Buildings for Education Stefano Della Torre, Massimiliano Bocciarelli, Laura Daglio, Raffaella Neri, 2019-12-30 This open access book presents theoretical and practical research relating to the vast, publicly financed program for the construction of new schools and the reorganization of existing educational buildings in Italy. This transformative process aims to give old buildings a fresh identity, to ensure that facilities are compliant with the new educational and teaching models, and to improve both energy efficiency and structural safety with respect to seismic activity. The book is divided into three sections, the first of which focuses on the social role of the school as a civic building that can serve the needs of the community. Innovations in both design and construction processes are then analyzed, paying special attention to the Building Information Modeling (BIM) strategy as a tool for the integration of different disciplines. The final section is devoted to the built heritage and tools, technologies, and approaches for the upgrading of existing buildings so that they meet the new regulations on building performance. The book will be of interest to all who wish to learn about the latest insights into the challenges posed by, and the opportunities afforded by, a comprehensive school building and renovation program.

Deconstructing the Model in 20th and 21st-Century Italian Experimental Writings Beppe Cavatorta, 2019-08-19 Through a series of original analyses of experimental works that exist well outside of the established territory inhabited by the Italian literary canon, or which purposely position themselves at its margins, this volume proposes a new way to understand the goals of literary experimentation as a means to break the canon and give literature the same freedom that is easily granted to other arts. This serves to allow literature itself to intersect with those other art forms, while enhancing the

powerful and positive outcomes of literary experimentation. Specifically, the volume explores a series of 20th- and 21st-century Italian works that are characterized by a non-normative approach to language or the act of writing itself. The contributors, while addressing diverse writers, and often even adopting different theoretical interpretations of experimentalism itself, all analyze the intersection between experimental literatures and other art forms, as well as cross-disciplinary and non-traditional approaches to the theme of experimentation.
