**Personal Responsibility Counselling And Therapy** Richard Nelson Jones, 2022-03-01 First Published in 1988. All counselling approaches are means to helping people stand on their own two feet and assume effective responsibility for their lives. Thus personal responsibility becomes an obvious integrating focus. Though the concept gets implicitly or explicitly emphasized in all existing theoretical positions, none has provided the deserved coverage. Focusing on personal responsibility is almost like focusing on one's nose. Though right in front of the face, the concept is not always easy to observe. This book aims at integration in a number of ways. It rejects the narrow 'my theory right or wrong' approach to counselling. Theoretical concepts and practical interventions are derived from a number of different sources, including the research literature. The book does not take a one-dimensional approach to behaviour in emphasizing people's actions alone. Instead it takes a three-dimensional approach emphasizing feelings, thoughts and actions.

**Making Peace with Anxiety and Depression** Amr Barrada, 2012-02-01 How often do you find yourself saying the following: I've got to stop being anxious; I've got to get over feeling depressed; Feeling this way just isn't right; There must be something terribly wrong with me; My thoughts are unacceptable; My feelings are abnormal; I have to get rid of my negative

thoughts and feelings. If you suffer from problems with anxiety and depression you are probably making similar comments to yourself on a regular basis, without realizing that these are some of the beliefs that are responsible for your emotional problems. The way you manage your emotional problems might be the very cause of your emotional problems. With proper guidance, you can validate and even embrace your negative emotions, as you resolve the issues causing the emotional pain. Making Peace with Anxiety and Depression will provide you with essential tools to help you see anxious and depressed feelings as normal and acceptable.

Unconscious Knowing and Other Essays in Psycho-Philosophical Analysis Linda Brakel, 2010-06-17 In 'Unconscious Knowing and Other Essays in Psycho-Philosophical Analysis', Linda Brakel tackles a range of fascinating and puzzling phenomena that lie at the border between psychoanalysis and philosophy of mind. These include - unconscious knowing, vagueness, agency, the placebo effect, and even explanation itself. Unique in its use of tools and concepts from both philosophy and psychoanalysis, the book demonstrates how this interdisciplinary approach can provide some unique solutions to some impenetrable problems. Following the introduction, chapter two on 'unconscious knowing' puts forward a radical epistemological view of knowledge and belief, providing evidence from psychoanalytic data and empirical research, using the subliminal method. Chapter three considers philosophical accounts of vagueness in relation to a-rational mentation, finding surprising similarities. In Chapter four, an original account of agency is developed whilst discovering that a central problem for analysands is quite analogous to an important philosophical problem: namely, when I am concerned with my own survival, just what is the nature of the 'me' of concern? In Chapter five the mysterious placebo effect is made more understandable in terms of the basic psychoanalytic concepts that are shown to underlie it. Finally, chapter six concludes the book with an examination of explanations in general, including those in the proceeding chapters. This is a book that will be of great interest to those within both psychoanalysis and philosophy of mind, offering up some compelling explanations for some puzzling phenomena.

*Universals Versus Particulars: The Ultimate Intellectual War* David Sinclair, 2022-01-29 There's a huge hole in how humanity thinks about reality. The problem is a very old one, but only a tiny group of philosophers ever took an interest in it. To the average person, it's an obscure and unfathomable issue. To the truly intelligent, it's the key to understanding existence. To clarify this issue is to get rid of so much junk in the way of humanity's ability to explain reality. If you consider yourself one of the smartest people in the world, you have to do what unintelligent people never do, and that's to become interested in the most rarefied topics, topics which seem absurd to the simple-minded, to the sort of people who aren't in the game of explaining reality and never could be. The topic of universals versus particulars is about as unlikely as it gets for understanding our existence, and yet that's exactly where we must look to find the ultimate answers. This debate allows us to make sense of a foundational problem of science: why science is totally dependent on mathematics even though the mathematical method contradicts the scientific method in every way. Mathematics is for thinking types (rationalists), science for sensing types (empiricists). These are two totally different types of people. Never get them confused. You have to choose a side. The supreme question is whether reality is scientific (material; particular; sensible) or mathematical (mental; universal; intelligible). To put it another way, is reality dead or alive? Is it a mechanism or an organism? Is it stupid, with no

purpose, as science says, or is it intelligent, and relentlessly calculating the answer to itself, and driving itself to perfect completion, as it must if it is mathematical? Are you smart enough to understand the answer? Most people aren't. According to Kurt Gödel, a global conspiracy has been in place for centuries to stop humanity from studying Leibniz, the supreme rationalist, and thus, through this neglect, to make men stupid. There might as well be a global conspiracy given how far mathematical rationalism has fallen in order to create space for scientific empiricism, its philosophical opposite. Scientists, the people of the senses, even claim to be champions of reason and logic. As if! It's time for the greatest paradigm shift of all: from scientific empiricism to mathematical rationalism, from sensing to thinking, from observation to logic, from matter to mind.

*Theoretical Models of Counseling and Psychotherapy* Kevin A. Fall, Janice Miner Holden, Andre Marquis, 2011-01-19 This text provides a comprehensive overview of a variety of major counseling theories and focuses on the integration of different theoretical models. Appropriate for advanced undergraduates and graduate students, it offers a detailed description of the philosophical basis for each theory, along with historical context and a biography of the founder. Each chapter follows a similar format and explores the main features of the theory, including its approach to and ideas on personality development, human nature, the role of environment, the change process in therapy, and contributions and limitations to the mental health field. Theory-specific information on diagnosis, psychopharmacology, multicultural issues, spirituality, and gender issues is also discussed. These features will provide students with a deeper and more complete understanding of counseling theory than is available in any single resource and allow them to easily bridge classroom study to their future practice. This second edition of the text has been completely updated and includes more case examples, as well as a new chapter on Constructivist approaches. An online instructor's manual with student resources is available and offers material to enhance the pedagogical features of the text.

The Ancient Chinese Super State of Primary Societies You-Sheng Li, 2010-06-04 The world has entered a new era that humans have never experienced before. Scholars predict that different cultures will replace nations to compete with each other to find a better way of life for humans. The modern world with a powerless United Nations as a platform for countries

to work out their difference at various levels in pretty much like the ancient Chinese super state of primary societies from 2200 BC to 476 BC when Taoist lifestyle was popular. If all human societies are divided into the genetically coded primary society and the man-made secondary society, Western civilization started with secondary societies while Chinese civilization started with primary societies. Taoist philosophy summarizes the lifestyle in the ancient primary society. Taoism emphasizes the value of naturalness and simplicity, which is well complimentary to the modern philosophy of materialism. This book contains 14 essays: The first one presents an outline and the remaining ones explore various aspects of Taoist philosophy in modern terms. The author has made every effort to accommodate both academic and general readers. There are four academic essays that all start with a summary, which allows general readers to know the main content if they decide to skip over the main part of the essay. The remaining essays provide a much lighter reading from the author's own experience to the lives his mother and grandmother had lived. \*\*\*\*\* Book Review By Kevin Brown FROM SAN FRANCISCO BOOK REVIEW Amazon Star Rating: 5 out of 5, ????? Has the world shrunk? Airlines can get us to places quicker than a dog can get fleas. Phones and computers make connecting to our neighbors faster and more reliable. Even with advancements like this, society and culture, as shared ideals, lag behind. Even moving to a new state in this country has certain social aspects that take time to learn. This book, The Ancient Chinese Super State of Primary Societies, is a deep personal discussion about the ramifications of Old World philosophy and New World modernism. The book is composed of 14 different essays, all centering on the topic of Chinese and European societies. The point, I feel, is not only to help people understand and respect Chinese philosophies more, but to explain why these concepts are still valid in our modern world. The book mainly consists of a compare and contrast of opinions that help prove You-Sheng Li's theses. One part talks about how the Chinese were more of a land-based people and Europeans were more oceanic; therefore Europeans were the explorers. There are interesting little nuggets inside each essay and it's a treat to read them all. Each essay is incredibly well cited, with notes and references listed at the end. It is always wonderful to see where a book gets its ideas. You-Sheng Li displays that he is one of the most certifiable person to write on this subject. With the writing style as direct as a surgeon, he is able to craft an engaging and thoughtful experience. The short essay also gives the book a quick and fun pace to the read. Each essay may be different, but each is as enjoyable as the next. With a wealth of information, this is one of the must-read books on this topic. \*\*\*\*\* Contents Preface and Key Terms Including a List of Chinese Dynasties 1\*\* (page 1, the same below) 1. **Grounded-Encounter Therapy** L. Alex Swan, 2013-10-03 Grounded Encounter Therapy is a discovery, intervention, and application approach which allows the theory which guides the process to be developed from an analysis of the situation or context, rather than imposed at the outset by the therapist. It is a dramatic contrast to psychological theories, particularly psychoanalysis, which impose a specific causal theory at the outset. In GET, on the other hand, the theory emerges from the client-defined context, not the other way around. The book introduces students and professionals an alternative to doing counseling and therapy. Traditional therapist see what they look for, and what they look for they see, and what they see is what their therapeutic modalities allow them to see, and what their therapeutic modalities allow them to see is what they treat.

**The Spirit Has Our Back** Ed Tommasino, 2019-10-30 How can we reconcile the troublesome current situation here on earth and the biblical promises of peace on earth? Can it be that most individuals simply ignore the biblical guidance for living, choose to function on their own, and operate without the benefits of knowing God's plan? With some study, all of us can develop a spiritual knowledge that leads to peace. Knowing that there is a Holy Spirit, a spirit that will relate to your spirit giving access to guidance available in no other way, a primary tool for developing your spiritual capacity in no way discounts God the Father or Jesus the Son, they complete the Trinity, specializing in other necessary spiritual actions.
