Now in its fourth edition and fully revised throughout, this accessible text is structured in four key parts that cover everything a student needs to know about the topic. After an initial consideration of what constitutes corporate entrepreneurship and innovation, the author then guides students through the four pillars of entrepreneurial architecture: culture, structure, leadership and strategy. The third section focusses on the entrepreneurial mind-set, including how to encourage creativity, business ideas and developing concepts. Finally, the book draws attention to corporate venturing, examining venture teams, intrapreneurs, market development and the role of shareholder value.
