An Intense Calling Jesse Bazzul, 2023-02-27 Positing that education is a movement from one way of being to another, more desirable one, *An Intense Calling* argues that ethics should be the prime focus for the field of education. The book locates ethics, education, and justice in human subjectivity and describes education as a necessary practice for ethical reflexivity, change, and becoming (ethically) different. It also situates ethics as something that exceeds subjectivity, thereby engaging ethics as a material phenomenon through topics such as aesthetics and solidarity with non-humans. Jesse Bazzul explores various concepts in the book including power, biopolitics, the commons, subjectivity, and materiality, and draws from over twenty years of experience teaching in different countries including Canada, Ireland, the United States, China, and Ukraine. Taking a wide-ranging philosophical approach, the book entangles ethics, urgent political issues, and pressing educational contexts of the twenty-first century. In doing so, *An Intense Calling* maintains that ethics is the core of education because education involves finding better ways of living and being in the world.

*Bloggging America* Aaron Barlow, 2007-11-30 As blogs have evolved over the last few years, they have begun to take on distinct characteristics depending on audience and purpose. Though political blogs remain the most high profile (and most read), other types of blogs are gaining in strength and visibility. This book—a follow-up volume to Barlow's *Rise of the Blogosphere*, which examined the historical context for the modern blog—provides an examination of the many current aspects of the blogosphere, from the political to the professional to the personal, with many stops in between. Given that millions of blogs have been created over the past five years and yet more come online at an undiminished rate, and given that enthusiasm for both reading them and writing them has yet to wane, it is likely that the blog explosion will continue indefinitely. context for the modern blog—provides an examination of the many current aspects of the blogosphere, from the political to the professional to the personal, with many stops in between. Areas covered include the personal blog; the political blog; the use of blogs by various religious communities both for discussion within communities and for outreach; the growth of blogs dedicated to specific geographic communities, and their relations with older local media; blogs dedicated to technical subjects, particularly relating to computers; blogs and business; blogs sparked by video games, movies, music, and other forms of entertainment; and more. **Paid Patriotism?** James T. Bennett, 2017-04-14 What does a nation owe its military veterans? Gratitude, esteem, land grants, medical care, pensions, higher education? Or is serving in the armed forces of one's country an obligation to be undertaken without any expectation of compensation? If veterans are to receive government aid, should a distinction be made between those who served in wartime or faced enemy fire and those who saw neither war nor combat? These questions have been answered in varying ways by the American people and their elected representatives since the Revolutionary War. *Paid Patriotism?* explores the genesis and growth of soldiers' pensions throughout the nineteenth century, the Bonus experiment after the First World War, the passage and consequences of the GI Bill of Rights, the growth of the nation's system of veterans' hospitals, the evolution of veterans' programs during the Cold War and Vietnam, the post-9/11 GI Bill, and contemporary scandals and reform efforts within the veterans' bureaucracy, from its promotion to a cabinet department to wrongdoing in the Veterans Health Administration. James T. Bennett examines the complex and politically charged history and heated present-day debate of what the late columnist William Safire called the "most sacred cow" in Washington: the veterans' bureaucracy. In the end, the United States and its citizens owe veterans a debt. But how has and how should that debt be honored—and at what cost?

**Original Knowing** J. Bradley Wigger, 2012-10-17 Did Lucy know God? Could Neanderthals talk? Was Ardi self-conscious? These are the strange new breed of questions emerging as we discover more and more about our prehistoric origins--questions about knowing. While fossil digs and carbon dating tell a remarkable story about the bones and times of our ancient ancestors, we cannot help wondering what they knew, and when. Exploring such questions *Original Knowing* takes contemporary science as seriously as religious tradition and searches for the story behind this odd creature who senses more to the universe than meets the eye. In limestone bluffs and butterfly migrations, from Stone Age tool-making to Sumerian beer-making, clues are sought to better understand this strange mind that ponders the origins of its own existence. When do babies point, and why does it matter? What does throwing a Frisbee reveal about our distant ancestors? Is language the key to our minds as many believe? Or perhaps the heart of knowing rests in something more basic, in a smile, and the

powerful social abilities at work allowing us to sense a depth to life--to our own lives--a depth that our minds help us glimpse if only through a glass darkly.

*Food Policy in the United States* Parke Wilde, 2013 This book offers a broad introduction to food policies in the United States. Real-world controversies and debates motivate the book's attention to economic principles, policy analysis, nutrition science and contemporary data sources. It assumes that the reader's concern is not just the economic interests of farmers, but also includes nutrition, sustainable agriculture, the environment and food security. The book's goal is to make US food policy more comprehensible to those inside and outside the agri-food sector whose interests and aspirations have been ignored. The chapters cover US agriculture, food production and the environment, international agricultural trade, food and beverage manufacturing, food retail and restaurants, food safety, dietary guidance, food labeling, advertising and federal food assistance programs for the poor. The author is an agricultural economist with many years of experience in the non-profit advocacy sector, the US Department of Agriculture and as a professor at Tufts University. The author's well-known blog on US food policy provides a forum for discussion and debate of the issues set out in the book.

**Timelines of American Literature** Cody Marrs, Christopher Hager, 2019-01-29 A collection of engaging essays that seeks to uniquely reperiodize American literature. It is all but inevitable for literary history to be divided into periods. Early American, antebellum, modern, post-1945—such designations organize our knowledge of the past and shape the ways we discuss that past today. These periods tend to align with the watershed moments in American history, even as the field has shifted its perspective away from the nation-state. It is high time we rethink these defining periods of American literary history, as the drawing of literary timelines is a necessary—even illuminating—practice. In these short, spirited, and imaginative essays, 23 leading Americanists gamely fashion new, unorthodox literary periods—from 600 B.C.E. to the present, from the Age of Van Buren to the Age of Microeconomics. They bring to light literary and cultural histories that have been obscured by traditional timelines and raise provocative questions. What is our definition of modernism if we imagine it stretching from 1865 to 1965 instead of 1890 to 1945? How does the captivity narrative change when we consider it as a contemporary, not just a colonial, genre? What does the course of American literature look like set against the backdrop of federal denials of Native sovereignty or housing policies that exacerbated segregation? Filled with challenges to scholars, inspirations for teachers (anchored by an appendix of syllabi), and entry points for students, *Timelines of American Literature* gathers some of the most exciting new work in the field to showcase the revelatory potential of fresh thinking about how we organize the literary past.

Public Health Behind Bars Robert B. Greifinger, 2021-10-25 *Public Health Behind Bars From Prisons to Communities* examines the burden of illness in the growing prison population, and analyzes the impact on public health as prisoners are released. This book makes a timely case for correctional health care that is humane for those incarcerated and beneficial to the communities they reenter.

American Sports Murry R. Nelson, 2013-05-23 America loves sports. This book examines and details the proof of this fascination seen throughout American society—in our literature, film, and music; our clothing and food; and the iconography of the nation. This momentous four-volume work examines and details the cultural aspects of sport and how sport pervasively reflects—and affects—myriad aspects of American society from the early 1900s to the present day. Written in a straightforward, readable manner, the entries cover both historical and contemporary aspects of sport and American culture. Unlike purely historical encyclopedias on sports, the contributions within these volumes cover related subject matter such as

poetry, novels, music, films, plays, television shows, art and artists, mythologies, artifacts, and people. While this encyclopedia set is ideal for general readers who need information on the diverse aspects of sport in American culture for research purposes or are merely reading for enjoyment, the detailed nature of the entries will also prove useful as an initial source for scholars of sport and American culture. Each entry provides a number of both print and online resources for further investigation of the topic.

**Big Media, Big Money** Ronald V. Bettig, Jeanne Lynn Hall, 2012-05-04 *Big Media, Big Money* is a lively and scathing critique of the contemporary communications industry, examining how media ownership and the profit-making motive affect the messages we receive in alarming ways. Through close readings of recent news events and critical examination of corporate influence, Bettig and Hall conclude that current interconnections among media, big business, government, and education pose a serious threat to democratic communications. The second edition includes three new chapters, covering the contemporary Hollywood film industry; the changing landscape of the music industry; and “ad creep,” the proliferation of advertising into previously ad-free venues such as schools and children’s television programming.

**Leadership in Healthcare: Essential Values and Skills, Fourth Edition** Carson F. Dye also offers guidance for assessing team values and effectiveness at all career stages. The book is divided into five parts: Leadership in Healthcare, Personal Values, Team Values, Evaluation, and Additional Perspectives on Leadership. New content includes chapters on inclusivity, the role of physicians, and the role of leaders in supporting workers. In addition, a new chapter looks at the impact of the COVID-19 pandemic on leadership and the special challenges healthcare leaders have faced—and continue to face—in a very different healthcare environment. The book's special features include opening vignettes reflecting on workplace situations; sidebars, cases, and exercises to support discussions and stimulate reader response; and additional readings that provide an expanded understanding of chapter content. In addition, the book's appendices share tools for evaluating leaders and teams and driving self evaluation.

Subdivided Jay Pitter, John Lorinc, 2016-05-23 Using Toronto as a case study, *Subdivided* asks how cities would function if decision-makers genuinely accounted for race, ethnicity, and class when confronting issues such as housing, policing, labor markets, and public space. With essays contributed by an array of city-builders, it proposes solutions for fully inclusive communities that respond to the complexities of a global city. Jay Pitter is a writer and professor based in Toronto. She holds a Masters in Environmental Studies from York University. John Lorinc is a Toronto-based journalist who writes about urban affairs, politics, and business. He co-edited *The Ward: The Life and Loss of Toronto's First Immigrant Neighbourhood* (Coach House, 2015).

*Handbook of Research in Education Finance and Policy* Helen F. Ladd, Edward B. Fiske, 2012-08-21 Sponsored by the Association for Education Finance and Policy (AEFP), this groundbreaking new handbook assembles in one place the existing research-based knowledge in education finance and policy, thereby helping to define this evolving field of research and practice. It provides a readily available resource for anyone seriously involved in education finance and policy in the United States and around the world. The Handbook traces the evolution of the field from its initial focus on school inputs and the revenue sources used to finance these inputs to a focus on educational outcomes and the larger policies used to achieve them. It shows how the current decision-making context in school finance inevitably interacts with those of governance, accountability, equity, privatization, and other areas of education policy. Because a full understanding of the important contemporary issues requires input from a variety of perspectives, the Handbook draws on contributors from a variety of disciplines. While many of the chapters cover complex state-of-the-art empirical research, the authors explain key concepts in language that non-specialists can understand.
