**Biodiversity, Ecosystems, and Conservation in Northern Mexico** Jean-Luc E. Cartron,Gerardo Ceballos,Richard Stephen Felger,2005-08-25 This book describes the biodiversity and biogeography of northern Mexico, documents the biological importance of regional ecosystems and the impacts of human land use on the conservation status of plants and wildlife. It should become the standard source document for the conservation status of species and ecosystems in this region, which is of unusual biological interest because of its high biodiversity and highly varied landscape and biological zonation.

*Mammals of Mexico* Gerardo Ceballos,2014-01-15 The most comprehensive reference on Mexico's diverse mammalian

fauna. *Mammals of Mexico* is the first reference book in English on the more than 500 types of mammal species found in the diverse Mexican habitats, which range from the Sonoran Desert to the Chiapas cloud forests. The authoritative species accounts are written by a Who's Who of experts compiled by famed mammalogist and conservationist Gerardo Ceballos. Ten years in the making, *Mammals of Mexico* covers everything from obscure rodents to whales, bats, primates, and wolves. It is thoroughly illustrated with color photographs and meticulous artistic renderings, as well as range maps for each species. Introductory chapters discuss biogeography, conservation, and evolution. The final section of the book illustrates the skulls, jaws, and tracks of Mexico's mammals. This unparalleled collection of scientific information on, and photographs of, Mexican wildlife belongs on the shelf of every mammalogist, in public and academic libraries, and in the hands of anyone curious about Mexico and its wildlife.

**Tapirs** Daniel M. Brooks, Richard E. Bodmer, Sharon Matola, 1997 Descended from a long and ancient lineage, tapirs are important tropical forest seed dispersers. However, today, all species of tapirs are threatened to various degrees by habitat destruction and hunting. This action plan was written with wildlife biologists, ecologists, administrators, educators and local conservation officials in mind and is aimed at those countries with tapir populations. It provides a brief natural history of each species and its objective is to aid in their conservation by catalyzing conservation action. In addition, it is hoped that the contents of the plan will stimulate further research into this fascinating group of animals.

La seguridad nacional de México José Luis Vergara Ibarra, 2018-06-05 El propósito general de este volumen es identificar los factores, económico, militar, político y social, tradicionales para medir la seguridad nacional en México, y sumarles los factores de género, societal, humano y ambiental, para conformar un modelo ampliado de medición de la seguridad nacional. En el aspecto metodológico, la investigación se valió de un sistema teórico matemático que facilitó la construcción y evaluación de una red de influencia de fuerzas causales, útil en la solución de problemas complejos, como determinar el Índice de Seguridad Nacional de México (ISNM). Dicha red está conformada por un nodo raíz de 25 nodos internos, 138 nodos iniciales y 163 enlaces. Para asignar la fuerza a los enlaces de los nodos de la red el autor aplicó encuestas a expertos en cada uno de los rubros específicos que implica la seguridad nacional en el modelo ampliado, y para asignar los valores de creencia a los nodos iniciales empleó datos estadísticos nacionales e internacionales. Esta evaluación reduce la especulación y da sustento a los datos duros, tomados de los años 2012 a 2016, conforme se tuvo acceso a ellos. La evaluación de la red permitió llegar a dos resultados principales: que el ISNM es una herramienta esencial para determinar áreas que requieren atención prioritaria, e identificar las variables que más influyeron en el valor del ISNM. El volumen ofrece datos fundamentales para futuras investigaciones en el campo de la seguridad nacional.
