The MassGeneral Hospital for Children Handbook of Pediatric Global Health Nupur Gupta, Brett D. Nelson, Jennifer Kasper, Patricia L. Hibberd, 2013-10-18 The MassGeneral Hospital for Children Handbook of Pediatric Global Health is a concise resource for the ever-increasing number of health professionals involved in global health, many of whom spend a few weeks to months or even years providing medical care in resource-poor countries. This Handbook provides practical, evidence-based, hands-on guidance for managing and preventing childhood illnesses when resources are limited in low- and middle-income countries. It also offers a setting-specific understanding and management approaches to the major causes of childhood mortality, including pneumonia, diarrhea, birth asphyxia, complications of preterm birth, and neonatal sepsis. The Handbook provides an overview of childhood mortality, health systems, and the various stakeholders that play a role in the global health arena, and also contains chapters focusing on adolescents who are increasingly recognized as a unique population in whom interventions can go a long way in both consolidating the gains made in childhood and preventing adult disease. Finally, key topics in non-communicable diseases are covered, including trauma and injuries, pediatric mental health, child and adolescent rights, and oral health. Not meant solely for pediatricians, the Handbook is designed for generalists, specialists, doctors, nurses, other health care workers, and those in training. An indispensable reference for health professionals overseas, the Handbook will also be a useful addition and resource for academic centers and universities in industrialized nations that are creating courses for trainees who will do clinical electives abroad during their training.

The COVID-19 - Health Systems Nexus Lazarus Chapungu, David Chikodzi, Kaitano Dube, 2023-01-12 This contributed

volume, based on papers presented at a conference held in Zimbabwe in mid-2021, examines the nexus between Zimbabwe's health systems and the COVID-19 pandemic. The collection of papers contained here is diverse and covers topics from how health systems handled (or didn't handle) surges to health communication during a global pandemic to economic and environmental impacts of the pandemic in Zimbabwe. Editors Drs. Edward Kunonga, Lazarus Chapungu, and David Chikodzi set the stage for these pieces with an introductory chapter that describes the health systems in Zimbabwe and offers an overview of the effects of the pandemic felt in the country. Their concluding chapter synthesizes trends and issues emerging from the chapters and recommends policy directions regarding health management systems in Zimbabwe and elsewhere in the face of this and future pandemics.

Book Alone Mary De Chesnay, Barbara Anderson, 2012 Within an expanding field of study in both undergraduate and graduate nursing curricula, this Third Edition explores vulnerability from the perspective of individuals, groups, communities, and populations while addressing how vulnerability affects nurses, nursing, and nursing care. This new edition presents a basic structure for caring for the vulnerable with the ultimate goal of providing culturally competent care. Theoretical and research chapters progress towards others offering meaningful learning experiences for both nursing students and practitioners. Further, since nurses are the crucial link between those who are vulnerable and those with access to solutions, this text provides ideas for how nurses might advocate for the vulnerable on a policy level. Written specifically for nurses by nurses, this Third Edition is a timely and necessary response to the culturally diverse, vulnerable populations for whom nurses must provide appropriate and precise care.

Health Systems Recovery in the Context of COVID-19 and Protracted Conflict Zsuzsanna Jakab, Sohel Saikat, Duncan Selbie, Saqif Mustafa, Yu Zhang, Geraldine McDarby, Mila Petrova, Redda Seifeldin, 2023-07-10 The COVID-19 pandemic has caused unprecedented disruption worldwide highlighting once again the interdependency of health and socioeconomic development, and the global lack of health systems resilience. Two years into the pandemic, most countries report sustained disruptions across service delivery platforms and health areas with a profound impact on health outcomes. The impact of these disruptions is magnified within marginalized communities and in countries experiencing protracted conflict. There is an urgent need to focus on recovery through investment in the essential public health functions (EPHFs) and the foundations of health systems with a focus on primary health care, and whole-of-government and -society engagement. The aim of this Research Topic is to gather, transfer and promote operationalization of key experiences from COVID-19 to inform global and country level recovery that better promote health; guide policy direction towards building health systems resilience; and thereby ensure economic and social prosperity. Experience with COVID-19 has demonstrated that traditional approaches to health system strengthening have failed to achieve the complementary goals of Universal Health Coverage (UHC) and health security with the divide between the most vulnerable and well-off only widening. Much of what had been learned from

previous experiences such as Ebola in West Africa has not been widely applied. This has left health and economic systems vulnerable to 21 st century public health challenges, ranging from conflict and natural disasters to aging demographics and rising rates of non-communicable and communicable diseases and antimicrobial resistance. These challenges require intentional focus and investment as well as whole-of-government and -society engagement with health to build health system resilience. Greater action is needed to prevent the devastating effects of war and conflict on the health of the most vulnerable. This Research Topic will convene the knowledge and practices of leaders in public health, health systems, and humanitarian and development sectors. This is to ensure lessons from COVID-19 inform the recovery agenda and promote sustainable health and socioeconomic recovery for all. Lest we forget and find ourselves again unprepared and vulnerable in the face of an even greater threat.

The Challenges of Democratic Governance in Nigeria's Fourth Republic Stanley Naribo Ngoa, Farooq A. Kperogi, Eghosa E. Osaghae, 2024-10-14 This book is a collection of scholarly essays from some of Nigeria's most notable social science scholars on the character, contours, and peculiarities of democratic practices in Nigeria's fourth attempt at constitutional rule after years of brutally absolutist military regimes. The Fourth Republic began in 1999 and continues to this day. It is coterminous with the restoration of constitutional rule after 16 years of sustained military rule, which represents the longest stretch of democratic self-rule since Nigeria won independence from British colonialism in 1960. The chapters in this book contain scholarly insights into the pitfalls of governance, institutional dysfunctions and foundational woes that continue to threaten the vitality of the Fourth Republic. Contributors to the book offer critical theoretical lenses to gaze at the decline in democratic citizenship, weakening of faith in the promises of democracy, loss of critical media engagement with the state, and deterioration of the socio-political fortunes of the state in Nigeria.

Social Work and the Grand Challenge to Eliminate Racism Martell L. Teasley, Michael S. Spencer, Melissa Bartholomew, 2023 In the current era, the ongoing challenge of race and ethnic relations and growing white supremacy reminds us that the centrality of racism needs considerable attention and has us profoundly questioning the structure and functioning of institutional practices. In *Social Work and the Grand Challenge of Ending Racism*, the authors argue that racism has been somewhat short shifted as an avenue of inquiry to help explain social problems and social welfare outcomes within the social work profession, and within the greater society. This book promotes innovative ways of preventing or interrupting racism and to stress the development and proliferation of antiracism practices as a method of reducing racialized outcomes in society.

Oxford Handbook of Humanitarian Medicine Amy Kravitz, 2019-02-07 The Oxford Handbook of Humanitarian Medicine is a practical guide covering all aspects of the provision of care in humanitarian situations and complex emergencies. It includes evidence-based clinical guidance, aimed specifically at resource limited situations, as well as essential non-clinical information relevant for people working in field operations and development. The handbook provides clear recommendations, from the experts, on the unique challenges faced by health providers in humanitarian settings including clinical presentations for which conventional medical training offers little preparation. It provides guidance for syndromic management approaches, and includes practical guidance on the integration of context specific mental health care. The handbook goes beyond the clinical domain, however, and also provides detailed information on the contextual issues involved in humanitarian operations, including health systems design, priorities in displacement, security and logistics. It outlines the underlying drivers at play in humanitarian settings, including economics, gender based inequities, and violence, guiding the reader through the epidemiological approaches in varied scenarios. It details the relevance of international law, and its

practical application in complex emergencies, and covers the changing picture of humanitarian operations, with increasingly complicated and chaotic contexts and the escalation of violence against humanitarian providers and facility. The Oxford Handbook of Humanitarian Medicine draws on the accumulated experience of humanitarian practitioners from a variety of disciplines and contexts to provide an easily accessible source of information to guide the reader through the complicated scenarios found in humanitarian settings.

Threat Modeling: Medical Cyber-Physical Systems In The Neonatal Intensive Care Unit Programs Dr. Gift T. Gaja, 2025-02-04 Threat modeling is a proactive approach to identifying and managing risks related to human behavior within

the workplace, especially in a diverse environment. It acknowledges that workplaces are made up of individuals from different cultural backgrounds, each with unique languages, symbols, and customs that represent valuable assets to the organization. However, potential triggers such as miscommunications or misunderstandings arising from differences in language, symbols, or cultural practices can lead to frustration or feelings of isolation. These challenges, if left unaddressed, may increase the risk of a loyal employee unintentionally or deliberately becoming an insider threat, which could harm the organization. In this book, the author explores how threat modeling can be used to protect an organization's assets by examining vulnerabilities in human behavior. By identifying and addressing these behavioral risks, the author offers practical strategies for applying threat modeling to manage workplace dynamics effectively. These efforts contribute to creating a more inclusive and secure work environment while fostering a positive organizational culture.

Key Element of This Book: Integration with Cybersecurity Frameworks: This book provides simple strategies to help you easily include human behavior analysis in your current security practices. Even in the face of artificial intelligence, by using techniques like understanding personality traits and observing actions, you can boost your organization's protection against threats.

Cybersociology and Cultural Considerations: Understand the impact of cultural nuances and behavioral patterns within diverse organizational settings. Adapt threat modeling techniques to align with the complexities of human asset management.

Who Should Read This Book: This book is for anyone looking to better understand and manage threats related to people in an organization. Cybersecurity professionals, human resources managers, risk analysts, and leaders will find valuable strategies for protecting against internal threats. It offers practical tools for addressing human-centric risks. In fact, threat modeling is something we all do in our everyday lives, whether we are cooking, walking the dog, driving. We instinctively assess potential threats and plan how to avoid them in all the activities around us. Regardless of profession, we all engage in threat modeling in our daily lives. This book applies that mindset to the workplace, helping everyone identify and manage risks tied to human behavior and organizational dynamics.

Dr. Gift Gaja is seasoned in generative AI applications, digital forensics, and human capital management, with over two decades of experience in engineering and workforce management. Specializing in cybersecurity, he advises global organizations on risk mitigation and strategic asset protection. Hochman, 2023-07-24 Few books have been published to assist local and visiting clinicians in addressing opportunities to expand surgical care in low- and middle-income countries. With contributions from international experts and surgical leaders, this book serves as a valuable resource for local and visiting faculty, trainees, and students in their endeavors to deliver surgical services in existing facilities as well as to develop new infrastructures for specialized surgical care. This book presents an anthology of important lessons gleaned from the experiences of participants

in selected academic global surgery centers and existing partnerships all over the world. Contributing authors summarize methods to build partnerships and expand capacity with a focus not only on how to, but also on what worked, what didn't work, and what could be done differently. They discuss specific examples ranging from implementing colon cancer screening to building a transplant program. In addition, several chapters describe approaches to diagnosis and management of specific surgical pathologies in limited resource environments as a complement to standard surgical texts in general surgery, thoracic surgery, neurosurgery, urology, obstetrics and gynecology, orthopedics, and surgery for contractures and burns. Practical and user-friendly, *Global Surgery* encapsulates the increasing enthusiasm of young faculty, trainees and medical students to improve access to surgical care in the world's low- and middle-income countries.

Health and Human Rights in a Changing World Michael Grodin, Daniel Tarantola, George Annas, Sofia Gruskin, 2013-07-04 *Health and Human Rights in a Changing World* is a comprehensive and contemporary collection of readings and original material examining health and human rights from a global perspective. Editors Grodin, Tarantola, Annas, and Gruskin are well-known for their previous two volumes (published by Routledge) on this increasingly important subject to the global community. The editors have contextualized each of the five sections with foundational essays; each reading concludes with discussion topics, questions, and suggested readings. This book also includes Points of View sections—originally written perspectives by important authors in the field. Section I is a Health and Human Rights Overview that lays out the essential knowledge base and provides the foundation for the following sections. Section II brings in notions of concepts, methods, and governance framing the application of health and human rights, in particular the Human Rights-based Approaches to Health. Section III sheds light on issues of heightened vulnerability and special protection, stressing that the health and human rights record of any nation, any community, is determined by what is being done and not done about those who are most in need. Section IV focuses on addressing system failures where health and human rights issues have been documented, recognized, even at times proclaimed as priorities, and yet insufficiently attended to as a result of State denial, unwillingness, or incapacity. Section V examines the relevance of the health and human rights paradigm to a changing world, underscoring

contemporary global challenges and responses. Finally, a Concluding Note brings together the key themes of this set of articles and attempts to project a vision of the future.
