

Rose In The Concrete

Jose L. Martinez

The Rose That Grew From Concrete Tupac Shakur, 1999-11 Tupac Shakur's most intimate and honest thoughts were uncovered only after his death with the instant classic *The Rose That Grew from Concrete*. His talent was unbounded, a raw force that commanded attention and respect. His death was tragic -- a violent homage to the power of his voice. His legacy is indomitable -- remaining vibrant and alive. Here now, newly discovered, are Tupac's most honest and intimate thoughts conveyed through the pure art of poetry -- a mirror into his enigmatic life and its many contradictions. Written in his own hand at the age of nineteen, they embrace his spirit, his energy...and his ultimate message of hope.

Cultivation and Utilization of Aromatic Plants H. Panda, 2005-10-05 Aroma has played a vital role, directly as well as indirectly, in the life of human beings since its appearance on the earth as a result of evolution. India, Egypt and Persia were amongst the first countries to have conceived the process of distillation of essential oils. Aromatic plants have essential or aromatic oils naturally occurring in them. They help heal mental ailments and other diseases. India is endowed with a rich wealth of medicinal plants. Aromatic (Aroma Producing) plants are those plants which produce a certain type of aroma. Their aroma is due to the presence of some kind of essential oil with chemical constituents that contain at least one benzene ring in their chemical configuration. These plants have made a good contribution to the development of ancient Indian material medica. In recent years, there has been a tremendous growth of interest in plant based drugs, pharmaceuticals, perfumery products, cosmetics and aroma compounds used in food flavors and fragrances and natural colors in the world. The chemical nature of these aromatic substances may be due to a variety of complex chemical compounds. There is a definite trend to adopt plant based products due to the cumulative derogatory effects resulting from the use of antibiotic and synthetics and except for a few cultivated crops, the availability of plant based material is mainly from the natural sources like forests and wastelands. There is a need to introduce these crops into the cropping system of the country, which, besides meeting the demands of the industry, will also help to maintain the standards on quality, potency and chemical composition. During the

past decade, demand for aromatic plants and its products has attracted the worldwide interest, India being the treasure house of biodiversity, accounts for thousands of species which are used in herbal drugs. 90% of herbal industry requirement of raw material is taken out from the forests. This book basically deals with cultivation of *matricaria chamomilla*, present agro production technology status of celery, cultivation of *ocimum gratissimum* linn. var *clocimum*, the production and perfume potential of *jasminum* collections, chemical modification of turmeric oil to more value added products, biologically active compounds from turpentine oil, folk medicinal uses of indigenous aromatic plants in nepal , traditional uses of selected aromatic plants of bhutan and their cultivation prospects, blending aspects of perfumes with turpentine constituents, the chemistry of mint flavour, essential oils of *cinnamomum* species, citral containing *cymbopogon* species etc. The aim of publishing this book is to provide multidisciplinary information on aromatic plants. The book covers method of cultivation and utilization of various aromatic plants. This is very useful book for farmers, technocrats, agriculture universities, libraries, new entrepreneurs etc.

Advances in Medicinal and Aromatic Plants Amritesh C. Shukla, Sunita Facknath, Debashis Mandal, Bernadette Montanari, 2024-07-05 This new two-volume book categorically provides detailed information on highly demanded and medicinally important plants and their natural habits and habitats, taxonomy, cultivation practices, essential oils, active ingredients, biomolecules, modes of action, drug development, and value additions for marketing purpose. Examples of such plants include *Achillea* spp. (yarrow), *Acorus calamus* (sweet flag), *Ocimum* spp. (basil), *Dioscorea* spp., *Eucalyptus* spp., *Commiphora* spp. (guggul), *Kaempferia galanga* (aromatic ginger), and *Lavandula* spp. (lavender). Many others are included in the volume as well. With contributions from international experts, these two volumes present chapters that detail the history of these major medicinal and aromatic plants and also report on systematic botany, advanced production and propagation technologies, plant nutrition, moisture management, intercultivation, plant protection, postharvest technology, processing-value addition, and marketing trade. Further, the book presents promising low-cost and ecofriendly plant products and biomolecules, which are free from side-effects for use as pharmaceuticals and herbal drugs. The most ancient form of medical therapies involving herbs has been neglected for a few decades back and has regained enormous popularity because of the effectiveness and fewer hazardous properties of many medicinal and aromatic plants. Nature has all sorts of protective medicinal compounds within its huge bioresources, which are still being identified for beneficial health purposes. Herbs containing aromatic properties because of their essential oils also have medicinal uses apart from being used as dependable sources of natural fragrance for cosmetics, perfumery, and food industries competing with synthetic aroma chemicals. These volumes will be an excellent and comprehensive compendium for academicians and professionals working in plant resources. The compilation will also be valuable for students, researchers, medical practitioners, farmers, entrepreneurs, traders, industrialists, and NGOs who are involved in research and development and production and

pharmaceutics of medicinally important plants.
