Asia Rising Ryo Sahashi,Yasuhiro Matsuda,Waka Aoyama,2024-09-01 This open-access book offers a clear and thorough exploration of Asia's history from an international relations perspective. The book investigates key political, economic, and cultural forces defining Asia. It highlights the historical and current significance of the Indo-Pacific region, particularly shedding light on its strategic role in global geopolitics. Through detailed historical analyses, the authors guide readers toward a comprehensive understanding of Asia's complex international relations, from colonization and imperialism, through the Cold War, into decolonization and the wave of democratization in the region, to the rise of China, unpacking the various dimensions of regionalism in Asia. This book serves as a practical scholarly resource for advanced students, researchers, and lecturers interested in understanding the region's past and its implications for future geopolitical dynamics. It is relevant to historians focused on Asia and to international relations and political science scholars interested in the shift to an Asian world order, from past to present.

Advances in Mathematical Economics Shigeo Kusuoka,Toru Maruyama,2018-07-31 The series is designed to bring together those mathematicians who are seriously interested in getting new challenging stimuli from economic theories with those economists who are seeking effective mathematical tools for their research. A lot of economic problems can be formulated as constrained optimizations and equilibration of their solutions. Various mathematical theories have been supplying economists with indispensable machineries for these problems arising in economic theory. Conversely, mathematicians have been stimulated by various mathematical difficulties raised by economic theories.

Population Dynamics and Livelihood Changes of Small-Scale Societies in Laos Satoshi Yokoyama,Takahito Niwa,Hongwei Jiang,2025-05-06 This book examines various trends in small-scale societies in Laos by linking population changes to livelihood changes. The primary research issues addressed in the book are as follows: □ How are population dynamics and livelihood changes in small-scale societies interrelated? □ What are the current demographic trends in rural areas of Laos? □ How are the livelihoods of small-scale societies maintained? □ How is the rapid population growth common in developing countries managed? In order to investigate these issues in developing countries where statistical data are not well developed, it was necessary to collect information through detailed and distinctive fieldwork. To this end, a

multidisciplinary study of geography, cultural anthropology, human ecology, and demography was conducted in three villages in Laos and compiled as an ethnography. The study included a four-generation retrospective survey of population and land use change, a two-year survey of food dairies, and a survey of the spatiotemporal distribution of residents' daily activities using GIS and GPS, etc. The book provides valuable information on the slowdown in the rate of population growth in contemporary rural Laos. Livelihoods, family planning and population migration are explored in the context of the decreasing population growth rate. In addition, the book describes the process of adopting modern contraceptive methods in rural areas, as well as the Lao government's reproductive policies and villagers' responses to them. It also illustrates rural-rural and rural-urban population migration influenced by the government's resettlement policies, which encourages people to move from the highlands to the lowlands.

Innovation, Communication and Engineering Teen-Hang Meen, Stephen Prior, Artde Donald Kin-Tak Lam, 2013-10-08
This volume represents the proceedings of the 2013 International Conference on Innovation, Communication and Engineering (ICICE 2013). This conference was organized by the China University of Petroleum (Huadong/East China) and the Taiwanese Institute of Knowledge Innovation, and was held in Qingdao, Shandong, P.R. China, October 26 - November 1, 2013. The conference received 653 submitted papers from 10 countries, of which 214 papers were selected by the committees to be presented at ICICE 2013. The conference provided a unified communication platform for researchers in a wide range of fields from information technology, communication science, and applied mathematics, to computer science, advanced material science, design and engineering. This volume enables interdisciplinary collaboration between science and engineering technologists in academia and industry as well as networking internationally. Consists of a book of abstracts (260 pp.) and a USB flash card with full papers (912 pp.).

Biological Functions of Microtubules and Related Structures Hikoichi Sakai, Hideo Mohri, Gary G. Borisy, 2013-10-22
Biological Functions of Microtubules and Related Structures is a compendium of papers presented at the 13th Oji International Seminar on The Biological Functions of Microtubules and Related Structures, held at Komaba Eminence in Tokyo in November, 1981. The papers discuss the molecular function of tubulin in various biological processes or events. The book is divided into six sections focusing on the various aspects of the functions and structures of microtubules -- the biochemistry and molecular biology of tubulin, including regulation of microtubule assembly; microtubule-dynein systems and other proteins in cell motility; microtubules and related proteins in mitosis; the interactions of cytoskeletal components; the cytoskeleton; and microtubules in membrane functions and transport. Biochemists, biologists, and molecular biologists will find the book interesting.

Paths to the Emerging State in Asia and Africa Keijiro Otsuka, Kaoru Sugihara, 2019-01-16 This book is open access under a CC BY-NC-ND license. This book addresses the issue of how a country, which was incorporated into the world economy as a periphery, could make a transition to the emerging state, capable of undertaking the task of economic development and industrialization. It offers historical and contemporary case studies of transition, as well as the international background under which such a transition was successfully made (or delayed), by combining the approaches of economic history and development economics. Its aim is to identify relevant historical contexts, that is, the 'initial conditions' and internal and external forces which governed the transition. It also aims to understand what current low-income developing countries require for their transition. Three economic driving forces for the transition are identified. They are: (1) labor-intensive industrialization, which offers ample employment opportunities for labor force; (2) international trade, which facilitates efficient international division of labor; and (3) agricultural development, which improves food security by increasing supply of staple foods. The book presents a bold account of each driver for the transition.

Imitation, Counterfeiting and the Quality of Goods in Modern Asian History Kazuko Furuta, Linda Grove, 2017-10-12 This book focuses on the production of low-quality goods, the rise of markets for imitations and shoddy goods, and dishonest trading practices which developed along with the expansion of global trade in the nineteenth and twentieth centuries in East Asia. Fake, imitation, counterfeit, and adulterated goods have long plagued domestic and international trade. While we are all familiar with contemporary attempts to control the manufacture and sales of such goods, economic historians have given the subject little attention, despite the fact that the growth of international trade and the lengthening of commodity chains played a major role in the spread of such practices. The problem is approached in several ways. Part I of the book examines the ways in which the asymmetry of product-quality information was reduced and mechanisms were developed to bring greater order in the markets, using case studies on cotton fiber, silk pongee, cotton cloth, fertilizer, and tea. Part II of the book focuses on problems associated with imported everyday-use items—which are referred to here as “small things”—and the role played by imitations of such everyday goods as soap, matches, glass bottles, and toys in the development of the modern economies of Japan, China and Taiwan. The project brings together the work of an international team of scholars who offer important historical perspectives on these issues, exploring the ways in which new institutions were created that continue to play a role in contemporary global economic activities.

Insularity and Geographic Diversity of the Peripheral Japanese Islands Akitoshi Hiraoka, Satoshi Suyama, Hisamitsu Miyauchi, Takehisa Sukesige, 2022-06-06 This book clarifies the geography of the peripheral Japanese islands from a variety of angles. The islands are distributed in the tropical and cool temperate zones, and the most distant inhabited islands are more than 1,000 km from the mainland. In the past, they were Japan's frontier, close to neighboring countries. However,

during Japan's modernization process, the islands were positioned as backward regions, supplying food, resources, and labor. Today, the islands are considered to be on the periphery of Japan, with lifestyles different from those of the mainland. The islands are also getting attention as sightseeing locales and emigration regions attracting those who prefer country life—an image of the islands that has been created by the romanticized gaze from the Japanese mainland. The authors describe the various forms of the outlying Japanese islands and at the same time discover their common regional characteristics, as defined by the view from the mainland.

Regional Innovation and Networks in Japan Yutaka Yokura, 2021-05-29 This book provides a novel perspective on networks and innovation in the field of economic geography and presents new findings through theoretical foundations and empirical analyses. The book focuses on various temporary systems in industrial agglomerations such as joint R&D, trade fairs, business workshops, and international conferences. Following the introduction, Chapter 2 considers the mechanism of the innovation process in which networks function as institutions. Chapter 3 and succeeding chapters conduct empirical research centered on statistical data analysis such as social network analysis and covariance structure analysis, and they determine the real-world situations through interview surveys of related stakeholders. Chapter 3 considers the structure and spatial patterns of R&D networks in Japan by making the structure visible and calculating network indices. Chapter 4 concentrates on local trade fairs held in industrial agglomerations and examines the development of various relationships between related participants. Chapters 5 and 6 shed light on institutional thickness in industrial agglomerations. Chapter 7 spotlights quantitative and metrical examinations of inter-organizational relationships in terms of knowledge flows based on company-level data regarding technological alliances and ownership relationships between global corporations. The studies featured in Chapters 6 and 7 serve to evaluate how Japan's firms have adapted to radical changes under global competition.

Climatological Study of Urban Climate and Heat and Cold Mortalities in Japan Fumiaki Fujibe, 2023-09-12 This book describes observed features of urban climate and its long-term variations as well as the relationship of climate to heat stroke in Japan, based on observational data and statistical analyses. Consisting of three parts, the book is a valuable resource for researchers and professionals involved with these topics. Part 1 focuses on urban climate. The basic characteristics of heat islands are reviewed, and long-term urban warming is described with a focus on the distinction from global warming. The influence of microscale environmental changes on the observed temperature is also presented, as well as changes in wind and precipitation in urban areas. They deepen our understanding of the features and mechanisms of urban heat islands and their long-term changes. Part 2 describes the climatological features of heat stroke mortality, which has become a major social problem in Japan, using mortality statistics and meteorological data. The spatial and temporal variations of heat stroke mortality are analyzed quantitatively on various spatial and temporal scales. In addition, the number of ambulance transports is examined as another measure of heat stroke casualty. The results provide insight into the

climatological factors related to heat stroke mortality and contribute to the implementation of preventive measures. The climatology of deaths from extreme cold is also presented. For supplementary information, an overview of the geography, climate, and meteorological data of Japan is presented in Part 3.

Polymer Yearbook Richard A. Pethrick, 1989 This volume contains reviews on state-of-the-art Japanese research presented in the annual Spring and Autumn meetings of the Japanese Polymer Science Society. The aim of this section is to make information on the progress of Japanese Polymer Science, and on topics of current interest to polymer scientists in Japan, more easily available worldwide.

Creativity in Music Education Yukiko Tsubonou, Ai-Girl Tan, Mayumi Oie, 2018-12-17 This book creates a platform for music educators to share their experience and expertise in creative music teaching and learning with the international community. It presents research studies and practices that are original and representative of music education in the Japanese, Asian and international communities. It also collects substantial literature on music education research in Japan and other Asian societies, enabling English-speaking readers to access excellent research and practical experiences in non-English societies.

Immunobiotics: Interactions of Beneficial Microbes with the Immune System Julio Villena, Haruki Kitazawa, 2018-01-26 The term “immunobiotics” has been proposed to define microbial strains able to beneficially regulate the mucosal immune system. Research in immunobiotics has significantly evolved as researchers employed cutting-edge technologies to investigate the complex interactions of these beneficial microorganisms with the immune system. During the last decade, our understanding of immunobiotics-host interaction was profoundly transformed by the discovery of microbial molecules and host receptors involved in the modulation of gut associated immune system, as well as the systemic and distant mucosal immune systems. In recent years, there has been a substantial increase in the number of reports describing the beneficial effects of immunobiotics in diseases such as intestinal and respiratory infections, allergy, inflammatory bowel disease, obesity, immunosuppression, and several other immune-mediated conditions. Evidence is also emerging of immunobiotics related molecules with immunomodulatory functions leading to the production of pharmabiotics, which may positively influence human or animal health. Therefore, research in immunobiotics continue to contribute not only to food but also medical and pharmaceutical fields. The compilation of research articles included in this ebook should help reader to have an overview of the recent advances in immunobiotics.

Broadcasting in Japan Hitoshi Mitomo, Mikio Kimura, 2022-11-14 This book provides an analysis of the various challenges and opportunities facing the Japanese broadcasting industry. It is the first book in English that explores how Japanese broadcasting, especially commercial broadcasting, fulfills its social mission under the threat of the increased popularity of Internet-based media services as it reexamines the role and nature of broadcasting. During a series of disasters

and the spread of the new coronavirus in Japan, while varied media connected people and supported socio-economic activities, broadcasting continued to be the most trusted. However, as Internet media attract increasing attention, the trend in broadcast viewership is downward. Commercial broadcasting, in particular, will be strongly affected by that trend and the impact of the shrinking population. Recognizing that such dramatic technological and environmental changes are under way, in addition to the eleven researchers participating in the visiting researcher committee at the Research Institute of the Japan Commercial Broadcasters Association (JBA), four research collaborators and the secretariat (director of the JBA) have contributed to this book. They have taken up issues related to challenges and opportunities for the broadcasting industry based on their respective areas of awareness of the problems, including policies for broadcasting, fake news, disaster responses, viewer trust in television programs, competition with Internet-based services, and the business model for broadcasting.

Regions, Power, and Conflict William R. Thompson, Thomas J. Volgy, Paul Bezerra, Jacob Cramer, Kelly Marie Gordell, Manjeet Pardesi, Karen Rasler, J. Patrick Rhamey Jr., Kentaro Sakuwa, Rachel Van Nostrand, Leila Zakhirova, 2022-08-16 The three main levels of analysis in international relations have been the systemic, the national, and the individual. A fourth level that falls between the systemic and the national is the region. It is woefully underdeveloped in comparison to the attention afforded the other three. Yet regions tend to be distinctive theaters for international politics. Otherwise, we would not recognize that Middle Eastern interstate politics somehow does not resemble Latin American interstate politics or interstate politics in Southern Africa (although once the Middle East and Southern Africa may have seemed more similar in their mutual fixation with opposition to domestic policies in Israel and South Africa, respectively). This book, divided into three parts, first makes a case for studying regional politics even though it must also be appreciated that regional boundaries are also hazy and not always easy to pin down empirically. The second part examines power distributions within regions as an important entry point to studying regional similarities and differences. Two emphases are stressed. One is that regional power assessments need to be conditioned by controlling for weak states which are more common in some regions than they are in others. The other emphasis is on regional power hierarchies. Some regions have strong regional hierarchies while others do not. Regions with strong hierarchies operate much differently from those without them in the sense that the former are more pacific than the latter. The third part of the book focuses on regional differences in terms of conflict behavior, order preferences, rivalries, and rivalry termination.

Lives in Peace Research Stein Tønnesson, 2022-04-26 This open access book explains how PRIO, the world's oldest peace research institute, was founded and how it survived through crises. In this book, twenty-four of its researchers and associates, including Johan Galtung, Ingrid Eide, and Mari Holmboe Ruge, who founded the institute back in 1959, tell the stories of their roles in inventing and developing peace research. They reflect on their personal experiences with peace and

conflict, tell what drove their peace engagement, and discuss the balance sought in the field between the cold dictates from academic rigor and the hot pursuit of peace, a desire for research to make a positive difference. Most of the chapters are interviews where one colleague interviews another. Some are self-reflective essays, while others are memorial essays written about a peace researcher who has passed away. Taken together, the book presents a lively picture of a thriving world-leading research environment and a wealth of conflicting or mutually reinforcing perspectives on war, violence, conflict, conflict management and resolution, negotiations and mediation, peacemaking, peace building, and the contested concept of peace. "The Oslo Stories is an indispensable source to the history of peace research." Dr. Olav Njølstad, Director, Nobel Institute, Oslo

Analyzing Strategic Rivalries in World Politics William R. Thompson, Kentaro Sakuwa, Prashant Hosur Suhas, 2021-11-20 Strategic rivalries are contests between states that view one another as threatening competitors and treat each other as enemies. A disproportionate amount of interstate conflict is generated by a relatively small number of these pairs of states engaged in rivalries that can persist for years. Thus, to understand interstate peace and conflict, it is useful to know how rivalries work in general and more specifically. In the past two decades, a strenuous effort has been mounted to introduce the concept of rivalry and demonstrate its utility in unraveling conflict situations. Yet all rivalries are not exactly alike. We need to move to a more rewarding differentiation of how they differ in general. Principal rivalries are those antagonisms that are most significant to the decision makers in a state. The main distinction on issues about which rivals dispute are positional and spatial concerns. Positional rivalries contend over regional and global influence. Spatial rivals contend over which state deserves to control disputed territory. Interventionary rivalries predominate in sub-Saharan Africa. Their primary focus involves neighboring states attempting to influence who rules and how co-ethnics are treated. This book updates the inventory of strategic rivalries from 1816 to 2020. Principal rivalries are identified for the first time and cover the same period. A theory stressing the two main types of rivalry (positional and spatial) is elaborated and tested. Regional variations on the origins and terminations of spatial rivalry are explored and interpreted. In addition, attention is paid to fluctuations in the intensity of positional rivalries by examining the working of the contemporary major power triangle (United States, Soviet Union/Russia, and China) and, more generally, the dynamics of regional power that are rising in terms of their relative capability and status in the system. Variations in cooperation and termination dynamics both in general and according to rivalry type are also examined. Overall, the emphases of the book are split between demonstrating the utility of distinguishing among rivalry types and examining selected rivalry dynamics.

mechanics of materials - Sep 01 2023
in the mechanics of materials the

strength of a material is its ability to
withstand an applied load without
failure or plastic deformation the field
of strength of materials deals with
forces and deformations that result
from their acting on a material a load
applied to a mechanical member will
induce internal forces within the
member called stresses when those
forces are expressed on a unit
