Making the Urban Health Mission Work for the Urban Poor ,2014

A study of National Health Mission scheme Dr. Ashad ullah Qureshi,2022-06-01 The National Health Mission (NHM) encompasses its two Sub-Missions, the National Rural Health Mission (NRHM) and the National Urban Health Mission (NUHM). The main programmatic components include Health system strengthening in rural and urban areas, Reproductive-Maternal-Neonatal-Child and Adolescent Health (RMNCH+A) and Communicable and Non- Communicable Diseases. The NHM envisages achievement of universal access to equitable, affordable & quality healthcare services that are accountable and responsive to people's needs.

Urban Health and Wellbeing Aakriti Grover,R.B. Singh,2019-10-25 This book focuses on interdisciplinary issues of human health in the changing urban environments of India's largest megacities—Delhi and Mumbai. The authors explore human health concerns related to increased temperatures and air pollution in these cities in a study based on primary data collected through interviews, as well as secondary data on causes of mortality from 2001 to 2012. During this period, the surface temperatures for both megacities were mapped using Landsat Images. The rapidly increasing populations of cities and urban centers alter ecosystem services such as water, air and land cover, with disastrous impacts on health and wellbeing, particularly in megacities. In 2015, polluted air was estimated to have been responsible for 6.4 million deaths worldwide, and it is projected that it will cause between 6 and 9 million deaths per year by 2060. In 2017, outdoor air pollution resulted in 1.2 million deaths in India and brought about a 3% loss in GDP. The increase in population, vehicles, and industries has led to changes in land use and land cover and a rise in city temperatures and air pollution, creating urban heat islands (UHIs). Together, UHIs and air pollution have damaging impacts on human health that range from stress and headache to asthma, bronchitis, and chronic diseases, and even to death. Delhi has been experiencing emergency conditions in terms of environmental health over the past two years. At the same time, both the Delhi and Mumbai urban agglomerations are growing at a rapid pace, and the United Nations has projected that they will be the second and third most populous cities in the world by 2025. In this context, the book offers significant insights into the past patterns and responses to the present global urban health emergencies, and explores sustainable means of combating the problem to enable college and university researchers to develop innovative solutions. Further. It presents trans-disciplinary research

that cuts across the WHO Action Plan, the Sustainable Development Goals, the Sendai Framework for Disaster Risk Reduction, and Habitat III to help policymakers gain a better understanding of the global challenges of urban health and wellbeing. The book is especially useful for students and researchers in geography, urban demography, urban studies, environmental studies, health sciences, and policy studies.

SLUMS OF INDIA NEELA GANGULY, 2019-06-10 Contents: 1. Introduction, 2. Slums of the World and in India, 3. Health Care Delivery In India, 4. Slums in Chennai, 5. Health Care Programmes for the Slum Population of Chennai City 6. Children, Women and Geriatric Care for the Slum Population of Chennai City 7. Conclusion and Suggestions. The inspiration to write this book came from the collection of data for a Need Assessment Study of a local slum near my residence. The buildings in the slum locality, the inhabitants and their livelihood, the availability of infrastructure, both governmental and private, in their vicinity and above all, the requirements and expectations of the population, all helped me undertake this study and thus the outcome of the thesis and this book. Specific reference is made to only 4 divisions from 4 zones from the erstwhile Chennai city before the expansion of 2012. Though expansion would have dispersed the ward and division numbers, the name of the location, its locality and the population remain the same. Therefore, I have simply changed the zone numbers to West, North, South-west and South. All the data pertaining to this study limits to the year 2009. Though this parameter is in fact a shortcoming to the study, the hypotheses and its outcome remain significant to this day. Also the representing sample of 300 compared to the total population of 6,26,271 of the 4 zones put together is sufficient since the sample population and the total population are not spread away from each other.

Anthropology in Public Health Mithun Das,Subir Biswas,2019-01-01 Looking backward over the last few decades, it is impressive to see how far anthropological approaches to public health have come up, not just on communicable disease research and prevention, but also for non-communicable diseases like cardiovascular diseases, diabetes, cancer, female reproductive health, mental illness, substance consumption and abuse, and health practices. Yet, when countries with established economy are compared with low economy countries, there seem to be a radical difference. Anthropologists with their extensive field work and vast well grounded theoretical knowledge plays a significant role in public health arena. One of the most attractive features of this book is that the editors have asked the authors to layout the specific methods of their research projects and programmes, so that the reader can come to a sense of where this field is going. We envision the audience of this book to comprise a broad spectrum of those involved in anthropology, public health and epidemiology. The readers will find this book presenting a familiar public health milieu in a different and fascinating context. Individuals who are just beginners in these fields will find these chapters foundational in careers.

Essential Of Hospital services (EHS) Dr. Anjalatchi Muthukumaran,2023-05-25 Health promotion is a guiding concept involving activities intended to enhance individual and community health well-being. It seeks to increase involvement and control of the individual and the community in their own health. It acts to improve health and social welfare, and to reduce specific determinants of diseases and risk factors that adversely affect the health, well-being, and productive capacities of an individual or society, setting targets based on the size of the problem but also the feasibility of successful interventions, in a cost-effective way. Health promotion is a key element in public health and is applicable in the community, clinics or hospitals, and in all other service settings. Raising awareness and informing people about health and lifestyle factors that might put them at risk requires teaching.

Datt & Sundharam's Indian Economy 73rd Edition Gaurav Datt & Biswajit Nag, This revised edition of Datt and Sundharam's Indian Economy presents an up-to-date review of trends and issues framing the development of the modern Indian economy. This comprehensive update involved a complete rewrite of the original book as part of the endeavour to promote a critical understanding of the ever-changing canvass of opportunities and challenges facing the Indian economy. This edition represents a fresh attempt to study the evolving journey of the increasingly complex Indian economy from a

contemporary vantage point while retaining a longer-term historical perspective. Divided into five parts, the book begins with an overview of the Evolving Structure of the Indian Economy, which introduces India as a developing economy, and discusses its economic growth, demographic trends, human development, infrastructure and the environment. The second part delves into India's Planning System and Evolution of Economics Sectors. As areas of national concern, the topics of Poverty, Inequality, Employment and Social Security are taken up in the third part. The fourth part on the Fiscal-monetary system and India's Financial Sector discusses key aspects of India's fiscal, monetary and financial sector policy, including a detailed review of the Union Budget 2023-24. The final part focuses on Trade, Technology and Globalisation discussing issues related to trade policy, foreign direct investment, India's interface with the World Trade Organisation, participation in global value chains, and the state of technology in the context of India's emergence on the global economic stage. With the marshalling of large amounts of data in an array of tables, graphs, charts, and boxes explaining key concepts and special topics, the book is informative, engaging, visually appealing and facilitates better understanding of the evolving complexities of the Indian economy along with the potential and limits of economic policy in the country. The revision has been developed according to the curriculum of the National Education Policy 2020 and caters to the academic requirements of undergraduate Economics students. The findings from contemporary literature/research covered in the book will help the Post graduate students and researchers from economics, commerce and finance streams. It will also be a useful resource for the aspirants appearing for various competitive examinations.

Child, Adolescent and Woman Nutrition in India Sheila C. Vir, 2023-10-13 In the last decade, addressing the persistent problem of maternal, infant, young child and adolescent malnutrition in India has gained significant attention. With the well-established serious implications of malnutrition on mortality and morbidity; mental health and cognitive development; activity and productivity and overall economic development, today there is an unprecedented political commitment to improving the grave woman and child nutrition scenario in the country. POSHAN ABHIYAAN (Nutrition Mission) was launched in a Mission mode by the Honourable Prime Minister of India on March 8, 2018, followed by measures for an effective implementation of an integrated nutrition strategy through POSHAN 2.0 in 2022. The book with 15 chapters tracks the history of evolution of public nutrition policies and strategies, presents an update on the nutrition scenario, analyses the experiences and synthesises emerging lessons in the prevention and control of malnutrition. Additionally, the book includes chapters with details of each of the various government systems such as Health, ICDS, NRLM, PDS, Education/MDM, Water-Sanitation that provide lead in mainstreaming nutrition actions that directly or indirectly impact on accelerating the improvement of the nutrition situation of women, adolescents and children. The book is intended to be an indispensable reference for teachers and students of nutrition, community medicine, public health and development as well as professionals involved in the formulation and implementation of the nutrition policies and programmes.
