Thinking with Kierkegaard Arne Grøn, 2022-12-31 Arne Grøn's reading of Søren Kierkegaard's authorship revolves around existential challenges of human identity. The 35 essays that constitute this book are written over three decades and are characterized by combining careful attention to the augmentative detail of Kierkegaard's text with a constant focus on issues in contemporary philosophy. Contrary to many approaches to Kierkegaard's authorship, Grøn does not read Kierkegaard in opposition to Hegel. The work of the Danish thinker is read as a critical development of Hegelian phenomenology with particular attention to existential aspects of human experience. Anxiety and despair are the primary existential phenomena that Kierkegaard examines throughout his authorship, and Grøn uses these negative phenomena to argue for the basically ethical aim of Kierkegaard's work. In Grøn's reading, Kierkegaard conceives human selfhood not merely as relational, but also a process of becoming the self that one is through the otherness of self-experience, that is, the body, the world, other people, and God. This book should be of interest to philosophers, theologians, literary studies scholars, and anyone with an interest not only in Kierkegaard, but also in human identity.

Textbook of Drug Design and Discovery Kristian Stromgaard, Povl Krogsgaard-Larsen, Ulf Madsen, 2009-10-07 The molecular biological revolution and the mapping of the human genome continue to provide new challenges and opportunities for drug research and design. Future medicinal chemists and drug designers must have a firm background in a number of related scientific disciplines in order to understand the conversion of new insight into lead structures and

Adolescence Mental Health in School and University Iman Permana, Herni Susanti, 2024-07-29 A school, whether run by the government or a private institution, is established to prepare adolescents for adulthood. In some regions, some religious societies have established a comprehensive educational institution supported by their religious competencies requirement in their curriculum, along with the national curriculum. Adolescence is a period of life that ranges from 10 to 19 years old and expands from school to the early phase of university. Adolescents are considered highly susceptible to mental health issues. Anxiety, depression, behavioral disorders, and suicidal attempts have been shown to increase before the age of 24. There is a myriad of factors that can contribute to the development of mental health disorders in this context, including family, parenting style, and bullying from peers/teachers. Failing to address contributing factors may hinder adolescents from

fulfilling and sustaining healthy and productive adult lives.

Greenland Mummies Jens Peder Hart Hansen, Jorgen Medlgaard, 1991-03-01 How did they die? Why were they buried together? What had been the nature of their culture and beliefs? How had they survived in the harsh Arctic climate? To solve this icy mystery, a team of archaeologists, historians, and medical specialists used modern, innovative investigative techniques. They carried out their detective work with keen scholarly curiosity, combined with respect for these people of the past. While many puzzles have been answered, others remain unsolved. The investigation has revealed that the younger child was buried alive at the age of only six months, while the other, two and a half years old, had been born with Down's syndrome. Analysis of the hair of the mummies revealed evidence of air pollution at levels similar to those of today. Speculating on reasons for a mass grave -- a form of burial the Inuit normally used only because of some catastrophe -- the researchers have reconstructed the possible events of the past. The contents of the grave shed light on the every-day life of these people, allowing the investigators to place this evidence within the larger context of Thule culture and knowledge of Inuit contact with the Norse settlements which dotted the outer margins of Greenland during the medieval era. The *Greenland Mummies* brings the compelling story of this fervent collaboration to the attention of the world. Not only does it provide a fascinating and insightful look into the life and culture of the Inuit in the fifteenth century, it offers an impressive testament to one of the most successful archaeological investigations ever conducted.

Animal Manure Recycling Sven G. Sommer, Morten L. Christensen, Thomas Schmidt, Lars Stoumann Jensen, 2013-10-07 A rapidly changing and expanding livestock and poultry production sector is causing a range of environmental problems on local, regional and global scales. *Animal Manure Recycling: Treatment and Management* presents an accessible overview of environmentally friendly technologies for managing animal manure more efficiently and in a sustainable manner. The book describes the physical and chemical characteristics of animal manure and microbial processes, featuring detailed examples and case studies showing how this knowledge can be used in practice. Readers are introduced to the sustainable use of animal manure for crop fertilisation and soil amelioration. Environmentally friendly technologies for reducing emissions of ammonia, odour and the greenhouse gases nitrous oxide and methane are presented, and reduction of plant nutrient losses using separation technologies is introduced. Finally and most importantly, the book describes methods to commercialise and transfer knowledge about innovations to end-users. Topics covered include: Regulation of animal manure management Manure organic matter: characteristics and microbial transformations Greenhouse gas emissions from animal manures and technologies for their reduction Technologies and logistics for handling, transport and distribution of animal manures Bioenergy production Animal manure residue upgrading and nutrient recovery in bio-fertilisers Life cycle assessment of manure management systems Innovation in animal manure management and recycling *Animal Manure Recycling: Treatment and Management* presents state-of-the-art coverage of the entire animal manure chain, providing practical information for

engineers, environmental consultants, academics and advanced students involved in scientific, technical and regulatory issues related to animal manure management.

Degradation of Bioactive Substances Jens H. Henriksen, 2024-12-06 Intended primarily for researchers working with bioactive substances such as hormones, neurotransmitters, growth factors, and connective tissue makers, this book discusses the principles of degradation in major groups of bioactive materials with respect to physiology, location, and regulation. Peptidases; receptor-mediated endocytosis; organ extraction and clearance; and the degradation of specific proteins, peptides, amines, steroids, and polysaccharides are featured. Pathophysiology and its role in diagnostics and disease are considered throughout the book, in addition to updates of recent literature and substantial new information on physiology and pathophysiology of degradation of bioactive material. No special mathematical or kinetic background is necessary to read this book because the mathematic and kinetic concepts are facilitated through the presentation of fundamental and more advanced principles. Furthermore, illustrations and tables are provided to facilitate the understanding of the dynamic aspects of degradation processes. *Degradation of Bioactive Substances: Physiology and Pathophysiology* is the first comprehensive work describing the degradation of bioactive material, including information not found in biochemical textbooks on internal metabolism or pharmacokinetic textbooks on drug metabolism.

Interventional Ultrasound Hans Henrik Holm, Jørgen Kvist Kristensen, 2013-11-11 Modern sonography makes possible the detection of small and subtle changes in the normal echo pattern. These may represent significant pathological changes which can not always be fully revealed by the echo pattern alone. There is, therefore, an increasing need for the supplement of the ultrasonically guided percutaneous puncture, which can be performed with great accuracy and with virtually no risk. Also, ultrasonically guided puncture has proven invaluable for a wide variety of therapeutic purposes. The first percutaneous puncture guided by ultrasonic scanning using a specifically designed transducer was performed in 1969 at the ultrasonic laboratory in Gentofte, now Herlev, Hospital, Copenhagen. The idea was based on a puncture transducer described and used by Kratochwill for puncture under the guidance of the ultrasonic A-presentation technique. The development in the field formed the basis of the First International Conference on Ultrasonically Guided Puncture at Herlev Hospital in 1978 sponsored by The Danish Society of Diagnostic Ultrasound. The knowledge and experience of the speakers at that conference was compiled in the book *Ultrasonically Guided Puncture Technique* published in 1980. Since then the Society has sponsored a conference at the same place in 1980 and 1983, the latest conference being termed Third International Conference on Interventional Ultrasound.

Image Analysis Jens Petersen, Vedrana Andersen Dahl, 2025-06-21 The two-volume set 15725 and 15726 constitutes the refereed proceedings of the 23rd Scandinavian Conference on Image Analysis, SCIA 2025, held in Reykjavik, Iceland, during June 23-25, 2025. The 60 revised full papers presented in these proceedings were carefully reviewed and selected from 98

submissions. The papers are organized in the following topical sections: Part I: Machine learning and deep learning; Segmentation, Grouping, and Shape; Vision for robotics and autonomous vehicles; Biometrics, faces, body gestures and pose; 3D vision from multiview and other sensors; and Vision applications and systems. Part II: Datasets and evaluation; Image and video processing, analysis, and understanding; Detection, recognition, classification, and localization in 2D and/or 3D; Medical, biological, and cell microscopy; Explainable AI for CV; Vision + language (+ other modalities); Computational photography; Fairness; and Low-level and physics-based vision.

Cosmopolitanism, Migration and Universal Human Rights Mogens Chrom Jacobsen,Emnet Berhanu Gebre,Drago Župarić-Iljić,2020-09-01 This book describes the potential and challenges of cosmopolitanism from a philosophical and historical point of view. Through the prism of cosmopolitanism, this book considers how the recent surge in migration is affecting our current reality, while also taking stock of the contemporary potential of cosmopolitan ideas. It considers and compares the significance of religion and culture for the wider societal acceptance or rejection of refugees. Moreover, the book examines the European Court of Human Rights jurisprudence on immigration policies, non-refoulement, humanitarian law and gender. It presents empirically based research of a quantitative, qualitative and comparative nature regarding the determinants of attitudes towards cosmopolitanism and more generally concerning public opinion on migration issues, and reflects on conceptions of and attitudes towards citizenship, while also imagining new forms of citizenship. This book serves as a comprehensive overview and resource for migration scholars from the social sciences and the humanities, as well as students and other stakeholders in the fields of migration and human rights.

Molecular Neuropharmacology Arne Schousboe,Hans Bräuner-Osborne,2003-12-22 A powerful collection of readily reproducible cutting-edge techniques for characterizing the ligand or substrate binding of neurotransmitter receptors and transporters. The procedures cover interdisciplinary interactions for monoamine transporters, amino acid transporters, ionotropic receptors, metabotropic glutamate receptors, GABA receptors, and other G protein-coupled receptors. By illuminating how neurons in the central nervous communicate with other, these techniques can lead to the development of novel therapeutic strategies for neurological diseases.

Minority Rights in Europe: Policies and Practices in CSCE Participating States Minority Rights Group,Leningrad

Association of Scientists,1991-06-30 The Conference focused on minority issues that have not yet, in our opinion, been solved satisfactorily. There are several open ends in the theoretical and pragmatic approaches that are currently discussed internationally: the content of collective minority rights that need elaboration after decades of focusing on individual human rights only; ways in which one can include rights for non-territorial minorities (e.g. migrants); and the role non-governmental organizations and independent researchers can play in a process that is still dominated by governmental (i.e. majority) bodies. Please note that the terminology in the fields of minority rights and indigenous peoples' rights has changed over time. MRG strives to reflect these changes as well as respect the right to self-identification on the part of minorities and indigenous peoples. At the same time, after over 50 years' work, we know that our archive is of considerable interest to activists and researchers. Therefore, we make available as much of our back catalogue as possible, while being aware that the language used may not reflect current thinking on these issues.
