The Diamond Lane Karen Karbo, 1993-04-01

Zev's Los Angeles Zev Yaroslavsky, 2023-05-30 A LA Times Bestseller "...[A] compelling history of our city's last half century, as conveyed through the life of one of our most impactful leaders. ..." — Los Angeles Mayor Karen Bass This is the story of Zev Yaroslavsky, the son of Ukrainian Jews who immigrated to the United States in the early 1920s. His memoir charts the journey of a young social activist who battled to free Soviet Jews before becoming one of the most consequential elected officials in Southern California. Fiercely independent, he combined an activist's passion with a seasoned politician's skill to challenge the region's power brokers. He fought the Los Angeles Police Department's excessive force and political spying policies, led the effort to ban local taxes from funding the 1984 Olympics, teamed with President Clinton to avert a catastrophic county bankruptcy, helped develop L.A.'s modern transit system, won a bruising battle with real estate interests to save the Santa Monica Mountains from rapacious development, and was pivotal in the development of Walt Disney Concert Hall and the modernization of the iconic Hollywood Bowl. "I may be part of the establishment," he said on the day he was first sworn into office, "but the establishment is not part of me."

Diffusion of Innovations, 4th Edition Everett M. Rogers, 2010-07-06 Since the first edition of this landmark book was published in 1962, Everett Rogers's name has become virtually synonymous with the study of diffusion of innovations, according to Choice. The second and third editions of *Diffusion of Innovations* became the standard textbook and reference on diffusion studies. Now, in the fourth edition, Rogers presents the culmination of more than thirty years of research that will set a new standard for analysis and inquiry. The fourth edition is (1) a revision of the theoretical framework and the research evidence supporting this model of diffusion, and (2) a new intellectual venture, in that new concepts and new theoretical viewpoints are introduced. This edition differs from its predecessors in that it takes a much more critical stance in its review and synthesis of 5,000 diffusion publications. During the past thirty years or so, diffusion research has grown to be widely recognized, applied and admired, but it has also been subjected to both constructive and destructive criticism. This criticism is due in large part to the stereotyped and limited ways in which many diffusion scholars have defined the scope and method of their field of study. Rogers analyzes the limitations of previous diffusion studies, showing, for example, that the

convergence model, by which participants create and share information to reach a mutual understanding, more accurately describes diffusion in most cases than the linear model. Rogers provides an entirely new set of case examples, from the Balinese Water Temple to Nintendo videogames, that beautifully illustrate his expansive research, as well as a completely revised bibliography covering all relevant diffusion scholarship in the past decade. Most important, he discusses recent research and current topics, including social marketing, forecasting the rate of adoption, technology transfer, and more. This all-inclusive work will be essential reading for scholars and students in the fields of communications, marketing, geography, economic development, political science, sociology, and other related fields for generations to come.

Hidden History of Transportation in Los Angeles Charles P. Hobbs, 2014-11-04 Los Angeles transportation's epic scale--its iconic freeways, Union Station, Los Angeles International Airport and the giant ports of its shores--has obscured many offbeat transit stories of moxie and eccentricity. Triumphs such as the Vincent Thomas Bridge and Mac Barnes's Ground Link buspool have existed alongside such flops as the Santa Monica Freeway Diamond Lane and the Oxnard-Los Angeles Caltrain commuter rail. The City of Angels lacks a propeller-driven monorail and a freeway in the paved bed of the Los Angeles River, but not for a lack of public promoters. Horace Dobbins built the elevated California Cycleway in Pasadena, and Mike Kadletz deployed the Pink Buses for Orange County kids hitchhiking to the beach. Join Charles P. Hobbs as he recalls these and other lost episodes of LA-area transportation lore.

Diffusion of Innovations, 5th Edition Everett M. Rogers, 2003-08-16 Now in its fifth edition, *Diffusion of Innovations* is a classic work on the spread of new ideas. In this renowned book, Everett M. Rogers, professor and chair of the Department of Communication & Journalism at the University of New Mexico, explains how new ideas spread via communication channels over time. Such innovations are initially perceived as uncertain and even risky. To overcome this uncertainty, most people seek out others like themselves who have already adopted the new idea. Thus the diffusion process consists of a few individuals who first adopt an innovation, then spread the word among their circle of acquaintances—a process which typically takes months or years. But there are exceptions: use of the Internet in the 1990s, for example, may have spread more rapidly than any other innovation in the history of humankind. Furthermore, the Internet is changing the very nature of diffusion by decreasing the importance of physical distance between people. The fifth edition addresses the spread of the Internet, and how it has transformed the way human beings communicate and adopt new ideas.

Freewaytopia: How Freeways Shaped Los Angeles Paul Haddad, 2021-10-05 Freewaytopia: How Freeways Shaped Los Angeles explores how social, economic, political, and cultural demands created the web of expressways whose very form—futuristic, majestic, and progressive—perfectly exemplifies the City of Angels. From the Arroyo Seco, which began construction during the Great Depression, to the Simi Valley and Century Freeways, which were completed in 1993, author Paul Haddad provides an entertaining and engaging history of the 527 miles of road that comprise the Los Angeles freeway system. Each of Los Angeles's twelve freeways receives its own chapter, and these are supplemented by "Off-Ramps"—sidebars that dish out pithy factoids about Botts' Dots, SigAlerts, and all matter of freeway lexicon, such as why Southern Californians are the only people in the country who place the word "the" in front of their interstates, as in "the 5," or "the 101." Freewaytopia also explores those routes that never saw the light of day. Imagine superhighways burrowing through Laurel Canyon, tunneling under the Hollywood Sign, or spanning the waters of Santa Monica Bay. With a few more legislative strokes of the pen, you wouldn't have to imagine them—they'd already exist. Haddad notably gives voice to those individuals whose lives were inextricably connected—for better or worse—to the city's freeways: The hundreds of thousands of mostly minority and lower-class residents who protested against their displacement as a result of eminent domain. Women engineers who excelled in a man's field. Elected officials who helped further freeways . . . or stop them dead in their tracks. And he pays tribute to the corps of civic and state highway employees whose collective vision, expertise, and dedication created not just the most famous freeway network in the world, but feats of engineering that, at their best, achieve architectural poetry. Finally, let's not forget the beauty queens—no freeway in Los Angeles ever opened without their royal presence.
