Poor Man's Fortune Jarod Roll, 2020-04-08 White working-class conservatives have played a decisive role in American history, particularly in their opposition to social justice movements, radical critiques of capitalism, and government help for the poor and sick. While this pattern is largely seen as a post-1960s development, *Poor Man's Fortune* tells a different story, excavating the long history of white working-class conservatism in the century from the Civil War to World War II. With a close study of metal miners in the Tri-State district of Kansas, Missouri, and Oklahoma, Jarod Roll reveals why successive generations of white, native-born men willingly and repeatedly opposed labor unions and government-led health and safety reforms, even during the New Deal. With painstaking research, Roll shows how the miners' choices reflected a deep-seated, durable belief that hard-working American white men could prosper under capitalism, and exposes the grim costs of this view for these men and their communities, for organized labor, and for political movements seeking a more just and secure society. Roll's story shows how American inequalities are in part the result of a white working-class conservative tradition driven by grassroots assertions of racial, gendered, and national privilege.

Uncommonly Good Ideas Sandra Murphy, Mary Ann Smith, 2015-04-03 This innovative resource provides teachers with a road map for designing a comprehensive writing curriculum that meets Common Core State Standards. The authors zero in on several big ideas that lead to and support effective practices in writing instruction, such as integrating reading, writing, speaking, and listening; teaching writing as a process; extending the range of the students' writing; spiraling and scaffolding a writing curriculum; and collaborating. These ideas are the cornerstone of best research-based practices as well as the CCSS for writing. The first chapter offers a complete lesson designed around teaching narrative writing and illustrates tried-and-true practices for teaching writing as a process. The remaining chapters explore a broad range of teaching approaches that help students tackle different kinds of narrative, informational, and argumentative writing as well as complexities like audience and purpose. Each chapter focuses on at least one of the uncommonly good ideas and illustrates how to create curricula around it. *Uncommonly Good Ideas* includes model lessons and assignments, mentor texts, teaching strategies, student writing, and practical guidance for moving the ideas from the page into the classroom.

Film Quotations Robert A. Nowlan, Gwendolyn W. Nowlan, 2016-04-30 Certain lines define a movie. Marlene Dietrich in *Morocco*: "Anyone who has faith in me is a sucker." Too, there are lines that fit actor and character. Mae West in *I'm No*

Angel: "I'm very quick in a slow way." Jane Fonda in California Suite: "Fit? You think I look fit? What an awful shit you are. I look gorgeous." From the classics to the grade-B slasher movies, over 11,000 quotes are arranged by over 900 subjects, like accidents, double entendres, eyes (and other body parts!), ice cream, luggage, parasites, and ugliness. Each quote gives the movie title, production company, year of release, speaker of the line, and, when appropriate, a comment putting the quote in context.

Feminist Reflections on the History of Philosophy Lilli Alanen,Charlotte Witt,2006-01-17 Feminist work in the history of philosophy has come of age as an innovative field in the history of philosophy. This volume marks that accomplishment with original essays by leading feminist scholars who ask basic questions: What is distinctive of feminist work in the history of philosophy? Is there a method that is distinctive of feminist historical work? How can women philosophers be meaningfully included in the history of the discipline? Who counts as a philosopher? This collection is a unique collaboration among philosophers from North America and the Nordic Countries, including papers written from both analytic and continental philosophical perspectives and discussing both ancient and modern philosophers. *Feminist Reflections on the History of Philosophy* will be of interest to historians of philosophy, feminist theorists, women's studies faculty and students, and humanists interested in canon formation and transformation.

The News and Public Opinion Maxwell McCombs,2011-10-10 The daily news plays a major role in the continuously changing mix of thoughts, feelings and behavior that defines public opinion. *The News & Public Opinion* details these effects of the news media on the sequence of outcomes that collectively shape public opinion, beginning with initial attention to the various news media and their contents and extending to the effects of this exposure on the acquisition of information, formation of attitudes and opinions and to the consequences of all these elements for participation in public life. Sometimes called the hierarchy of media effects, this sequence of outcomes describes the communication process involved in the formation of public opinion. Although the media landscape is undergoing rapid change, key elements remain the same, and *The News & Public Opinion* emphasizes these basic principles of communication established over decades of empirical social science investigations into the impact of mass communication on public opinion. The primary audience for this book is students, both advanced undergraduates and graduate students, as well as members of the general public who want to understand the role of the news media in our civic life.

Quakers, Christ, and the Enlightenment Madeleine Pennington,2021-03-04 The Quakers were by far the most successful of the radical religious groups to emerge from the turbulence of the mid-seventeenth century--and their survival into the present day was largely facilitated by the transformation of the movement during its first fifty years. What began as a loose network of charismatic travelling preachers was, by the start of the eighteenth century, a well-organised and

international religious machine. This shift is usually explained in terms of a desire to avoid persecution, but Quakers, Christ, and the Enlightenment argues instead for the importance of theological factors as the major impetus for change. In the first sustained account of the theological changes guiding the development of seventeenth-century Quakerism, Madeleine Pennington explores the Quakers' positive intellectual engagement with those outside the movement to offer a significant reassessment of the causal factors determining the development of early Quakerism. Considering the Quakers' engagement with such luminaries as Baruch Spinoza, Henry More, John Locke, and John Norris, Pennington unveils the Quakers' concerted attempts to bolster their theological reputation through the refinement of their central belief in the 'inward Christ', or 'the Light within'. In doing so, she further challenges stereotypes of early modern radicalism as anti-intellectual and ill-educated. Rather, the theological concerns of the Quakers and their interlocutors point to a crisis of Christology weaving through the intellectual milieu of the seventeenth century, which has long been under-estimated as significant fuel for the emerging Enlightenment.

John Ford at Work Lea Jacobs, 2025-10 John Ford at Work: Production Histories 1927-1939 explores the evolution of John Ford's career in the Hollywood studio system of the 1930s as the system itself changed in response to the coming of sound and the business downtown instigated by the Depression. Based upon a decade of research utilizing the studio files of Twentieth Century-Fox, RKO and Samuel Goldwyn, it delineates the director's collaborations with the producers, screenwriters, actors and cinematographers that had the most impact on his production practices. It traces the major literary, cinematic and musical sources from which he drew. It considers relevant changes in film technology and seeks to explain how they were incorporated into his style. Films analyzed include 4 Sons, The Black Watch, Arrowsmith, Air Mail, The Lost Patrol, The Informer, Judge Priest, Steamboat Round the Bend, The Prisoner of Shark Island, Wee Willie Winkie, Stagecoach and Young Mr. Lincoln.

Meaning, Expression and Thought Wayne A. Davis, 2002-11-11 This philosophical treatise on the foundations of semantics is a systematic effort to clarify, deepen and defend the classical doctrine that words are conventional signs of mental states, principally thoughts and ideas, and that meaning consists in their expression. This expression theory of meaning is developed

by carrying out the Gricean programme, explaining what it is for words to have meaning in terms of speaker meaning, and what it is for a speaker to mean something in terms of intention. But Grice's own formulations are rejected and alternatives developed. The foundations of the expression theory are explored at length, and the author develops the theory of thought as a fundamental cognitive phenomenon distinct from belief and desire, argues for the thesis that thoughts have parts, and identifies ideas or concepts with parts of thoughts. This book will appeal to students and professionals interested in the philosophy of language.

Helmholtz David Cahan,2018-09-11 Hermann von Helmholtz was a towering figure of nineteenth-century scientific and intellectual life. Best known for his achievements in physiology and physics, he also contributed to other disciplines such as ophthalmology, psychology, mathematics, chemical thermodynamics, and meteorology. With *Helmholtz: A Life in Science*, David Cahan has written a definitive biography, one that brings to light the dynamic relationship between Helmholtz's private life, his professional pursuits, and the larger world in which he lived. ? Utilizing all of Helmholtz's scientific and philosophical writings, as well as previously unknown letters, this book reveals the forces that drove his life—a passion to unite the sciences, vigilant attention to the sources and methods of knowledge, and a deep appreciation of the ways in which the arts and sciences could benefit each other. By placing the overall structure and development of his scientific work and philosophy within the greater context of nineteenth-century Germany, Helmholtz also serves as cultural biography of the construction of the scientific community: its laboratories, institutes, journals, disciplinary organizations, and national and international meetings. Helmholtz's life is a shining example of what can happen when the sciences and the humanities become interwoven in the life of one highly motivated, energetic, and gifted person.

Chocolate Islands Catherine Higgs,2012-05-21 In *Chocolate Islands: Cocoa, Slavery, and Colonial Africa*, Catherine Higgs traces the early-twentieth-century journey of the Englishman Joseph Burt to the Portuguese colony of São Tomé and Príncipe—the chocolate islands—through Angola and Mozambique, and finally to British Southern Africa. Burt had been hired by the chocolate firm Cadbury Brothers Limited to determine if the cocoa it was buying from the islands had been harvested by slave laborers forcibly recruited from Angola, an allegation that became one of the grand scandals of the early colonial era. Burt spent six months on São Tomé and Príncipe and a year in Angola. His five-month march across Angola in 1906 took him from innocence and credulity to outrage and activism and ultimately helped change labor recruiting practices in colonial Africa. This beautifully written and engaging travel narrative draws on collections in Portugal, the United Kingdom, and Africa to explore British and Portuguese attitudes toward work, slavery, race, and imperialism. In a story still familiar a century after Burt's sojourn, *Chocolate Islands* reveals the idealism, naivety, and racism that shaped attitudes

toward Africa, even among those who sought to improve the conditions of its workers.
