Dreams of Duneland Kenneth J. Schoon,2013-06-18 The towering sand dunes along Lake Michigan not far from Chicago are one of the most unexpected natural features of Indiana. Dreams of Duneland is a beautifully illustrated introduction to the Dunes region, its history, and future prospects. This area of shifting sands is also a place of savanna, wetland, prairie, and forest that is home to a wide diversity of plant and animal species. The preserved area of the Indiana Dunes National Lakeshore sits by residential communities, businesses, and cultural attractions, evidence of a long history of competition for the land among farmers, fur traders, industrialists, conservationists, and urban and recreational planners. With more than 400 stunning images, the book brings to life the remarkable story of this extraordinary place.

**Dreaming in Auschwitz** Wojciech Owcarski,2022-11-22 This book, based on the descriptions of their dreams that former Auschwitz inmates wrote in 1973, provides a deep, insightful explanation of the role of dreams in shaping the prisoners' experiences. It studies these testimonies from a broad, interdisciplinary perspective, analysing the psychological, social, anthropological, narrative and even artistic dimensions of the reports. The book characterises the content of the dreams and their possible meanings, the manners in which the respondents sensed, understood and described their dreams, and the informants' attitudes towards dreaming. Among thousands of books about the Nazi atrocities, this one is unique because it explores the Holocaust through the prism of dreams. The dream descriptions serve here as an exceptional source of knowledge. They often reveal not only an image of the camp reality, but also the truth that remained unconscious, incomprehensible, and unspeakable for the dreamers themselves. As such, this text will serve to open a completely new way of thinking and writing about the Holocaust.

**The Delaware Naturalist Handbook** McKay Jenkins,Susan Barton,2020-11-27 The Delaware Naturalist Handbook is the primary public face of a major university-led public educational outreach and community engagement initiative. This statewide master naturalist certification program is designed to train hundreds of citizen scientists, K-12 environmental educators, ecological restoration volunteers, and habitat managers each year. The initiative is conducted in collaboration with multiple disciplines at the University of Delaware, the University of Delaware Cooperative Extension, the Delaware Environmental Institute (DENIN), the state Department of Natural Resources and Environmental Conservation (DNREC), the state Division of Parks, the state Forest Service, the state Division of Fish and Wildlife, and local nonprofit educational

institutions, including the Mount Cuba Center, the Delaware Nature Society and Ashland Nature Center, Delaware Wildlands, Northeast Climate Hub, Center for Inland Bays, and White Clay Creek State Park.

**The Tools of Owatatsumi** Desmond Ball, Richard Tanter, 2015-01-21 Japan is quintessentially by geography a maritime country. Maritime surveillance capabilities – underwater, shore-based and airborne – are critical to its national defence posture. This book describes and assesses these capabilities, with particular respect to the underwater segment, about which there is little strategic analysis in publicly available literature. Since the end of the Cold War, Chinese oceanographic and navy vessels have intruded into Japanese waters with increasing frequency, not counting their activities in disputed waters such as around the Senkaku (Diaoyu) Islands and Okinotorishima where China and Japan have overlapping territorial claims. These intrusions have increasingly involved warships, including submarines, sometimes acting quite aggressively. Japan maintains an extraordinary network of undersea hydrophone arrays, connected to shore-stations which are typically equipped with electronic intelligence (ELINT) systems, for monitoring, identifying and tracking submarine and surface traffic in its internal straits and surrounding seas. Some parts of this network are operated jointly with, and are of crucial importance to, the US Navy. Japan's superlative submarine detection capabilities would be of decisive advantage in any submarine engagement. But the relevant facilities are relatively vulnerable, which makes them very lucrative targets in any conflict. This introduces compelling escalatory dynamics, including the involvement of US forces and possible employment of nuclear options.

**Special Treatment** Anna Ruddock, 2021-07-06 The All India Institute of Medical Sciences (AIIMS) is iconic in the landscape of Indian healthcare. Established in the early years of independence, this enormous public teaching hospital rapidly gained fame for the high-quality treatment it offered at a nominal cost; at present, an average of ten thousand patients pass through the outpatient department each day. With its notorious medical program acceptance rate of less than 0.01%, AIIMS also sits at the apex of Indian medical education. To be trained as a doctor here is to be considered the best. In what way does this enduring reputation of excellence shape the institution's ethos? How does elite medical education sustain India's social hierarchies and the health inequalities entrenched within? In the first-ever ethnography of AIIMS, Anna Ruddock considers prestige as a byproduct of norms attached to ambition, aspiration, caste, and class in modern India, and illustrates how the institution's reputation affects its students' present experiences and future career choices. Ruddock untangles the threads of intellectual exceptionalism, social and power stratification, and health inequality that are woven into the health care taught and provided at AIIMS, asking what is lost when medicine is used not as a social equalizer but as a means to cultivate and maintain prestige.

**Literature of the Global Age** Maurizio Ascari, 2014-01-10 In an age of world citizenship, literary scholarship is focusing increasingly on texts which communicate effectively over cultural lines. Advocating a planetary approach to contemporary

literature, this critical text examines eight novels from eight cultures. The writers discussed are Julian Barnes, Magda Szabo, Abraham B. Yehoshua, Ian McEwan, W.G. Sebald, Murakami Haruki, Jonathan Safran Foer, and Azar Nafisi. Focusing on the authors' encouragement to meditate on life's most pressing issues, the essays here invite us to reevaluate postmodernism as a current category.

**Superstorm Sandy** Diane C. Bates, 2016-01-18 Sandy was the costliest hurricane in U.S. history after Katrina, but the waters had barely receded from the Jersey coast when massive efforts began to "Restore the Shore." Why do people build in areas open to repeated natural disasters? And why do they return to these areas in the wake of major devastation? Drawing on a variety of insights from environmental sociology, Superstorm Sandy answers these questions as it looks at both the unique character of the Jersey Shore and the more universal ways that humans relate to their environment. Diane C. Bates offers a wide-ranging look at the Jersey Shore both before and after Sandy, examining the many factors—such as cultural attachment, tourism revenues, and governmental regulation—that combined to create a highly vulnerable coastal region. She explains why the Shore is so important to New Jerseyans, acting as a key cultural touchstone in a state that lacks a central city or even a sports team to build a shared identity among the state's residents. She analyzes post-Sandy narratives about the Jersey Shore that trumpeted the dominance of human ingenuity over nature (such as the state's "Stronger than the Storm" advertising campaign) or proclaimed a therapeutic community ("Jersey Strong")—narratives rooted in emotion and iconography, waylaying any thought of the near-certainty of future storms. The book also examines local business owners, politicians, real estate developers, and residents who have vested interests in the region, explaining why the Shore was developed intensively prior to Sandy, and why restoration became an imperative in the post-storm period. Engagingly written and insightful, Superstorm Sandy highlights the elements that compounded the disaster on the Shore, providing a framework for understanding such catastrophes and preventing them in the future.

**The SAGE Handbook of Social Anthropology** Richard Fardon, Oliva Harris, Trevor H J Marchand, Cris Shore, Veronica Strang, Richard Wilson, Mark Nuttall, 2012-07-25 In two volumes, the SAGE Handbook of Social Anthropology provides the definitive overview of contemporary research in the discipline. **Modern Greece** Elaine Thomopoulos, 2021-11-05 A valuable resource, ideal for students doing research or general readers interested in knowing more about Greece, both its current state and its history. - Library Journal There's more to Greece than its legacy as the birthplace of democracy and Western Philosophy. Discover what life is like in this contemporary European nation. Thematic chapters examine topics such as government and politics, history, food, etiquette, education, gender, marriage and sexuality, media and popular culture, music, art, and more. **Victorian Ecocriticism** Dewey W. Hall, 2017-10-16 Victorian Ecocriticism: The Politics of Place and Early Environmental Justice aims to take up the challenge that Lawrence Buell lays out in *The Future of Environmental Criticism: Environmental Crisis and Literary Imagination* (2005). Buell decries: "For in order to bring 'environmental justice into ecocriticism,' a few more articles or conference sessions won't suffice. There must be 'a fundamental rethinking and reworking of the field as a whole'" (Buell 113). While discussions about nature conservation and preservation have been important within the context of ecocriticism, Buell asserts that the holy grail for the field is actually how literary critics engage in discourse about questions of place as space humanized for the purpose of tracing, disclosing, and advancing the important issue of environmental justice—as it applies to human beings, animals, and plants. The "fundamental reworking" or shift in the field of Victorian Studies really has to do with the dearth of ecocritical publishing about seminal authors and literary texts. Victorian Ecocriticism aims to participate in filling that vacuum, lack, or lacuna by featuring current research about the Victorian era from an ecocritical perspective. Victorian Ecocriticism hopes to identify, establish, and organize its content based on six themes: Ecocrisis, Ecofeminism, Ecogothicism, Ecohistoricism, Ecotheology, and Ecological Interdependence. The edited collection, thus, has two aims. First, selected places among others featured in the edition will provide environmental contexts, often with political implications: American rural landscape (e.g., Walden Pond), Australian mines, British hill-country, metropolis, mill towns, the sea, and the woods. Second, the edition includes discussions about various instances of early environmental justice evident during the mid-nineteenth century such as, but not limited to: anti-railway campaigns,

biological egalitarianism, labor disputes due to adverse working conditions, patterns of displacement, reactions to Victorian scientism, resistance to enclosure, and working class education. Victorian Ecocriticism is an interdisciplinary edition. It focuses on Victorian literature as the foundational discipline linked to various disciplines such as ecology, evolutionary biology, natural history, and soil science. The topics are wide-ranging, significant, and contemporary discussing the politics of place as well as early environmental justice.

*Object Lessons and Early Learning* Sharon Shaffer, 2018-07-11 The twenty-first century is a time of change for early learning in museums, due in part to society's evolving view of childhood, from an age of innocence to understanding the robust learning that defines the first years of life. This perspective is a catalyst for international conversation and continues to raise attention and interest across society. Object Lessons and Early Learning leverages what is known about the cognitive development of young children to examine the power of learning through objects in museum and heritage settings. Exploring the history and modern day practice of object-based learning, Shaffer outlines the rationale for endorsing this approach in both formal and informal learning spaces. She argues that museums, as collecting institutions, are learning spaces uniquely positioned to allow children to make meaning about their world through personal connections to cultural artifacts, natural specimens, and works of art. A range of descriptive object lessons, inspired by objects in museums as well as from the everyday world, are presented throughout the text as examples of ways in which children can be encouraged to engage with museum collections. Object Lessons and Early Learning offers insights into strategies for engaging young children as learners in museum settings and in their everyday world, and, as such, will be essential reading for museum professionals, classroom educators, and students. It should also be of great interest to academics and researchers engaged in the study of museums and education.
