Archaeozoology in the eastern Cantabrian region during the pleistocene/holocene transition Ana Belén Marín Arroyo, 2010-11 La Región Cantábrica cuenta con una larga tradición arqueozoológica desde los años 70. Sin embargo, esta disciplina necesitaba una actualización metodológica que permitiese obtener la máxima información de los restos de fauna acumulados por grupos humanos y/o por otros agentes biológicos no humanos en yacimientos arqueológicos con el objetivo de alcanzar un conocimiento más amplio y veraz del comportamiento de las sociedades pasadas. Así pues, frente al desarrollo de estudios meramente descriptivos y cuantitativos, en este trabajo se ha potenciado la aplicación de la tafonomía comparada, la observación etnográfica, la modelización matemática, la inferencia estadística y el análisis exhaustivo de patrones espaciales. En este libro se presentan los resultados de la aplicación de esta nueva metodología arqueozoológica en el estudio del Paleolítico Superior Cantábrico, centrándose en primer lugar en el análisis de los niveles magdalenenses y azilienses de la Cueva del Mirón, para posteriormente generalizar los resultados obtenidos al Cantábrico Oriental, como región geográfica de características orográficas, ambientales y culturales similares. El objetivo final subyacente es promover el debate y la apertura de nuevas líneas de investigación arqueozoológicas.

Corrosión y preservación de la infraestructura industrial Benjamín Valdez Salas,Michael Schorr Wiener,2013-07-31 El mundo actual, y en particular la industria en todos sus sectores productivos, están preocupados por los daños que causan, en forma conjunta, la contaminación y la corrosión ambiental, que afectan severamente al desarrollo de la economía global. En particular, los efectos de este fenómeno de corrosión, impactan a la infraestructura civil, conformada por las estructuras y sus materiales de ingeniería que la componen, especialmente los diversos metales y aleaciones, expuestos en los cuerpos de agua, el suelo y la atmósfera. Este libro de corrosión y protección de la infraestructura industrial, representa un esfuerzo Iberoamericano para generar una obra de gran utilidad para la comunidad de habla hispana. Con sus diversos capítulos, contribuirá a la solución de los problemas de corrosión que se presentan en la industria, a su prevención y su mitigación. La esmerada selección de temas y autores realizada en la compilación de los capítulos, permite cubrir una amplia variedad de ambientes, industrias, materiales de ingeniería, fluidos, condiciones de operación y técnicas de protección y control de la corrosión.

La transferencia de los resultados de la investigación para el desarrollo territorial sostenible José Antonio Gutiérrez Gallego,Susanne Schnabel,Joaquín Francisco Lavado Contador,José Castro Serrano,2022-11-22 En este libro se recogen una selección de trabajos presentados en el Primer Congreso Internacional Sobre Transferencia de los Resultados de la Investigación para el Desarrollo Territorial Sostenible que se celebró de forma online en septiembre de 2021. Fue organizado por el Instituto Universitario de Investigación para el Desarrollo Territorial Sostenible (INTERRA) de la Universidad de Extremadura y abordó la enorme importancia que tiene la transferencia de la investigación para la sociedad, destacando, de este modo, el papel estratégico que juega la ciencia en el desarrollo de un país. Este aspecto es de máxima actualidad en la presente crisis sanitaria derivada de la COVID, en la que se han evidenciado las fortalezas y debilidades de estos procesos de transferencia. Gracias a un esfuerzo sin precedentes, el conocimiento científico se ha transferido en tiempo record y de manera totalmente exitosa al sistema sanitario, demostrando que la transferencia tecnológica está realmente presente en la Sociedad. Los organizadores planteamos un foro científico-técnico de la transferencia de la investigación a la

sociedad en las áreas temáticas propias del Instituto: Ingeniería Civil y de la Edificación y Geotecnologías, Medioambiente y recursos naturales, Sociedad, economía y marco administrativo. Aunque pueda resultar obvio, la transferencia de resultados de la investigación constituye, como debe ser, uno de los principales motores para el desarrollo sostenible de los territorios, tanto en el ámbito social, como en el económico y, por supuesto, ambiental. Esta aparente obviedad, sin embargo, no se traduce, frecuentemente, en la correspondiente importancia que, tanto la sociedad en general, como, sobre todo, los agentes públicos (responsables políticos y administraciones), conceden a los centros de investigación, particularmente a las Universidades, como motores importantes de desarrollo. Todo lo avanzado en el congreso pretende contribuir a poner en valor la responsabilidad social que tiene la Universidad con los ciudadanos ante los Objetivos del Desarrollo Sostenible. Un ejemplo de ello podría ser el caso del Instituto Universitario de Investigación INTERRA, que es la entidad promotora de la publicación de este libro, así como de la celebración del congreso. Como resultados, se han consensuado algunas conclusiones de interés, al tiempo que se han recogido diversas propuestas encaminadas a potenciar el desarrollo territorial sostenible basado en la transferencia de conocimientos a la sociedad. Del prólogo de Pedro María Fernández Salguero.
