Handbook of Educational Psychology and Students with Special Needs Andrew J. Martin, Rayne A. Sperling, Kristie J. Newton, 2020-02-18 Handbook of Educational Psychology and Students with Special Needs provides educational and psychological researchers, practitioners, policy-makers, and graduate students with critical expertise on the factors and processes relevant to learning for students with special needs. This includes students with attention-deficit/hyperactivity disorder, other executive function difficulties, behavior and emotional disorders, autism spectrum disorder, intellectual

disabilities, learning disabilities, dyslexia, language and communication difficulties, physical and sensory disabilities, and more. With the bulk of educational psychology focused on mainstream or typically developing learners, relatively little educational psychology theory, research, measurement, or practice has attended to students with special needs. As clearly demonstrated in this book, the factors and processes studied within educational psychology—motivation and engagement, cognition and neuroscience, social-emotional development, instruction, home and school environments, and more—are vital to all learners, especially those at risk or disabled. Integrating guidance from the DSM-5 by the American Psychiatric Association and the International Classification of Diseases (ICD-10) by the World Health Organization, this book synthesizes and builds on existing interdisciplinary research to establish a comprehensive case for effective psycho-educational theory, research, and practice that address learners with special needs. Twenty-seven chapters by experts in the field are structured into three parts on diverse special needs categories, perspectives from major educational psychology theories, and constructs relevant to special needs learning, development, and knowledge building.

Revised topics in this third edition include a focus on the implications of diversity and exceptionality, the progress made to date in providing inclusive schooling, a presentation of evidence-based methods for teaching mixed-ability classes and ideas for adapting the curriculum and designing teaching materials. New topics in this revised edition include: • how to support students' self-determination and autonomy; • LGBTQ+ issues for inclusive schools; • the UK 'engagement model' for assessing very low-functioning children; • the concept and purposes of a 'flipped classroom'; • engaging with a Response-to-Intervention Model; • how to support students in vocational colleges and universities. Each chapter contains an up-to-date list of online and print resources available to teachers who wish to pursue topics in greater depth. Fully revised throughout, the new edition is written to encourage students to integrate their

understanding of core psychological disciplines, as well as to consider what 'evidence-based practice' really means. Organized into two broad sections related to learning and behaviour, the book features a selection of vignettes from educational psychologists working in a range of contexts, as well as tasks and scenarios to support a problem-orientated approach to study. By integrating both research and everyday practice, the book is unique in engaging a critical appreciation of both the possibilities and limitations of educational psychology. Tuckman, 2024-12-18 Educational Psychology distills the latest research into actionable steps, guiding students in building solid, evidence-based teaching plans as they prepare to enter the classroom. Motivation is a central theme, with the authors providing a practical framework to help teachers enhance student motivation and connect it to key themes and concepts throughout the text. Rather than taking an encyclopedic approach, the authors group chapters by topic, enabling readers to remember concepts and connect best practices to big ideas in educational psychology.
