Synesthesia and the Arts Dani Cavallaro,2013-10-16 This study explores the relationship between synesthesia--the experience of a sensation in one perceptual domain triggering a sensation in another perceptual domain--and the arts (including painting, photography, music and literature). Its aim is twofold: to introduce readers as yet unfamiliar with synesthesia to this intriguing phenomenon by focusing on its impact on the creation and reception of art; and to alert readers already conversant with synesthesia in its many manifestations to its potential to encourage fresh ways of approaching art, of understanding the part played by our bodies in its production and receipt and, by extension, of reassessing our position in nature as humans.

The Culture of Yellow Sabine Doran,2013-09-26 This is the first book to explore the cultural significance of the color yellow, showing how its psychological and aesthetic value marked and shaped many of the intellectual, political, and artistic currents of late modernity. It contends that yellow functions during this period primarily as a color of stigma and scandal. Yellow stigmatization has had a long history: it goes back to the Middle Ages when Jews and prostitutes were forced to wear yellow signs to emphasize their marginal status. Although scholars have commented on these associations in particular contexts, Sabine Doran offers the first overarching account of how yellow connects disparate cultural phenomena, such as turn-of-the-century decadence (the yellow nineties), the rise of mass media (yellow journalism), mass immigration from Asia (the yellow peril), and mass stigmatization (the yellow star that Jews were forced to wear in Nazi Germany). The Culture of

Yellow combines cultural history with innovative readings of literary texts and visual artworks, providing a multilayered account of the unique role played by the color yellow in late nineteenth- and twentieth-century American and European culture.

The Methodologies of Art Laurie Schneider Adams, 2018-03-09 Since the nineteenth century, when art history became an established academic discipline, works of art have been 'read' in a variety of ways. These different ways of describing and interpreting art are the methodologies of artistic analysis, the divining rods of meaning. Regardless of a work's perceived difficulty, an art object is, in theory, complex. Every work of art is an expression of its culture (time and place) and its maker (the artist) and is dependent on its media (what it's made of). The methodologies discussed here (formal analysis, iconology and iconography, Marxism, feminism, biography and autobiography, psychoanalysis, structuralism, race and gender) reflect the multiplicity of meanings in an artistic image. The second edition includes nineteen new images, new sections on race, gender, orientalism, and colonialism, and a new epilogue that analyzes a single painting to illustrate the different methodological viewpoints.
