Music After Deleuze Edward Campbell, 2013-11-07 Music After Deleuze explores how Deleuzian concepts offer interesting ways of thinking about a wide range of musics. The concepts of difference, identity and repetition offer novel approaches to Western art music from Beethoven to Boulez and Bernhard Lang as well as jazz improvisation, popular and sacred music. The concepts of the 'rhizome', the 'assemblage' and the 'refrain' enable us to think of the specificity of musical works as the meeting of productive forces, for example in the contemporary opera of Dusapin and the experimental music theatre of Aperghis. The concepts of smooth and striated space form the starting point for musical and political reflections on pitch in Western and Eastern music. Deleuze's notion of time as multiple illuminates the distinctive conceptions of musical time found in Debussy, Messiaen, Boulez, Carter and Grisey. Finally, the innovative semiotic theory forged in Deleuze-Guattarian philosophy offers valuable insights for a semiotics capable of engaging with the innovative, molecular music of Lachenmann, Aperghis and Levinas.

The Music of Peter Maxwell Davies Nicholas Jones, Richard McGregor, 2020 Peter Maxwell Davies (1934-2016) was one of the leading international composers of the post-war period as well as one of the most productive. This book provides a global view of his music, integrating a number of resonant themes in the composer's work while covering a representative cross-section of his vast output - his work list encompasses nearly 550 compositions in every established genre. Each chapter focuses on specific major works and offers general discussion of other selected works connected to the main themes. These themes include compositional technique and process; genre; form and architecture; tonality and texture; allusion, quotation and musical critique; and place and landscape. Throughout, the book contends that Davies's works are not created in a vacuum but are intimately connected to, and are a reflection of, 'the past'. This deep engagement occurs on a number of levels, fluctuating and interacting with the composer's own predominantly modernist idiom and evoking a chain of historical resonances. Making sustained reference to Davies's own words, articles and programme notes as well as privileged access to primary source material from his estate, the book illuminates the composer's practices and approaches while shaping a discourse around his music. NICHOLAS JONES is Senior Lecturer in Musicology at Cardiff University. RICHARD

MCGREGOR is Emeritus Professor of Music at the University of Cumbria and part-time Lecturer at the Royal Conservatoire of Scotland.

The Oxford Handbook of Algorithmic Music Alex McLean, Roger T. Dean, 2018-01-18 With the ongoing development of algorithmic composition programs and communities of practice expanding, algorithmic music faces a turning point. Joining dozens of emerging and established scholars alongside leading practitioners in the field, chapters in this Handbook both describe the state of algorithmic composition and also set the agenda for critical research on and analysis of algorithmic music. Organized into four sections, chapters explore the music's history, utility, community, politics, and potential for mass consumption. Contributors address such issues as the role of algorithms as co-performers, live coding practices, and

discussions of the algorithmic culture as it currently exists and what it can potentially contribute society, education, and ecommerce. Chapters engage particularly with post-human perspectives - what new musics are now being found through algorithmic means which humans could not otherwise have made - and, in reciprocation, how algorithmic music is being assimilated back into human culture and what meanings it subsequently takes. Blending technical, artistic, cultural, and scientific viewpoints, this Handbook positions algorithmic music making as an essentially human activity.

Extreme Exoticism W. Anthony Sheppard, 2019-09-16 To what extent can music be employed to shape one culture's understanding of another? In the American imagination, Japan has represented the most alien nation for over 150 years. This perceived difference has inspired fantasies--of both desire and repulsion--through which Japanese culture has profoundly impacted the arts and industry of the U.S. While the influence of Japan on American and European painting, architecture, design, theater, and literature has been celebrated in numerous books and exhibitions, the role of music has been virtually ignored until now. W. Anthony Sheppard's *Extreme Exoticism* offers a detailed documentation and wide-ranging investigation of music's role in shaping American perceptions of the Japanese, the influence of Japanese music on American composers, and the place of Japanese Americans in American musical life. Presenting numerous American encounters with and representations of Japanese music and Japan, this book reveals how music functions in exotic representation across a variety of genres and media, and how Japanese music has at various times served as a sign of modernist experimentation, a sounding board for defining American music, and a tool for reshaping conceptions of race and gender. From the Tin Pan Alley songs of the Russo-Japanese war period to Weezer's *Pinkerton* album, music has continued to inscribe Japan as the land of extreme exoticism.

It charts the realisation of a youthful vocation to become not merely a composer, but an Australian composer. Twentieth-Century Music in the West Tom Perchard,Stephen Graham,Tim Rutherford-Johnson,Holly Rogers,2022-10-06 This is the first introductory survey of western twentieth-century music to address popular music, art music and jazz on equal terms. It treats those forms as inextricably intertwined, and sets them in a wide variety of social and critical contexts. The book comprises four sections – Histories, Techniques and Technologies, Mediation, Identities – with 16 thematic chapters. Each of these explores a musical or cultural topic as it developed over many years, and as it appeared across a diversity of musical practices. In this way, the text introduces both key musical repertoire and critical-musicological approaches to that work. It historicises music and musical thinking, opening up debate in the present rather than offering a new but closed narrative of the past. In each chapter, an overview of the topic's chronology and main issues is illustrated by two detailed case studies.

Written by an authoritative, opinionated, and controversial figure in musicology, The Oxford History of Western Music provides a critical aesthetic position with respect to individual works, a context in which each composition may be evaluated and remembered. Taruskin combines an emphasis on structure and form with a discussion of relevant theoretical concepts in each age, to illustrate how the music itself works, and how contemporaries heard and understood it. It also describes how the c

Music Teachers' Values and Beliefs Rachael Dwyer, 2016-06-03 In *Music Teachers' Values and Beliefs*, Dwyer investigates the relationships between teachers, learners and music in music classrooms. Using Bourdieu's concepts of habitus and doxa as an interpretive lens, the book explores the values and beliefs of four music teachers, depicted in richly detailed narratives. The narratives are contextualised through the examination of traditions of music and contemporary approaches. In the past,

music education has been shaped by elitist tendencies regarding the types of music worthy of study, the ways in which music should be learnt, and the purpose of such learning. Contemporary approaches to music education have enacted significant change in some regions and systems, while others have been slower to leave behind deeply entrenched values, beliefs and practices. These approaches have been blamed for low rates of participation and engagement in school music education, despite the fact that the majority of young people listen to and enjoy music outside of school. This innovative book provides music education researchers and practitioners with a new understanding of the impact of teachers' personal values, beliefs and experiences of music and music education on classroom practice, and the impact this has on students' experiences of music education.

Through lively narratives and innovative activities, the student is given the tools to form a personal appreciation and understanding of the power of music. The book is paired with an audio compilation featuring listening guides with streaming audio, short texts on special topics, and sample recordings and notation to illustrate basic concepts in music. There is not a CD-set, but the companion website with streaming audio is provided at no additional charge.
