A History of the World in 12 Maps Jerry Brotton,2013-11-14 A New York Times Bestseller "Maps allow the armchair

traveler to roam the world, the diplomat to argue his points, the ruler to administer his country, the warrior to plan his campaigns and the propagandist to boost his cause... rich and beautiful.” - Wall Street Journal Throughout history, maps have been fundamental in shaping our view of the world, and our place in it. But far from being purely scientific objects, maps of the world are unavoidably ideological and subjective, intimately bound up with the systems of power and authority of particular times and places. Mapmakers do not simply represent the world, they construct it out of the ideas of their age. In this scintillating book, Jerry Brotton examines the significance of 12 maps - from the almost mystical representations of ancient history to the satellite-derived imagery of today. He vividly recreates the environments and circumstances in which each of the maps was made, showing how each conveys a highly individual view of the world. Brotton shows how each of his maps both influenced and reflected contemporary events and how, by considering it in all its nuances and omissions, we can better understand the world that produced it. Although the way we map our surroundings is more precise than ever before, Brotton argues that maps today are no more definitive or objective than they have ever been. Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again. “A fascinating and panoramic new history of the cartographer’s art.” - The Guardian “The intellectual background to these images is conveyed with beguiling erudition.... There is nothing more subversive than a map.” - The Spectator “A mesmerizing and beautifully illustrated book.” —The Telegraph

Mapping America Jean-Pierre Isbouts, Neal Asbury,2021-06-15 The story of the exploration and birth of America is told afresh through the unique prism of hand-colored maps and engravings of the period. Before photography and television, it was printed and hand-colored maps that brought home the thrill of undiscovered lands and the possibilities of exploration, while guiding armies on all sides through the Indian Wars and the clashes of the American Revolution. Only by looking through the prism of these maps, can we truly understand how and why America developed the way it did. Mapping America illuminates with scene-setting text and more than 150 color images—from the exotic and fanciful maps of Renaissance

explorers to the magnificent maps of the Golden Age and the thrilling battle-maps and charts of the American Revolutionary War, in addition to paintings from the masters of eighteenth century art, scores of photographs, and detailed diagrams. In total, this informative and lushly illustrated volume developed by rare maps collector Neal Asbury, host of “Neal Asbury’s Made in America,” and National Geographic historian Jean-Pierre Isbouts offers a new and immersive look at the ambition, the struggle, and the glory that attended and defined the exploration and making of America.

Exploration Map by Map DK,2025-05-06 Discover the epic history of human exploration and migration, and the stories of fearless pioneers the world over, with this stunning tour of history - map by map. Charting everything from the movement of early Homo species out of Africa some 1.8 million years ago to the astonishing voyages of Polynesian sailors across the Pacific from 4,000 BCE, and from the California Gold Rush to the Race for Space, entries explain the movements of people and cultures who set off into the unknown - in search of adventure or a better life. Specially commissioned maps show the key driving factors of each journey, and why certain routes were chosen over others - whether due to climate, terrain, or territory - while stunning contemporary examples offer fascinating insights into the unique world-views and political motivations of the people who commissioned them, and the cartographers who created them. The voyages of history’s greatest explorers - from Zheng He to Ibn Battuta and Marco Polo - are brought to vivid life with accompanying photos, illustrations, and original artefacts, along with recent missions to chart the depths of the oceans and the surface of Mars. And entries also explore the experiences of established Indigenous groups and the impact of settler populations. Packed with fascinating detail and bursting with lavish illustrations, *Exploration: Map by Map* is a must-have title for anyone who loves maps, history, or the pioneering spirit.

Reference and Information Sources and Services for Children and Young Adults Lesley S.J. Farmer,2022-09-01 Reference and information services are more important than ever for today’s young people. By analyzing key features of reference and information services to young people in school and public library environments, including the research behind the trends and issues, librarians can make sure that those services are appropriately responsive to children and teens. Based on standards and evidence-based practice, this book helps you to optimize those resources and services by: providing guidance in assessing youth communities, determining youth’s information needs and information behaviors, developing and maintaining age-appropriate reference collections (starting with the book’s core list of print and online resources), optimizing physical and virtual access to reference and information sources, interacting with youth and facilitating their reference and information literacy skills, curating and producing reference and information products, dealing with relevant legal and ethical issues, and planning effective library reference and information services for youth. Chapter sidebar examples provide food for thought.

Maps of Medieval Thought Naomi Reed Kline,2003 Mappa mundi texts and images present a panorama of the medieval

world-view, c.1300; the Hereford map studied in close detail. Filled with information and lore, mappae mundi present an encyclopaedic panorama of the conceptual landscape of the middle ages. Previously objects of study for cartographers and geographers, the value of medieval maps to scholars in other fields is now recognised and this book, written from an art historical perspective, illuminates the medieval view of the world represented in a group of maps of c.1300. Naomi Kline's detailed examination of the literary, visual, oral and textual evidence of the Hereford mappa mundi and others like it, such as the Psalter Maps, the 'Sawley Map, and the Ebstorf Map, places them within the larger context of medieval art and intellectual history. The mappa mundi in Hereford cathedral is at the heart of this study: it has more than one thousand texts and images of geographical subjects, monuments, animals, plants, peoples, biblical sites and incidents, legendary material, historical information and much more; distinctions between real and fantastic are fluid; time and space are telescoped, presenting past, present, and future. Naomi Kline provides, for the first time, a full and detailed analysis of the images and texts of the Hereford map which, thus deciphered, allow comparison with related mappae mundi as well as with other texts and images. NAOMI REED KLINE is Professor of Art History at Plymouth State College.

Henricus Martellus's World Map at Yale (c. 1491) Chet Van Duzer, 2018-08-03 This book presents groundbreaking new research on a fifteenth-century world map by Henricus Martellus, c. 1491, now at Yale. The importance of the map had long been suspected, but it was essentially unstudiable because the texts on it had faded to illegibility. Multispectral imaging of the map, performed with NEH support in 2014, rendered its texts legible for the first time, leading to renewed study of the map by the author. This volume provides transcriptions, translations, and commentary on the Latin texts on the map, particularly their sources, as well as the place names in several regions. This leads to a demonstration of a very close relationship between the Martellus map and Martin Waldseemüller's famous map of 1507. One of the most exciting discoveries on the map is in the hinterlands of southern Africa. The information there comes from African sources; the map is thus a unique and supremely important document regarding African cartography in the fifteenth century. This book is essential reading for digital humanitarians and historians of cartography.

All Over the Map Betsy Mason, Greg L. Miller, 2018 Created for map lovers by map lovers, this rich book explores the intriguing stories behind maps across history and illuminates how the art of cartography thrives today. In this visually stunning book, award-winning journalists Betsy Mason and Greg Miller--authors of the National Geographic cartography blog All Over the Map--explore the intriguing stories behind maps from a wide variety of cultures, civilizations, and time periods. Based on interviews with scores of leading cartographers, curators, historians, and scholars, this is a remarkable selection of fascinating and unusual maps. This diverse compendium includes ancient maps of dragon-filled seas, elaborate graphics picturing unseen concepts and forces from inside Earth to outer space, devious maps created by spies, and maps from pop culture such as the schematics to the Death Star and a map of Westeros from Game of Thrones. If your brain craves maps--

and Mason and Miller would say it does, whether you know it or not--this eye-opening visual feast will inspire and delight.

Ships on Maps Richard W. Unger,2010-08-04 Renaissance map-makers produced ever more accurate descriptions of geography, which were also beautiful works of art. They filled the oceans Europeans were exploring with ships and to describe the real ships which were the newest and best products of technology. Above all the ships were there to show the European conquest of the seas of the world.

Fifteenth Century England a Comprehensive Chronology WM. E. Baumgaertner,2021-03-02 This is the first volume (of what will likely be four volumes) of a comprehensive chronological history of fifteenth century England. It begins in 1397, a necessary prelude to the rise of Henry IV, and carries through to 1509 and the death of Henry VII. The series includes inter-related chronologies of Scotland, Wales, Ireland, France, Burgundy and Brittany. Volume I covers from 1397 and the last few years of the reign of Richard II, through the entire reigns of Henry IV and Henry V, and ends a few months into the reign of Henry VI (1422). In the process, it covers wars, usurpations, land and naval battles, parliaments and great council meetings, and the lives and deaths of many hundreds of prominent English, Welsh, Scottish, Irish, French, Burgundian and Breton persons.

A History of America in 100 Maps Susan Schulten,2018-09-21 Throughout its history, America has been defined through maps. Whether made for military strategy or urban reform, to encourage settlement or to investigate disease, maps invest information with meaning by translating it into visual form. They capture what people knew, what they thought they knew, what they hoped for, and what they feared. As such they offer unrivaled windows onto the past. In this book Susan Schulten uses maps to explore five centuries of American history, from the voyages of European discovery to the digital age. With stunning visual clarity, *A History of America in 100 Maps* showcases the power of cartography to illuminate and complicate our understanding of the past. Gathered primarily from the British Library's incomparable archives and compiled into nine chronological chapters, these one hundred full-color maps range from the iconic to the unfamiliar. Each is discussed in terms of its specific features as well as its larger historical significance in a way that conveys a fresh perspective on the past. Some of these maps were made by established cartographers, while others were made by unknown individuals such as Cherokee tribal leaders, soldiers on the front, and the first generation of girls to be formally educated. Some were tools of statecraft and diplomacy, and others were instruments of social reform or even advertising and entertainment. But when considered together, they demonstrate the many ways that maps both reflect and influence historical change. Audacious in scope and charming in execution, this collection of one hundred full-color maps offers an imaginative and visually engaging tour of American history that will show readers a new way of navigating their own worlds.

The World Through Maps John R. Short,2003 An illustrated history of maps and mapmaking, including reproductions of 200 antique maps.

Encyclopedia of Geography Barney Warf, 2010-09-21 Simply stated, geography studies the locations of things and the explanations that underlie spatial distributions. Profound forces at work throughout the world have made geographical knowledge increasingly important for understanding numerous human dilemmas and our capacities to address them. With more than 1,200 entries, the Encyclopedia of Geography reflects how the growth of geography has propelled a demand for intermediaries between the abstract language of academia and the ordinary language of everyday life. The six volumes of this encyclopedia encapsulate a diverse array of topics to offer a comprehensive and useful summary of the state of the discipline in the early 21st century. Key Features Gives a concise historical sketch of geography's long, rich, and fascinating history, including human geography, physical geography, and GIS Provides succinct summaries of trends such as globalization, environmental destruction, new geospatial technologies, and cyberspace Decomposes geography into the six broad subject areas: physical geography; human geography; nature and society; methods, models, and GIS; history of geography; and geographer biographies, geographic organizations, and important social movements Provides hundreds of color illustrations and images that lend depth and realism to the text Includes a special map section Key Themes Physical Geography Human Geography Nature and Society Methods, Models, and GIS People, Organizations, and Movements History of Geography This encyclopedia strategically reflects the enormous diversity of the discipline, the multiple meanings of space itself, and the diverse views of geographers. It brings together the diversity of geographical knowledge, making it an invaluable resource for any academic library.

The Social Life of Maps in America, 1750-1860 Martin Brückner, 2017-10-26 In the age of MapQuest and GPS, we take cartographic literacy for granted. We should not; the ability to find meaning in maps is the fruit of a long process of exposure and instruction. A "carto-coded" America — a nation in which maps are pervasive and meaningful — had to be created. The Social Life of Maps tracks American cartography's spectacular rise to its unprecedented cultural influence. Between 1750 and 1860, maps did more than communicate geographic information and political pretensions. They became affordable and intelligible to ordinary American men and women looking for their place in the world. School maps quickly entered classrooms, where they shaped reading and other cognitive exercises; giant maps drew attention in public spaces; miniature maps helped Americans chart personal experiences. In short, maps were uniquely social objects whose visual and material expressions affected commercial practices and graphic arts, theatrical performances and the communication of emotions. This lavishly illustrated study follows popular maps from their points of creation to shops and galleries, schoolrooms and coat pockets, parlors and bookbindings. Between the decades leading up to the Revolutionary War and the Civil War, early Americans bonded with maps; Martin Brückner's comprehensive history of quotidian cartographic

encounters is the first to show us how.

The Cartographic State Jordan Branch, 2014 This book describes the emergence of the territorial state and examines the role that cartography has played in shaping its linear boundaries.
