

Define Dignity Of The Human Person

Todd A. Salzman, Michael G. Lawler

What Is a Person? Christian Smith, 2010-09-15 What is a person? This fundamental question is a perennial concern of philosophers and theologians. But, Christian Smith here argues, it also lies at the center of the social scientist's quest to interpret and explain social life. In this ambitious book, Smith presents a new model for social theory that does justice to the best of our humanistic visions of people, life, and society. Finding much current thinking on personhood to be confusing or misleading, Smith finds inspiration in critical realism and personalism. Drawing on these ideas, he constructs a theory of personhood that forges a middle path between the extremes of positivist science and relativism. Smith then builds on the work of Pierre Bourdieu, Anthony Giddens, and William Sewell to demonstrate the importance of personhood to our understanding of social structures. From there he broadens his scope to consider how we can know what is good in personal and social life and what sociology can tell us about human rights and dignity. Innovative, critical, and constructive, *What Is a Person?* offers an inspiring vision of a social science committed to pursuing causal explanations, interpretive understanding, and general knowledge in the service of truth and the moral good.

Social Conscience and Responsibility Jane E. Bleasdale, Julie A. Sullivan, 2020-02-29 How we teach ethics has been an ambiguous instructional area for many years. In religious schools it is left to the work of the religion teacher, and in public schools it is often incorporated into a civics course. Across the curriculum there are multiple points at which we can incorporate the study of ethics in interdisciplinary ways. In this volume we will focus on how educators in high schools (grades 9-12) can incorporate the teaching of ethics effectively across all disciplines (Sciences, Humanities, Arts, Math and Technology). The introduction of the book will be a foundational description of ethics - what it means to study ethics and to be an ethical person.

Humanity in God's Image Claudia Welz, 2016-08-18 How can we, in our times, understand the biblical concept that human beings have been created in the image of an invisible God? This is a perennial but increasingly pressing question that lies at the heart of theological anthropology. *Humanity in God's Image: An Interdisciplinary Exploration* clarifies the meaning of this concept, traces different Jewish and Christian interpretations of being created in God's image, and reconsiders the significance of the imago Dei in a post-Holocaust context. As normative, counter-factual notions, human dignity and the imago Dei challenge us to see more. Claudia Welz offers an interdisciplinary exploration of theological and ethical 'visions' of the invisible. By analysing poetry and art, Welz exemplifies human self-understanding in the interface between the visual and the linguistic. The content of the imago Dei cannot be defined apart from the image carrier: an embodied creature. Compared to verbal, visual, and mental images, how does this creature as a 'living image' refer to God--like a metaphor, a mimetic mirror, or an elusive trace? Combining hermeneutical and phenomenological perspectives with philosophy of religion and philosophy of language, semiotics, art history, and literary studies, Welz regards the imago Dei as a complex sign that is at once iconic, indexical, and symbolical--pointing beyond itself.

Religious Human Rights in Global Perspective John Witte Jr.,Johan D. van der Vyver,2023-12-11 In this 'Dickensian century' of human rights, the world has cultivated the best of religious rights protections, but witnessed the worst of religious rights abuses. In this volume, Jimmy Carter, John T. Noonan, Jr., and a score of leading jurists assess critically and comparatively the religious rights laws and practices of the international community and of selected states in the Atlantic continents. This volume and its companion *Religious Human Rights in Global Perspective: Religious Perspectives* are products of an ongoing project on religion, human rights and democracy undertaken by the Law and Religion Program at Emory University.

Structure, Consciousness, and History Richard Harvey Brown,Stanford M. Lyman,1978-08-31 First published in 1978, this volume is addressed to the crisis prevailing in the social and cultural sciences. The authors explore the conflict between positivism and romanticism, between hard and soft sociological research methods, and between objectivity and subjectivity - conflicts that were particularly acute in sociology at the time of publication. All of the essays adopt the approach of 'symbolic realism' or 'cognitive aesthetics' to overcome the dualism in conventional sociological theory. This strategy of symbolic realism is a philosophical amalgam forged from findings in existential phenomenology, ordinary language philosophy and pragmatism. It establishes a legitimate basis for the application of aesthetic criteria to truth-seeking in the social sciences. The synthesis emergent from these essays suggests a paradigm with broad implications for all the human studies. Students of culture will find this volume a provocative point of departure for their own investigations.

Women and Shari'a Law Elham Manea,2016-05-27 In response to recent media controversy and public debate about legal pluralism and multiculturalism, Manea argues against what she identifies as the growing tendency for people to be treated as 'homogenous groups' in Western academic discourse, rather than as individuals with authentic voices. Building on her knowledge of the situation for women in Middle Eastern and Islamic countries, she undertakes first-hand analysis of the Islamic shari'a councils and Muslim arbitration tribunals in various British cities. Based on meetings with the leading sheikhs - including the only woman on their panels - as well as interviews with experts on extremism, lawyers and activists in civil society and women's rights groups, Manea offers an impassioned critique of legal pluralism, connecting it with political Islam

and detailing the lived experiences of women in Muslim communities.

Textbook of Palliative Care Roderick Duncan MacLeod, Lieve Van den Block, 2025-02-25 This second edition provides the most up-to-date information on all aspects of palliative care including recent developments (including COVID-19), global policies, service provision, symptom management, professional aspects, organization of services, palliative care for specific populations, palliative care emergencies, ethical issues in palliative care, research in palliative care, public health approaches and financial aspects of care. This new Textbook of Palliative Care remains a unique, comprehensive, clinically relevant and state-of-the art book, aimed at advancing palliative care as a science, a clinical practice and as an art. Palliative care has been part of healthcare for over fifty years but it still needs to be explained to many. Healthcare education and training has been slow to recognize the vital importance of ensuring that all practitioners have a good understanding of what is involved in the care of people with serious or advanced illnesses and their families. However, the science of palliative care is advancing and this new edition will contribute to a better understanding. This new edition offers 86 updated or new chapters out of 108, written by experts in their given fields, providing up-to-date information on a wide range of topics of relevance to those providing care towards the end of life no matter what the disease may be. We present a global perspective on contemporary and classic issues in palliative care with authors from a wide range of disciplines involved in this essential aspect of care. The Textbook includes sections addressing aspects such as symptom management and care provision, organization of care in different settings, care in specific disease groups, palliative care emergencies, ethics, public health approaches and research in palliative care. This new Textbook will be of value to practitioners in all disciplines and professions where the care of people approaching death is important, specialists as well as non-specialists, in any setting where people with serious advanced illnesses are residing. It is also an important resource for researchers, policy and decision-makers at national or regional levels. Neither the science nor the art of palliative care will stand still so the Editors and contributors from all over the world aim to keep this Textbook updated so that the reader can find new evidence and approaches to care.

It focuses on the place and function of human rights in democracies in modern society. What Is a Human? John H. Evans, 2016-07-01 What is a human? Are humans those with human DNA, those in possession of traits like rationality, or those made in the image of God? The debate over what makes human beings unique has raged for centuries. Many think that if society accepts the wrong definition of what it is to be human, people will look at their neighbor as more of an animal, object, or machine-making maltreatment more likely. In the longest running claim, for over 150 years critics have claimed that taking a Darwinist definition results in people treating each other more like animals. Despite their seriousness, these claims have never been empirically investigated. In this groundbreaking book John H. Evans shows that the definitions promoted by biologists and philosophers actually are associated with less support for human rights. Members of the public who agree with these definitions are less willing to sacrifice to stop genocides and are more supportive of buying organs from poor people, of experimenting on prisoners against their will, and of torturing people to potentially save lives. It appears that the critics are right. However, Evans finds that few Americans agree with these academic definitions. Looking at how most of the public defines humanity, we see a much more nuanced picture. In a fascinating account, he shows that the dominant definitions are unlikely to lead to human rights abuses. He concludes that the critics are right about the definitions of a human promoted by academic biologists and philosophers, and are therefore justified in their vigilance. However, because at present few Americans agree with these definitions, the academic definitions would have to spread much more extensively before impacting how the general public acts. Evans' book is a major corrective to the more than century-long debate about the impact of definitions of a human.

The Bloomsbury Reader in Religion, Sexuality, and Gender Donald L. Boisvert, Carly Daniel-Hughes, 2016-11-03 How do religion, gender and sexuality interact? How have they impacted, and continue to impact, human culture? The Bloomsbury Reader in Religion, Sexuality and Gender brings together, for the first time, the key texts in the field. Designed as a textbook for use in a classroom setting, it offers thought-provoking selections of some of the most compelling and timely readings available today. The Reader is divided into three parts (bodies; desires; performances). Each considers, from a

thematic perspective, the ways in which people have made sense of their religious and sexual experiences, the ways they imagine and talk about gender, sex and the sacred, and the multiple meanings they ascribe to them. Traditions represented include indigenous spiritualities, Christianity, Judaism, Islam, Asian traditions and new religious movements. Some readings are more theoretical or historical in nature, thereby providing wide-ranging contexts for reflection and discussion. The reader includes extensive introductions to the book as a whole and to each of the three parts, as well as short paragraphs contextualizing each of the readings. Each section includes discussion questions for classroom use; additional readings and resources, as well as a glossary of key terms, are also provided. The Bloomsbury Reader in Religion, Sexuality and Gender is an ideal resource for courses on religion and sexuality, religion and gender, or religion and contemporary culture more generally.

It offers readers an examination of the interplay between communication law and ethics and the role played by communication professionals in protecting individuals' rights to communication. Distinguished authors Loreto Corredoira, Ignacio Bel Mallén and Rodrigo Cetina Presuel walk readers through the fundamental ideas and concepts that represent universal common ground regarding communication rights. The Handbook of Communication Rights, Law, and Ethics provides readers with: A diverse, global perspective on how communication rights are protected and challenged around the world A universal vision of communication rights that encourages dialogue rather than confrontation A comparison of the American First Amendment of the Constitution with European communication rights theories and other legal traditions around the world An exploration of the frontiers of communication rights concepts, terminology, jurisdiction, and territoriality Perfect for professors, graduate students, doctoral students, and postdoctoral researchers studying communication rights and freedom of expression around the world, The Handbook of Communication Rights, Law, and Ethics also belongs on the bookshelves of researchers studying issues surrounding freedom of the press in North America, Europe, and Latin America.

As If Peoples Mattered Zelim Skurbaty, 2021-11-22 Ours is an era of decline for the nation state and one of world-wide concern for the problems surrounding sub-state groups: minorities, peoples and indigenous populations. The often violent resurgence of conflicts between these groups and States in even the stable democracies poses a challenge to international law as well as to liberal political principles. In this volume, an expert in international minority rights provides not only significant clarification of the legal issues involved, but also trenchant insights taken from a wide range of humanitarian disciplines: from philosophy and systems theory to neuro-linguistic programming (NLP) and transactional analysis (TA). The result is a meticulously researched book exploring from a variety of perspectives the terms ‘peoples’ and ‘minorities’ in international law as well as relationships between minorities, peoples and indigenous rights, individuation and self-determination. Of special interest is the attempt of the author to explain the existence of double standards in international minority rights (dubbing them ‘games’) with the help of transactional analysis, and to redefine and reframe the basic terms such as ‘international law’, ‘sovereignty’, ‘self-determination’, etc. The straightforward claim of the author is that the proposed theories can help both members of minorities and those in executive positions to gain insights on the cognitive level and make more congruent, community-oriented decisions on the practical level. The book will hold particular appeal for all those interested in the international law of human rights, politics and philosophy, as well as students seeking a multi-disciplinary perspective on these much-debated areas.
