

Stanley Diamond In Search Of The Primitive

Stanley Diamond

In Search of the Primitive Stanley Diamond, 1974 Anthropology is a kind of debate between human possibilities--a dialectical movement between the anthropologist as a modern man and the primitive peoples he studies. This brilliant, tough-minded book contains chapters ranging from encounters in the field to essays on the nature of law, schizophrenia and civilization, and the evolution of the work of Claude Lvi-Strauss. Diamond views the anthropologist who refuses to become a searching critic of his own civilization as not merely irresponsible, but a tool of Western civilization.

Symposium of the Whole Jerome Rothenberg, Diane Rothenberg, 2016-04-19 Symposium of the Whole traces a discourse on poetry and culture that has profoundly influenced the art of our time, with precedents going back two centuries and more. Beginning with a reassertion of the complexity of poetry among peoples long labeled "primitive" and "savage," many recent poets have sought to base a new poetics over the fullest range of human cultures. The attempt to define an ethno-poetics has been significantly connected with the most experimental and future-directed side of Romantic and modern poetry, both in the Western world and, increasingly, outside it. As a visionary poetics and as a politics, this complex redefinition of cultural and intellectual values has involved a rarely acknowledged collaboration between poets and scholars, who together have challenged the narrow view of literature that has excluded so many traditions. In this gathering, the Rothenbergs follow the idea of an ethno-poetics from predecessors such as Vico, Blake, Thoreau, and Tzara to more recent essays and manifestos by poets and social thinkers such as Olson, Eliade, Snyder, Turner, and Baraka. The themes range widely, from the divergence of oral and written cultures to the shaman as proto-poet and the reemergence of suppressed and rejected forms and images: the goddess, the trickster, and the "human universe." The book's three ethnographic sections demonstrate how various poetries are structured and composed, how they reflect meaning and worldview, and how they are performed in cultures where all art may be thought of as art-in-motion. Among the poetries discussed are the language of magic; West African drum language and poetry; the Huichol Indian language of reversals; chance operations in African divination poetry; picture-writings and action-writings from Australia and Africa; and American Indian sacred-clown dramas and traditional trickster narratives. The cumulative effect is a new reading of the poetic past and present—in the editors' words, "a changed paradigm of what poetry was or now could come to be."

The Neo-primitivist Turn Victor Li, 2006-01-01 In recent years the concept of 'the primitive' has been the subject of strong

criticism; it has been examined, unpacked, and shown to signify little more than a construction or projection necessary for establishing the modernity of the West. The term 'primitive' continues, however, to appear in contemporary critical and cultural discourse, begging the question: Why does primitivism keep reappearing even after it has been uncovered as a modern myth? In *The Neo-primitivist Turn*, Victor Li argues that this contentious term was never completely banished and that it has in fact reappeared under new theoretical guises. An idealized conception of 'the primitive,' he contends, has come to function as the ultimate sign of alterity. Li focuses on the works of theorists like Jean Baudrillard, Jean-François Lyotard, Marianna Torgovnick, Marshall Sahlins, and Jürgen Habermas in order to demonstrate that primitivism continues to be a powerful presence even in those works normally regarded as critical of the concept. Providing close readings of the ways in which the premodern or primitive is strategically deployed in contemporary critical writings, Li's interdisciplinary study is a timely and forceful intervention into current debates on the politics and ethics of otherness, the problems of cultural relativism, and the vicissitudes of modernity.

The Romantic Idea of the Golden Age in Friedrich Schlegel's Philosophy of History Asko Nivala, 2017-02-03 The nineteenth-century Romantic understanding of history is often confused with the longing for the past Golden Age. In this book, the Romantic idea of Golden Age is seen from a new angle by discussing it in the context of Friedrich Schlegel's works. Interestingly, Schlegel argued that the concept of a past Golden Age in the beginning of history was itself a product of antiquity, imagined without any historical ground. The Golden Age was not bygone for Schlegel, but to be produced in the future. His utopian vision of the Kingdom of God was related to the millenarian expectations of perpetual peace aroused by the revolutionary wars. Schlegel understood current era through the *kairos* concept, which emphasized the present possibilities for public agency. Thus history could not be reduced to any kind of pre-established pattern of redemption, for the future was determined only by the opportunities manifested in the present time.

Wandering God Morris Berman, 2012-02-01 The third book in Morris Berman's much acclaimed trilogy on the evolution of human consciousness, *Wandering God* continues his earlier work which garnered such praise as solid lessons in the history of ideas (KIRKUS Reviews), filled with piquant details (Common Boundary), and an informative synthesis and a remarkably friendly, good-natured jeremiad (The Village Voice). Here, in a remarkable discussion of our hunter-gatherer ancestry and the paradoxical mode of perception that it involved, Berman shows how a sense of alertness, or secular/sacred immediacy, subsequently got buried by the rise of sedentary civilization, religion, and vertical power relationships. In an integrated tour de force, *Wandering God* explores the meaning of Paleolithic art, the origins of social inequality, the nature of cross-cultural child rearing, the relationship between women and agriculture, and the world view of present-day nomadic peoples, as well as the emergence of paradoxical consciousness in the philosophical writings of the twentieth century.

The Ecocriticism Reader Cheryll Glotfelty, Harold Fromm, 1996 This book is the first collection of its kind, an anthology

of classic and cutting-edge writings in the rapidly emerging field of literary ecology. Exploring the relationship between literature and the physical environment, literary ecology is the study of the ways that writing - from novels and folktales to U.S. government reports and corporate advertisements - both reflects and influences our interactions with the natural world.

History, Power, Ideology Donald L. Donham, 2023-09-01 Is Marxism a reflection of the conceptual system it fights against, rather than a truly comprehensive approach to human history? Drawing on recent work in anthropology, history, and philosophy, Donald Donham confronts this problem in analyzing a radically different social order: the former Maale kingdom of southern Ethiopia. Unlike capitalist societies, wherein inequality is organized by contracts between free individuals, in Maale powerful men were thought to beget others through control of biological fertility and material fortune. Donham scrutinizes this unusual system of domination in order to sharpen issues in social and cultural theory. He concludes that the interpretation of symbols and analysis of historical contingency should be crucial steps in any Marxist investigation. The result is a provocative and original re-reading of the Marxist tradition, and a spirited defense of its continued vitality and relevance. Every once in a while there appears a book that . . . opens up new ways of inquiring into the ways of the world. Donald Donham has written such a book. The style is quiet and judicious, but the effect is stunning. . . . In putting inherited partisan approaches to the test of explaining the realities of Maale society and culture, Donham enriches anthropology and imparts new vigor to the analytical Marxist traditions. *History, Power, Ideology* embodies a major accomplishment.—From the Foreword Is Marxism a reflection of the conceptual system it fights against, rather than a truly comprehensive approach to human history? Drawing on recent work in anthropology, history, and philosophy, Donald Donham confronts this problem in analyzing a radically

The Electronic Media and the Transformation of Law M. Ethan Katsh, 1989 This is the first book to explore the broad influence of computers and television on the evolution of the US legal process.

The Future of Tradition Leon Shaskolsky Sheleff, 2013-09-05 Recent years have seen an increased interest in the

variety of cultures co-existing within one state, and a growing acknowledgement of the values ensconced in pluralistic social structures. this book examines the manner in which indigenous people can function in modern states, preserving their traditional customs, while simultaneously adapting aspects of their culture to the challenges posed by modern life. Whereas it was formerly assumed that these tribal frameworks were doomed to extinction, and some states even encouraged such a process, there has been a revival in their vitality, linked to a recognition of their rights. The book offers a comprehensive survey of various aspects of tribal life, focusing on political issues such as the meaning of sovereignty, legal issues dealing with the role of custom and social issues concerned with sustaining communal life. A focused study is made of a whole series of legal factors, relating to possession and ownership of land, religious rites, the nature of polygamous marriages, the assertion of group rites, the manner of peacefully resolving disputes and allied questions. Recent judicial decisions are analysed as a reflection of the far-reaching changes that have taken place, in a process that has seen the former disregard of basic rights of indigenous people being replaced by an awareness of the injustices perpetrated in the past and a willingness to seek to redress them. The comparison between approaches of different English-speaking countries provides an account of interwoven developments.

Defenders of the Faith Samuel C. Heilman, 2023-11-15 In this first in-depth portrait of ultra-Orthodox Jews in Israel today, Samuel Heilman introduces a community that to many may seem to be the very embodiment of the Jewish past. To outsiders who stumble upon these neighborhoods and find bearded men in caftans, children with earlocks, and women in long dresses, black kerchiefs and stockings, it may appear that these people still hold fast to every tradition while turning their backs to the contemporary world. But rather than being a relic from the past, ultra-Orthodox Jews, or haredim, are very much part of the contemporary landscape and are playing an increasingly prominent role in the Jewish world and in Israeli politics. *Defenders of the Faith* takes us inside the world of this contemporary fundamentalist community, its lifestyle and mores, including education, religious practices and beliefs, sexual ethics, and marriage. Heilman explores the reasons why this group is more militant and extreme than its pre-Holocaust brethren, and provides insight into the worldview of this small but influential sector of modern Jewry. In this first in-depth portrait of ultra-Orthodox Jews in Israel today, Samuel Heilman introduces a community that to many may seem to be the very embodiment of the Jewish past. To outsiders who stumble upon these neighborhoods and find bearded men in caf

Israel Yearbook on Human Rights, Volume 21 Yoram Dinstein, Mala Tabory, 2021-10-11 Includes articles on specific problems of minorities and general problems of rights of minorities; a book review of *International Law and the Rights of Minorities* by Patrick Thornberry; and a cumulative index to volumes 1-20.

The Protection of Minorities and Human Rights Yoram Dinstein, Mala Tabory, 2023-11-27 From the dawn of modern international law, manifold treaties (especially peace treaties) have recognized the rights of specific minorities in specific territories. Today -- with Eastern Europe once more in turmoil and with minority groups all over the world clamouring for recognition -- there is a growing awareness that, irrespective of the observance of the fundamental freedoms of individuals, minority groups have their legitimate interests that must be appreciated and accommodated. This collection of essays grew out of an international legal colloquium, held at the Faculty of Law of Tel Aviv University in March 1990. Some of the papers have already been published in volume 20 of the Israel Yearbook on Human Rights, but others are printed here for the first time. The authors come from different parts of the world and represent different legal backgrounds. They are by no means at one in their analysis of the human rights of minority groups, but they all share the sense that problems of minorities cannot be brushed aside or glossed over. It is not too hazardous to forecast that these problems will actually intensify in the 21st century. Whereas they cannot be solved through exclusively legal means, international and constitutional lawyers must do their utmost to identify flash points and to offer at least some prescriptive guidelines. This is the principal purpose of the present volume.

Tracks Along the Left Coast Andrew Schelling, 2017-05-15 "Tracks Along the Left Coast more than accomplishes its self-appointed task of celebrating de Angulo's legacy." —Rain Taxi "Schelling's biography of Jaime de Angulo—'cattle puncher, medical doctor, bohemian, buckeroo,' among other things—presents a fascinating, full-bodied portrait of a man and an era, as well as delving deep into California's Native history. De Angulo's isn't a household name, but in Schelling's work the man called by Ezra Pound the 'American Ovid' comes blazing to life in all his singular brilliance." —Stephen Sparks, Literary Hub California, with its scores of native languages, contains a wealth of old-time stories—a bedrock of the literature of North America. Jaime de Angulo's linguistic and ethnographic work, his writings, as well as the legends that cloak the Old Coyote himself, vividly reflect the particulars of the Pacific Coast. In each retelling, through each storyteller, stories are continually revived, and that is precisely what Andrew Schelling has done in Tracks Along the Left Coast, weaving together the story of de Angulo's life with the story of the land and the people, languages, and cultures with whom it is so closely tied.

Literacy and Literacies James Collins, Richard Blot, 2003-05-08 Literacy and Literacies is an engaging account of literacy and its relation to power. The book develops a synthesis of literacy studies, moving beyond received categories, and exploring the domain of power through questions of colonialism, modern state formation, educational systems and official versus popular literacies. Collins and Blot offer in-depth critical discussion of particular cases and discuss the role of literacies in the formation of class, gender, and ethnic identity. Through their analysis of two domains - those of literacies and power, and of literacies and subjectivity - they challenge received assumptions about literacy, intellectual development and social progress and argue that neither 'universalist' nor 'particularist' accounts offer satisfactory approaches to the

phenomenon. This is a sustained exploration of the domain of power in relation to literacy. It will be welcomed by students and researchers in anthropology, linguistics, literacy studies and history.

Indigenous Rights Anthony J. Connolly, 2017-05-15 Throughout the world, indigenous rights have become increasingly prominent and controversial. The recent adoption by the United Nations General Assembly of the Declaration on the Rights of Indigenous Peoples is the latest in a series of significant developments in the recognition of such rights across a range of jurisdictions. The papers in this collection address the most important philosophical and practical issues informing the discussion of indigenous rights over the past decade or so, at both the international and national levels. Its contributing authors comprise some of the most interesting and influential indigenous and non-indigenous thinkers presently writing on the topic.

The Politics of Egalitarianism Jacqueline Solway, 2006-03-01 The essays assembled in this book exemplify the way political anthropologists address a range of problems that deeply affect people throughout the world. The authors draw their inspiration from the work of Canadian anthropologist Richard B. Lee, and, like him, they are concerned with understanding and acting upon issues of "indigenous rights"; the impact of colonialism, postcolonial state formation, and neoliberalism on local communities and cultures; the process of culture change; what the history and politics of egalitarian societies reveal about issues of "human nature" or "social evolution"; and how peoples in southern Africa are affected by and responding to the most recent crisis in their midst, the spread of AIDS. The authors in this volume discuss the state of a range of contemporary debates in the field that in various ways extend the political, theoretical, and empirical issues that have animated Lee's work. In addition, the book provides readers with important contemporary Kalahari studies, as well as "classic" works on foraging societies.

Folk Song Style and Culture Alan Lomax, American Association for the Advancement of Science, 1968 Song and dance style--viewed as nonverbal communications about culture--are here related to social structure and cultural history. Patterns of performance, theme, text and movement are analyzed in large samples of films and recordings from the whole range of human culture, according to the methods explained in this volume. Cantometrics, which means song as a measure of man, finds that traditions of singing trace the main historic distributions of human culture and that specific traits of performance are communications about identifiable aspects of society. The predictable and universal relations between expressive communication and social organization, here established for the first time, open up the possibility of a scientific aesthetics, useful to planners. Alan Lomax is Director, Cantometrics and Choreometrics Projects at Columbia University.
