Train Your Mind for Athletic Success Jim Taylor, PhD,2017-10-06 Much too often, the mental aspect of sport performance

is overlooked. While all top athletes are in outstanding physical condition and technically exceptional, mental preparation is often what separates the best from the rest. This is just as true for young athletes as it is for pros and Olympians. And even though relatively few athletes will ever reach the top of their sport, the attitudes and life lessons learned from mental training—such as motivation, confidence, focus, perseverance, and resilience—will serve them well in all aspects of their lives. In *Train Your Mind for Athletic Success: Mental Preparation to Achieve Your Sports Goals*, Dr. Jim Taylor uses his own elite athletic experience and decades of working with some of the world's best athletes to provide competitors of every ability with insights, practical exercises, and tools they can use to be mentally prepared when it really counts. His Prime Sport System explores the attitudes that lay the foundation for athletic success, the mental obstacles that can hold athletes back, the preparations they must take, the mental muscles they should strengthen, and the mental tools they need to fine tune their competitive performances. Most importantly, Dr. Taylor shows athletes practical strategies they can use to become mentally strong so they can perform their best when it matters most. *Train Your Mind for Athletic Success* goes well beyond the typical mental skills that are discussed in other mental training books. Readers will not only learn why mental preparation is so important to athletic success, but also where they personally are in each area thanks to brief mental assessments in each section of the book. In addition, each chapter includes exercises to show athletes how to incorporate mental training directly into their overall sport training regimen. The most comprehensive and in-depth book on mental preparation for athletes available, *Train Your Mind for Athletic Success* is an essential read for athletes, coaches, and parents.

Ontology and Closeness in Human-Nature Relationships Neil H. Kessler, 2018-10-10 In *Ontology and Closeness in Human-Nature Relationships*, Neil H. Kessler identifies the preconceptions which can keep the modern human mind in the dark about what is happening relationally between humans and the more-than-human world. He has written an accessible work of environmental philosophy, with a focus on the ontology of human-nature relationships. In it, he contends that large-scale environmental problems are intimate and relational in origin. He also challenges the deeply embedded, modernist assumptions about the relational limitations of more-than-human beings, ones which place erroneous limitations on the possibilities for human/more-than-human closeness. Diverging from the posthumanist literature and its frequent reliance on new materialist ontology, the arguments in the book attempt to sweep away what ecofeminists call "human/nature dualisms.

In doing so, conceptual avenues open up that have the power to radically alter how we engage in our daily interactions with the more-than-human world all around us. Given the diversity of fields and disciplines focused on the human-nature relationship, the topics of this book vary quite broadly, but always converge at the nexus of what is possible between humans and more-than-human beings. The discussion interweaves the influence of human/nature dualisms with the limitations of Deleuzian becoming and posthumanism's new materialism and agential realism. It leverages interhuman interdependence theory, Charles Peirce's synechism of feeling and various treatments of Theory of Mind while exploring the influence of human/nature dualisms on sustainability, place attachment, common worlds pedagogy, emergence, and critical animal studies. It also explores the implications of plant electrical activity, plant intelligence, and plant "neurobiology" for possibilities of relational capacities in plants while even grappling with theories of animism to challenge the animate/inanimate divide. The result is an engaging, novel treatment of human-nature relational ontology that will encourage the reader to look at the world in a whole new way.

Mind Seeing Mind Roger R. Jackson, 2019-10-29 A definitive study of one of the most important practices in Tibetan Buddhism, with translations of a number of its key texts. Mahamudra, the "great seal," refers to the ultimate nature of mind and reality, to a meditative practice for realizing that ultimate reality, and to the final fruition of buddhahood. It is especially prominent in the Kagyü tradition of Tibetan Buddhism, so it sometimes comes as a surprise that mahamudra has played an important role in the Geluk school, where it is part of a special transmission received in a vision by the tradition's founder,

Tsongkhapa. Mahamudra is a significant component of Geluk ritual and meditative life, widely studied and taught by contemporary masters such as the Dalai Lama. Roger Jackson's *Mind Seeing Mind* offers us both a definitive scholarly study of the history, texts, and doctrines of Geluk mahamudra and masterful translations of its seminal texts. It provides a skillful survey of the Indian sources of the teaching, illuminates the place of mahamudra among Tibetan Buddhist schools, and details the history and major textual sources of Geluk mahamudra. Jackson also addresses critical questions, such as the relation between Geluk and Kagyü mahamudra, and places mahamudra in the context of contemporary religious studies. The translation portion of *Mind Seeing Mind* includes ten texts on mahamudra history, ritual, and practice. Among these are the First Panchen Lama's root verses and autocommentary on mahamudra meditation, his ritual masterpiece *Offering to the Guru*, and a selection of his songs of spiritual experience. *Mind Seeing Mind* adds considerably to our understanding of Tibetan Buddhist spirituality and shows how mahamudra came to be woven throughout the fabric of the Geluk tradition.
