**M.A.K. Halliday, Ruqaiya Hasan**

**Cohesion in English** M.A.K. Halliday, Ruqaiya Hasan, 2014-01-14 Cohesion in English is concerned with a relatively neglected part of the linguistic system: its resources for text construction, the range of meanings that are specifically associated with relating what is being spoken or written to its semantic environment. A principal component of these resources is 'cohesion'. This book studies the cohesion that arises from semantic relations between sentences. Reference from one to the other, repetition of word meanings, the conjunctive force of but, so, then and the like are considered. Further, it describes a method for analysing and coding sentences, which is applied to specimen texts.

**The Oxford Dictionary of English Grammar** Sylvia Chalker, E. S. C. Weiner, 1998 English grammar has changed a great deal since the beginning of the Twentieth Century, and it is a subject that can provide a complex minefield of uncertainties within the language. This accessible and comprehensive dictionary comes to the aid of both the general reader and the student or teacher, offering straightforward and immediate A-Z access to 1,000 grammatical terms and their meanings. All the currently accepted terms of grammar are included, as well as older, traditional names, controversial new coinages, and items from the study of other languages. Concise definitions of the wider subject of linguistics, including phonetics and transformational grammar, are accompanied by examples of language in use, and frequent quotations from existing works on grammar.

*Thinking Sociolinguistically* Paul McPherron, Trudy Smoke, 2018-12-06 This is a practical guide to planning, conducting and presenting a sociolinguistic research project. Written in an accessible and engaging style, the book begins with a brief review of what sociolinguists study and how they study it, before guiding students step-by-step through the research process. It presents a range of qualitative and quantitative data collection and analysis methods, including surveys, interviews and corpora, supported by examples from both published researchers and student projects. Drawing on the experiences of their own students, the authors provide supportive guidance on common areas of difficulty, such as framing questions, selecting participants and interpreting data. The final part shows you how to organise and write up your findings. Chapters are further enriched with hands-on activities and discussion questions. This is an essential companion for budding sociolinguistic researchers with a desire to understand the linguistic landscapes around them and communicate their findings to others.

*The Oxford Dictionary of English Grammar* Bas Aarts, Sylvia Chalker, Edmund Weiner, 2014-01-16 The Oxford Dictionary

of English Grammar is a straightforward and accessible A-Z guide to the diverse and often complex terminology of English grammar. It contains over 1,600 entries with clear and concise definitions, enhanced by numerous example sentences, as well as relevant quotations from the scholarly literature of the field. This second edition is written and edited by Professor Bas Aarts of University College London, writer of the acclaimed Oxford Modern English Grammar. It has been fully revised and updated, with particular attention paid to refreshing the example sentences included within the text. There are over 150 new entries that cover current terminology which has arisen since the publication of the first edition, and there are also new entries on the most important English grammars published since the start of the 20th century. Hundreds of new cross-references enhance the user-friendly nature of the text, and the list of works cited has been thoroughly updated to reflect the current state of the field. A short appendix of web links has been added. All in all, this Dictionary is an invaluable guide to English grammar for all students and teachers of the subject, as well as all those with an informed interest in the English language.

**Machine Learning of Natural Language** David M.W. Powers, Christopher C.R. Turk, 2012-12-06 We met because we both share the same views of language. Language is a living organism, produced by neural mechanisms relating in large numbers as a society. Language exists between minds, as a way of communicating between them, not as an autonomous process. The logical 'rules' seem to us an epiphenomena of the neural mechanism, rather than an essential component in language. This view of language has been advocated by an increasing number of workers, as the view that language is simply a collection of logical rules has had less and less success. People like Yorick Wilks have been able to show in paper after paper that almost any rule which can be devised can be shown to have exceptions. The meaning does not lie in the rules. David Powers is a teacher of computer science. Christopher Turk, like many workers who have come into the field of AI (Artificial Intelligence) was originally trained in literature. He moved into linguistics, and then into computational linguistics. In 1983 he took a sabbatical in Roger Shank's AI project in the Computer Science Department at Yale University. Like an earlier visitor to the project, John Searle from California, Christopher Turk was increasingly uneasy at the view of language which was used at Yale.

Linguistics and the New Testament Stanley E. Porter, D.A. Carson, 1999-07-01 This volume continues the major work published by the JSNT Supplement Series in the area of Greek linguistics of the New Testament, and explores what the editors believe are crucial phases in the application of linguistics to New Testament Greek. The first half of the volume includes essays on such topics as linguistics and literary criticism, linguistics and historical criticism, and linguistics and rhetoric. The second half includes essays dealing with the relations and uses of individual words, but ranges from oral

composition to the value of word frequency in determining authorship. Some of these essays review established models of research; others propose new models and criteria of linguistic analysis.

*English Synonyms and Antonyms* J.C. Fernald, 1897 Designed As a Companion for the Study and As a Text-Book for the Use of Schools. Twenty-Ninth Edition

Perfect Compositions Tamara Piankova, 2013-01-01 The unique points of the book are (1) all aspects of writing guidance combined in one volume provided with cross-references, (2) clear presentation, and (3) abundant practice exercises. The appendices include Peer Review Forms and Criteria for Assessment developed specifically to fit the Guidelines on each particular written task. The students who have worked through this course have received sound linguistic training and feel confident about writing various composition types.

**English Language** Jonathan Culpeper, Paul Kerswill, Ruth Wodak, Anthony McEnery, Francis Katamba, 2018-01-16 The second edition of this hugely successful textbook provides comprehensive coverage of a wide range of topics in theoretical and applied linguistics. Written by leading academics in the field, this text offers a firm grounding in linguistics and includes engaging insights into current research. It covers all the key areas of linguistic analysis, including phonetics, morphology, semantics and pragmatics, and core domains of study, comprising the history of the English language, regional and social variation, style and communication and interaction. Fresh material on research methods outlines key areas for consideration when carrying out a research project, and provides students with the framework they need to investigate linguistic phenomena for themselves. This is an invaluable resource for both undergraduate and postgraduate students on English language and linguistics degree programmes. New to this Edition: - Seven new chapters covering topics such as second language acquisition, corpus linguistics and research methods - A number of chapters have been substantially revised, including those on World Englishes, Literacies in Cyberspace and TEFL, TESOL and Linguistics - Fully updated throughout to reflect the latest advances in the field

*Lexical Priming* Michael Hoey, 2012-10-12 Lexical Priming proposes a radical new theory of the lexicon, which amounts to a completely new theory of language based on how words are used in the real world. Here they are not confined to the definitions given to them in dictionaries but instead interact with other words in common patterns of use. Using concrete statistical evidence from a corpus of newspaper English, but also referring to travel writing and literary text, the author argues that words are 'primed' for use through our experience with them, so that everything we know about a word is a product of our encounters with it. This knowledge explains how speakers of a language succeed in being fluent, creative and natural.

*Handbook of Natural Language Processing* Robert Dale, Hermann Moisl, Harold Somers, 2000-07-25 This study explores the design and application of natural language text-based processing systems, based on generative linguistics, empirical

copus analysis, and artificial neural networks. It emphasizes the practical tools to accommodate the selected system.

A Method for Linguistic Metaphor Identification Gerard J. Steen, Aletta G. Dorst, J. Berenike Herrmann, Anna Kaal, Tina Krennmayr, Trijntje Pasma, 2010-06-23 This book presents a complete method for the identification of metaphor in language at the level of word use. It is based on extensive methodological and empirical corpus-linguistic research in two languages, English and Dutch. The method is formulated as an explicit manual of instructions covering one chapter, the method being a development and refinement of the popular MIP procedure presented by the Pragglejaz Group in 2007. The extended version is called MIPVU, as it was developed at VU University Amsterdam. Its application is demonstrated in five case studies addressing metaphor in English news texts, conversations, fiction, and academic texts, and Dutch news texts and conversations. Two methodological chapters follow reporting a series of successful reliability tests and a series of post hoc troubleshooting exercises. The final chapter presents a first empirical analysis of the findings, and shows what this type of methodological attention can mean for research and theory.

**Comprehending Sentences: A Comprehensive Guide** Genalin Jimenez, A sentence is the largest independent unit of grammar: it begins with a capital letter and ends with a period, question mark, or exclamation point. The word sentence is from the Latin *for to feel*. The adjective form of the word is *sentential*. The sentence is traditionally (and inadequately) defined as a word or group of words that expresses a complete idea and that includes a subject and a verb. More to learn inside this little volume. Language Practices Among Children and Youth in Indonesia Bernadette Kushartanti, Dwi Noverini Djenar, 2023-10-11 This open access book presents studies of language use in Indonesia, focusing on children and youth. It reports on developments in the use of language for narrative production and within the realm of popular culture and traditional cultural practices in Indonesia. Through studies that include cohesion in narrative production, language in radio advertising, naming

practices and formulaic prohibitions in Javanese, and speech presentation in popular fiction, the book provides insights into how sociocultural changes are reflected in language. This book is a useful resource for students and scholars conducting research on language and cultural practices in Indonesia, particularly in relation to children and young people.

*Cycle Of Discourse* Tantri R. Indhiarti, M.A.; Eni Maharsi, M.A., 2022-12-02 Furthermore, in this book, discourse analysis is treated as a rigorous way in texts that are organised as a series of overviews of the research topics such as narrative media discourse, gender and discourse, and institutional discourse throughout the social sciences. As seen in the book, the writers set out to answer many kinds of questions about language and about culture and society. It is performed by paying systematic attention to particular contexts and particular sets of utterances. This will help alleviate a problem in teaching discourse analysis that of ending up with the students who are unable to perform analyses going much beyond paraphrasing.

**Lexical Cohesion and Corpus Linguistics** John Flowerdew, Michaela Mahlberg, 2009-01-14 Lexical cohesion is about meaning in text. It concerns the ways in which lexical items relate to each other and to other cohesive devices so that textual continuity is created. Traditionally, lexical cohesion (along with other types of cohesion) has been investigated in individual texts. With the advent of corpus techniques, however, there is potential to investigate lexical cohesion with reference to large corpora. This collection of papers illustrates a variety of corpus approaches to lexical cohesion. Contributions deal with lexical cohesion in relation to rhetorical structure, lexical bundles and discourse signalling, discourse intonation, semantic prosody, use of signalling nouns, and corpus linguistic theory. The volume also considers implications that innovative approaches to lexical cohesion can have for language teaching. This volume was originally published as a Special Issue of *International Journal of Corpus Linguistics* volume 11:3 (2006).

**Crew Cohesion, Wildland Fire Transition, and Fatalities** Jon J. Driessen, 2002 Describes the role played by crew cohesion in the deaths of firefighters in three firefighting tragedies: the Mann Gulch Fire, the South Canyon Fire, and the Thirtymile Fire. Two types of cohesion are involved, the cohesion within a crew (intracrew cohesion) and the cohesion among crews (intercrew cohesion). Cohesion is a way of describing how closely people feel they are tied to a group. Studies of field crews in the Forest Service have shown that the less cohesion crews had, the more likely they were to be involved in accidents. Meanwhile, studies of wildland firefighter fatalities during the 1990s have shown that nearly threefourths of the fatalities occurred when fires were making the transition from relatively small to relatively large fires, or shortly after they had become relatively large fires. The transition is often sudden, when it is described as a blow up. Driessen recommends studies that would allow the different types of transition fires to be classified. This classification system would allow crew leaders and fire managers to communicate clearly when fires are making the transition from relatively small fires to relatively large fires. The studies would also identify tactics that successful crew leaders use to build the essential level of crew cohesion when fires are in transition.
