You can find the original here: <https://amzn.to/2o94gAI> The #1 Bestselling Summary of The Four Hour Body by Timothy Ferriss! Learn how to apply the main ideas and principles from the original book in a quick, easy read! The 4HB or the 4-Hour Body is a new approach to helping people achieve the body they want. It has managed to help hundreds of women and men lose 20 pounds of fat within the first month alone. This approach is more about making small, simple changes. The visible and rapid results help push the person to continue towards reaching their ultimate weight loss goal. To do this, it is necessary to use mental modes. These are analytical frameworks or heuristics. Self-discipline is not a necessity, unlike other approaches to weight loss and muscle gain methods. In the 4HB, self-discipline is not going to be an issue. The main driving and motivational force will be the results that are observed within a shorter period. These results are also measurable, which help a person see just how far he/she has come. The 4-Hour Body adopts the 80/20 Principle. This was created by Vilfredo Pareto. The principle was originally devised to illustrate wealth distribution. According to this principle, wealth distribution is grossly uneven yet predictable. In a population, 80% of its income and wealth is produced by only 20% of the total population. This principle is also called Pareto's Distribution or Pareto's Law.
