**Emory Dean Keoke, Kay Marie Porterfield**

Native American Wisdom Alan Jacobs, 2012-01-01 An inspiring anthology of prose, poetry and ancestral wisdom from members of 40 Native American tribes, organized alphabetically from Anishinaabeg to Zuni. Although there are major differences in the lifestyles of the numerous Native American nations, they share fundamental beliefs. The spiritual wisdom of these people is based on a love and reverence for Nature, a belief in a Supreme Being and a spirit world that interacts with human activity. Organized in alphabetical order and grouped around the main Native American Nations from Apache to Zuni, including the Sioux, Eskimo, Cherokee and many more, the evocative words that Alan Jacobs has selected from all the major tribes express the love and respect they feel for their environment and our place within it.

Listening to the Land Lee Schweninger,2010-01-25 For better or worse, representations abound of Native Americans as a people with an innate and special connection to the earth. This study looks at the challenges faced by Native American writers who confront stereotypical representations as they assert their own ethical relationship with the earth. Lee Schweninger considers a range of genres (memoirs, novels, stories, essays) by Native writers from various parts of the United States. Contextualizing these works within the origins, evolution, and perpetuation of the “green” labels imposed on American Indians, Schweninger shows how writers often find themselves denying some land ethic stereotypes while seeming to embrace others. Taken together, the time periods covered in Listening to the Land span more than a hundred years, from Luther Standing Bear’s description of his late-nineteenth-century life on the prairie to Linda Hogan’s account of a 1999 Makah hunt of a gray whale. Two-thirds of the writers Schweninger considers, however, are well-known voices from the second half of the twentieth century, including N. Scott Momaday, Louise Erdrich, Vine Deloria Jr., Gerald Vizenor, and Louis Owens. Few ecocritical studies have focused on indigenous environmental attitudes, in comparison to related work done by historians and anthropologists. Listening to the Land will narrow this gap in the scholarship; moreover, it will add individual Native American perspectives to an understanding of what, to these writers, is a genuine Native American philosophy regarding the land.

*Scots in the North American West, 1790-1917* Ferenc Morton Szasz,2000 Scots trappers dominated the fur trade, often proving more loyal to clan than to trading company or nation. Relying on centuries of experience raising livestock for British markets, Scottish investors and managers became highly visible in the post-Civil War western cattle industry with thriving outfits such as the Swan Land and Cattle Company in Wyoming. They introduced new breeds to western ranching, such as the Aberdeen Angus, that remain popular today. Similarly, Scots herders dominated the western sheep industry, running herds of over 100,000 animals. Andrew Little's sheep ranch in Idaho was so famous that a letter addressed simply Andy Little, USA found its intended recipient.

Native American Stories of the Sacred ,2005 The wisdom from these stories can become a companion on your own spiritual journey. Native American Stories of the Sacred are intended for more than entertainment: they are teaching tales containing elegantly simple illustrations of time-honored truths. From tales of Creation to Why? stories that help explain the natural world around us, these stories highlight the sacredness of all life and affirm that we are each an integral part of all that is holy. Drawn from tribes across North America, these are careful retellings of traditional stories such as Son of Light's quest to win back his captured wife from the monstrous Man-Eagle; humble Muskrat's noble self-sacrifice to establish solid land so other beings might live; Water Spider's creative solution for retrieving fire for all the animals; and White Buffalo Calf Woman's profound gift of the sacred pipe to the people. Each of the compelling stories in this collection illustrates principles that can guide you on your own spiritual quest. Now you can experience the wisdom of these teaching tales even if you have no previous knowledge of Native American traditions. SkyLight Illuminations provides insightful yet unobtrusive commentary that explains the cultural and spiritual significance of the seemingly mundane objects found in these stories--tobacco, gambling, even the exploits of mischievous tricksters such as Coyote and Weasel--while gracefully drawing comparisons to Christian, Jewish, Buddhist and Hindu religious traditions, among others. Whatever your spiritual heritage, these Native American stories of the sacred are sure to delight and inspire you with the sacredness of all Creation, and remind you that

the earth does not belong to us--we belong to the earth.

Encyclopedia of American Indian Contributions to the World Emory Dean Keoke, Kay Marie Porterfield, 2009 Describes the lives and achievements of American Indians and discusses their contributions to the world.

**Native American Studies in Higher Education** Duane Champagne, 2002 In this collection, Champagne and Stauss demonstrate how the rise of Native studies in American and Canadian universities exists as an extraordinary achievement in higher education. In the face of historically assimilationist agendas, institutional racism, and structural opposition by Western educational institutions, collaborative programs continue to grow and promote the values and goals of sovereign tribal communities. The contributors show how many departments grew significantly following the landmark 1969 Senate report, 'Indian Education: A National Tragedy, A National Challenge.' They evaluate the university efforts to offer Native students intellectual and technical skills, and the long battle to represent Native cultures and world views in the university curriculum. In twelve case studies, Indian and non-Indian teachers provide rich, contextual histories of their programs through three decades of growth. They frankly discuss successes and failures as innovative strategies and models are tested. Programs from University of California-Davis, Harvard, Saskatchewan, Arizona and others provide detailed analyses of academic battles over curriculum content, the marginalization of indigenous faculty and students, the pedagogical implications of integrating native instructors, the vagaries of administrative support and funding, Native student retention, the vulnerability of native language programs, and community collaborations. A vision of Indian education that emerges from these pages that reveals the university's potential as a vehicle for Indian nation-building, one in which the university curriculum also benefits from sustained contacts with tribal communities. As Native populations grow and the demand for university training increases, this book will be a valuable resource for Native American leaders, educators in Native American studies, race and ethnic studies, comparative education, minorities in education, anthropology, sociology, higher education administration and educational policy.
