TV by Design Lynn Spigel, 2008 From the Publisher: While critics have long disparaged commercial television as a vast wasteland, TV has surprising links to the urbane world of modern art that stretch back to the 1950s and '60s during that era, the rapid rise of commercial television coincided with dynamic new movements in the visual arts—a potent combination that precipitated a major shift in the way Americans experienced the world visually. TV by Design uncovers this captivating story of how modernism and network television converged and intertwined in their mutual ascent during the decades of the cold war. Whereas most histories of television focus on the way older forms of entertainment were recycled for the new medium, Lynn Spigel shows how TV was instrumental in introducing the public to the latest trends in art and design. Abstract expressionism, pop art, art cinema, modern architecture, and cutting-edge graphic design were all mined for staging techniques, scenic designs, and an ever-growing number of commercials. As a result, TV helped fuel the public craze for trendy modern products, such as tailfin cars and boomerang coffee tables, that was vital to the burgeoning postwar economy. And along with influencing the look of television, many artists—including Eero Saarinen, Ben Shahn, Saul Bass, William Golden, and Richard Avedon—also participated in its creation as the networks put them to work designing everything from their corporate headquarters to their company cufflinks. Dizzy Gillespie, Ernie Kovacs, Duke Ellington, and Andy Warhol all stop by in this imaginative and winning account of the ways in which art, television, and commerce merged in the first decades of the TV age.

Alcoholism Treatment Rebirth Kenneth Anderson, 2025-03-30 This book covers the alcoholism treatment facilities established between the Repeal of Prohibition in 1933 and 1956, when it is erroneously believed that the American Medical Association declared alcoholism to be a disease. This book blows out of the water the myths that AA invented the disease theory, that Hazelden invented treatment, that everyone flocked to Hazelden to learn how to do treatment, and that AA convinced the American Medical Association to declare alcoholism to be a disease. This book shows how the scholars at Yale University created a coast-to-coast, science-based alcoholism treatment industry in the 1940s and 1950s. This book further demonstrates how Hazelden and its close ally the Johnson Institute hijacked this science-based alcoholism treatment industry in the 1960s and 1970s and replaced it with one based on mysticism and faith healing. These are the events which have led to the current divorce of addiction treatment from addiction science. This book also chronicles the rebirth of pre-Prohibition

secret aversion treatments in the hands of new entrepreneurs such as HALCO Laboratories and the Samaritan Institutions and shows how Shadel Sanitarium turned these nostrums into legitimate scientific medicine. This book also covers the Salvation Army, Volunteers of America and other faith-based programs. Finally, this book shows how AA groups set up AA indoctrination programs in general hospitals throughout the country starting in the 1930s. Kenneth Anderson is an extremely important voice on addiction: penetrating, original, and deeply wise. - Johann Hari, author of Chasing the Scream.

Engaging Boys in Treatment Craig Haen, 2011-03-07 Traditional therapy can often be an off-putting experience for boys as it is in direct opposition to the ways they generally interact and connect with others. This book explores a variety of creative approaches that professionals can use to enhance the clinical experience and better reach their young male clients.

Chapters discuss the theory behind and implementation of various creative approaches to therapy with boys, such as play therapy, including sports, movement, and gross-motor activity; animal-assisted therapy; the use of video games and computers; the use of superheroes in role play, metaphor, and play therapy; and art therapy. Attention is also given to methods for working with several subgroups of boys that require specialized treatment approaches, including gender variant and sexual minority boys and boys with ADHD. The first book of its kind, mental health professionals will find this a comprehensive and highly valuable text to help them understand, help, and support boys and their development.
