The Legacies of Institutionalisation Claire Spivakovsky, Linda Steele, Penelope Weller, 2020-07-09 This is the first collection to examine the legal dynamics of deinstitutionalisation. It considers the extent to which some contemporary laws, policies and practices affecting people with disabilities are moving towards the promised end point of enhanced social and political participation in the community, while others may instead reinstate, continue or legitimate historical practices associated with this population's institutionalisation. Bringing together 20 contributors from the UK, Canada, Australia, Spain and Indonesia, the book speaks to overarching themes of segregation and inequality, interlocking forms of oppression and rights-based advancements in law, policy and practice. Ultimately this collection brings forth the possibilities, limits and contradictions in the roles of law and policy in processes of institutionalisation and deinstitutionalisation, and directs us towards a more nuanced and sustained scholarly and political engagement with these issues.

Mental Health Nursing Gylo (Julie) Hercelinskyj, Louise Alexander, 2019-07-30 Mental Health Nursing: Applying Theory to Practice is a new Australian text combining a theoretical approach to mental health nursing with clinical reasoning and a practical framework for real-life nursing situations. Ideal for both clinical and theory mental health course units, the text was developed with input from consumers and clinicians, and includes the clinical manifestations, impacts, treatment and management of persons suffering from mental illness. Chapters on suicide and self-harm, and Mental Health First Aid provide detailed coverage of these contemporary mental health issues, while a chapter on mental state examination (MSE) comprehensively explores MSE in a style similar to a traditional psychiatry text and in the context of many different mental health conditions, giving students multiple perspectives of presentations. Critical thinking and review questions challenge students to apply theory to practice, and pharmacology is discussed in each disorder-chapter, helping students to contextualise their learning. With coverage of the Mental Health Act (2014), and criteria from the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5) integrated throughout, the text equips students with a working understanding of major mental health disorders, and the ability to work practically when engaging with persons suffering from mental illness. New, print versions of this book come with bonus online study tools on the CourseMate Express and Search Me! Nursing platforms.

Beyond the Risk Paradigm in Mental Health Policy and Practice Sonya Stanford, Elaine Sharland, Nina Rovinelli Heller, Joanne Warner, 2017-03-29 Modern society is increasingly preoccupied with fears for the future and the idea of preventing 'the worst'. The result is a focus on attempting to calculate the probabilities of adverse events occurring - in other words, on measuring risk. Since the 1990s, the idea of risk has come to dominate policy and practice in mental health across the USA, Australasia and Europe. In this timely new text, a group of international experts examines the ways in which the narrow focus on specific kinds of risk, such as violence towards others, perpetuates the social disadvantages experienced by mental health service users whilst, at the same time, ignoring the vast array of risks experienced by the service users themselves. Benefitting from the authors' extensive practice experience, the book considers how the dominance of the risk paradigm generates dilemmas for mental health organizations, as well as within leadership and direct practice roles, and offers practical resolutions to these dilemmas that both satisfy professional ethics and improve the experience of the service user. Combining examination of key theories and concepts with insights from front line practice, this latest addition to Palgrave's *Beyond the Risk Paradigm* series provides an important new dimension to debates on mental health provision.

Social Work Practice in Health Melissa Petrakis, 2020-07-16 Health services practice or working with clients facing health issues requires diverse approaches and wide-ranging knowledge. In this ground-breaking book Melissa Petrakis draws on the experience and expertise of leading researchers and practitioners to provide a guide to the disparate settings in which social workers are engaged and the conceptual frameworks and skills needed for effective practice. The book begins by examining the nature of health social work and considers its core values and principles. This section also provides an overview of the social determinants of health. Part 2 explores key areas of practice including working with children, mothers and families, hospital-based social work, domestic and family violence, mental health, dual diagnosis, forensic social work, Indigenous approaches to health, oncology and aged care. Part 3 looks at politicised issues in the field including working with people living with disability, refugee health and concludes by considering how a focus on well-being informed by Maori approaches could provide new insights into better practice. Underpinning the book throughout is a clear guide to assessment procedures, case management, strengths-based practices and developing effective partnerships and collaboration. *Social Work Practice in Health* is destined to become a key reference tool for social work students and practitioners, providing practical, evidence-based and insightful approaches.

Health Services Assistance Kathryn Austin, 2020-06-18 Achieve high standards in patient-focused care. *Health Services Assistance* provides complete coverage of core and elective units for assisting in nursing work in acute care. Exercises throughout the text provide students with the means to self-assess and extend their skills and knowledge. Foundation skills are developed early, underpinning understanding of the specialist acute care chapters that follow. Students are encouraged

to reflect and contextualise their learning and to practise techniques in small groups. Activities break up the material so information is easier to retain. Self-check, extension activities and discussion questions can be incorporated into an institution's assessment strategy. Health Services Assistance is structured by competency for HLT33115 Certificate III in Health Services Assistance, supporting nursing in acute care, and is packed with specific cases and examples, as well as including additional content on palliative care and mental health. Each chapter addresses a competency, with a volume of learning that underpins the assessment requirements. The book is structured so that elements and criteria are communicated by the section headings. Teach following the qualification structure, using the print book, eBook or LMS integration.

Kaplan and Sadock's Comprehensive Textbook of Psychiatry Benjamin J. Sadock, Virginia A. Sadock, Pedro Ruiz, 2017-05-11 50th Anniversary Edition The cornerstone text in the field for 50 years, Kaplan & Sadock's Comprehensive Textbook of Psychiatry has consistently kept pace with the rapid growth of research and knowledge in neural science, as well as biological and psychological science. This two-volume Tenth Edition shares the expertise of over 600 renowned contributors who cover the full range of psychiatry and mental health, including neural science, genetics, neuropsychiatry, psychopharmacology, and other key areas. It remains the gold standard of reference for all those who work with the mentally ill, including psychiatrists and other physicians, psychologists, psychiatric social workers, psychiatric nurses, and other mental health professionals.

Social Research and Disability Ciaran Burke, Bronagh Byrne, 2020-12-29 Social Research and Disability argues that the contemporary rules of sociological methods outlined in numerous research methods texts make a number of assumptions concerning the researcher including ambulence, sight, hearing and speech. In short, the disabled researcher is not considered when outlining the requirements of particular methods. Drawing upon these considerations, the volume emphasizes how disabled researchers negotiate the empirical process, in light of disability, whilst retaining the scientific rigour of the method. It also considers the negative consequences arising from disabled researchers' attempts at passing and the benefits that can emerge from a reflexive approach to method. This innovative and original text will, for the first time, bring together research-active academics, who identify as being disabled, to consider experiences of being disabled within a largely ableist academy, as well as strategies employed and issues faced when conducting empirical research. The driving force of this volume is to provide the blueprints for bringing how we conduct social research to the same standards and vision as how the social world is understood: multi-faceted and intersectional. To this end, this edited collection advocates for a sociological future that values the presence of disabled researchers and normalises research methods that are inclusive and accessible. The interdisciplinary focus of Social Research and Disability offers a uniquely broad primary market. This volume will be of interest not only to the student market, but also to established academics within the social sciences.

Patient-Perspective Care Timothy A. Carey,2017-11-30 Inappropriate health care is an escalating and expensive problem. It affects high income, middle income, and low income countries and wastes billions of dollars annually as well as harming individuals and communities. Inappropriate care refers to both the overuse and underuse of tests and treatments and, ironically, can occur concurrently within the same health system. Even though patient-centred care is still the prevailing ethos, specifying where patients should be situated geographically has not required health professionals to consider the preferences, values, and priorities of patients when making treatment decisions. Patient-perspective care demands that the decisions health professionals make are in the service of patient's goals. Health care, ultimately, is helping individuals to live the lives they would wish for themselves. In order to meet this imperative, health professionals must work towards understanding what their patients would like to achieve through their engagement with health services. This book details the extent and scope of inappropriate care and how we have arrived in this position. The necessity for patient-perspective care is outlined and provides a theoretical framework that explains why patient-perspective care is so critical. The implications of this theory are then explored and specific strategies for moving towards a patient-perspective approach are discussed. This book is entirely original and describes a novel, fresh approach to delivering health services. Many long-standing and expensive problems such as missed appointments will disappear and patients will be more satisfied with the treatments they receive. Health services generally will be more efficient and effective leading to more sustainable and affordable health care.
