts of kinship terms, verbal and nominal forms, a glossary, and bibliographical references. The book is thus an invitation for an in-depth engagement with the study of Kerala's lush linguistic landscape and diverse literary culture past and present

Conversations on the Beach Gotz Hoeppe, 2007-01-01 Already on the margins of an agrarian society, the marine fisherfolk of the South Indian state of Kerala are faced with a severe environmental problem: overfishing. The actions of trawlers and

industrial fishing ships, it seems, have caused the resources on which they depend to dwindle rapidly. Yet what may appear to be a clear-cut case of cause, effect and responsibility turns out to be a complex issue. Local perceptions of the environment are deeply enmeshed with notions of morality, the self and people's understanding of their place in society. Overfishing is one of several environmental issues that bring into focus parallel knowledges, giving rise to contradictory views on what the problems are, whether changes are good or bad, and how they are to be remedied. As the fisherfolk confront the state, a discourse develops on what is innate to the environment, or natural, and on what its malleability entails. Based on ethnographic fieldwork among Hindus and Muslims in a coastal village, this book explores the fisherfolk's environmental knowledge, its transformation in a period of rapid socio-economic and political change as well as its role in dealing with the state and the science - putatively universal and objective - upon which the state's policies are claimed to be based. The book emphasises conversation as a cultural process, metaphors and figurative speech in the investigation of knowledge, as well as the use and limits of memory in conceptualising environmental change.

The Political Lives of Information Janaki Srinivasan,2022-10-04 How the definition, production, and leveraging of information are shaped by caste, class, and gender, and the implications for development. Information, says Janaki Srinivasan, has fundamentally reshaped development discourse and practice. In this study, she examines the history of the idea of "information" and its political implications for poverty alleviation. She presents three cases in India—the circulation of price information in a fish market in Kerala, government information in information kiosks operated by a nonprofit in Puducherry, and a political campaign demanding a right to information in Rajasthan—to explore three uses of information to support goals of social change. Countering claims that information is naturally and universally empowering, Srinivasan shows how the definition, production, and leveraging of information are shaped by caste, class, and gender. Srinivasan draws on archival and ethnographic research to challenge the idea of information as objective and factual. Using the concept of an "information order," she examines how the meaning and value of information reflect the social relations in which it is embedded. She asks why casting information as a tool of development and solution to poverty appeals to actors across the political spectrum. She also shows how the power to label some things information and others not is at least as significant as the capacity to subsequently produce, access, and leverage information. The more faith we place in what information can do, she cautions, the less attention we pay to its political lives and to the role of specific social structures, individual agency, and material form in the defining, production, and use of that information.

Scombrids of the World Bruce B. Collette,Cornelia E. Nauen,1983 This is the second in a series of species catalogues

produced in the framework of a worldwide annotated and illustrated inventory of aquatic food species FAO intends to build up. The present volume covers all 49 species of scombrids known so far. It provides a comprehensive key to genera and species, preceded by an illustrated glossary of technical terms and measurements. The systematic part of the catalogue includes a drawing and a distribution map for each species, a list of scientific and vernacular species names and wide-ranging information on habitat, biology, and fisheries. Ample reference is made to pertinent literature--Publisher's description.
