

Native American Mounds Michigan

Henry Gillman

The Mystic Symbol Henriette Mertz, 2004 An expanded edition of the original classic, long out-of-print, *The Mystic Symbol* describes thousands of Christian, inscribed tablets, unearthed across Michigan. The Michigan Mound Builders left behind 10,000 to 30,000 artifacts as a testament to their presence in North America. Mound burials have yielded evidence of a culture with Eastern Hemisphere influence in their spiritual and everyday life. Controversy has engulfed this find of artifacts mainly because they were here before Columbus of 1492 which is unacceptable to our academics today. Nevertheless, the Michigan artifacts continue to surface even today in the state of Michigan. This is fascinating look into North America's diverse history.

Western Michigan is home to some of the state's most picturesque places—and also some of its most chilling tales. Ghost story researcher Amberrose Hammond exposes the mysterious and spirit-ridden world of many beloved Michigan destinations as she skillfully weaves narratives of a world unseen by most. From the lingering spirit forever working in the Grand Theatre and the band of melon-headed children prowling the Saugatuck Dunes State Park to the lights of the Lake Forest Cemetery staircase waiting to reveal one's place in the afterlife, these tales are sure to give pause to anyone daring enough to experience these hauntingly beautiful spots . . . after dark.

Reconciliation in a Michigan Watershed Gail Gunst Heffner, David P. Warners, 2024-05-01 Like many American urban waterways, Ken-O-Sha has been in decline for nearly two hundred years. Once life-supporting, the waterway now known as Plaster Creek is life-threatening. In this provocative book, scholars and environmentalists Gail Gunst Heffner and David P. Warners explore the watershed's ecological, social, spiritual, and economic history to determine what caused the damage, and describe more recent efforts to repair it. Heffner and Warners provide insight into the concept of reconciliation ecology, as enacted through their group, Plaster Creek Stewards, who together with community partners refuse to accept the status quo of a contaminated creek unfit for children's play, severely reduced biological diversity, and environmental injustices. Their work reveals that reconciliation ecology needs to focus not only on repairing damaged human-nature relationships, but also on the relationships between people groups, including Indigenous North Americans and the descendants of European colonizers.

Native Americans, Archaeologists & the Mounds Barbara Alice Mann, 2003 Ever since European settlers stumbled upon the eighteenth-century mounds, explanations and interpretations of them - often ridiculous and seldom Native American - have appeared as sober scholarship. Today, the Native American Graves Protection and Repatriation Act of 1990 (NAGPRA) has intensified the debate over who «owns» the mounds - modern descendants of the Mound builders or Western archaeologists. *Native Americans, Archaeologists, and the Mounds* is the first cogent look at all the issues surrounding the mounds, their history, their preservation, and their interpretation. Using the traditions of those Natives descended from the Mound Builders as well as historical and archaeological evidence, Barbara Alice Mann placed the mounds in their native cultural context as she examines the fraught issues enveloping them in the twenty-first century.

The Lost History of Ancient America Frank Joseph,2016-10-24 The Lost History of Ancient America presents new evidence of transoceanic visitors to America, hundreds, even thousands, of years before Christopher Columbus was born. Its 20 eminent contributors are experts in a variety of fields, from botany, biology, and prehistoric engineering to underwater archaeology, archaeo-astronomy, and Bronze Age warfare. In ancient times, the sea was not an impassable barrier separating our ancestors from the outside world, but a highway taking them to every corner of it. Never before and nowhere else has so much evidence proving the impact made on America by overseas visitors been assembled. You will learn about: A chain of stonewalls across southern Illinois that has stood for the last two millennia. A profusion of plants flourishing throughout the United States and Canada that originated more than 20 centuries ago. Underwater ruins recently found off the coast of Oregon. Bronze Age oil wells in Pennsylvania. And much, much more. The Lost History of Ancient America ends the debate between cultural diffusionists--who have always known that our ancient ancestors did not consider the sea an impassable barrier--and cultural isolationists, who have been equally certain that humans lacked the know-how and courage for global navigation until a little more than 500 years ago.

Miskwabik, Metal of Ritual Amelia M. Trevelyan,2021-12-14 Miskwabik, Metal of Ritual examines the thousands of beautiful and intricate ritual works of art—from ceremonial weaponry to delicate copper pendants and ear ornaments—created in eastern North America before the arrival of Europeans. The first comprehensive examination of this 3,000-year-old metallurgical tradition, the book provides unique insight into the motivation of the artisans and the significance of these objects, and highlights the brilliance and sophistication of the early civilizations of the Americas. Comparing the ritual architecture and metallurgy of the original Americans with the ethnological record, Amelia M. Trevelyan begins to unravel the mystery of the significance of the objects as well as their special functions within the societies that created them. The book includes dozens of striking color and black and white photographs.

Chesterfield Township Alan Naldrett,2011 The first French explorers and missionaries came to the area that would later be known as Chesterfield Township around 1611, naming the dominant waterway Luc Sainte Claire. The first purchase of government land was made by Fabian Robertjean on August 20, 1820, in Section 11, near New Baltimore's Washington Street. In 1842, via Public Act 57, the Michigan State Legislature officially created the charter township of Chesterfield. Chesterfield is nestled between two old Michigan cities, New Baltimore and Mt. Clemens. The history of the township is closely aligned with these two cities, especially New Baltimore, with whom it has shared a post office from the time the New Baltimore Post Office was established in 1851 as Ashleyville (named for founder Alfred Ashley) and given its current name in 1855. New Baltimore was a part of Chesterfield until 1931, when it seceded from the township.

Archaeology in America Linda S. Cordell,Kent Lightfoot,Francis McManamon,George Milner,2008-12-30 The greatness of America is right under our feet. The American past—the people, battles, industry and homes—can be found not only in

libraries and museums, but also in hundreds of archaeological sites that scientists investigate with great care. These sites are not in distant lands, accessible only by research scientists, but nearby—almost every locale possesses a parcel of land worthy of archaeological exploration. Archaeology in America is the first resource that provides students, researchers, and anyone interested in their local history with a survey of the most important archaeological discoveries in North America. Leading scholars, most with an intimate knowledge of the area, have written in-depth essays on over 300 of the most important archaeological sites that explain the importance of the site, the history of the people who left the artifacts, and the nature of the ongoing research. Archaeology in America divides its coverage into 8 regions: the Arctic and Subarctic, the Great Basin and Plateau, the Great Plains and Rocky Mountains, the Midwest, the Northeast, the Southeast, the Southwest, and the West Coast. Each entry provides readers with an accessible overview of the archaeological site as well as books and articles for further research.

Norse America Gordon Campbell, 2021-03-25 The story of the Vikings in North America as both fact and fiction, from the westward expansion of the Norse across the North Atlantic in the tenth and eleventh centuries to the myths and fabrications about their presence there that have developed in recent centuries. Tracking the saga of the Norse across the North Atlantic to America, Norse America sets the record straight about the idea that the Vikings 'discovered' America. The journey described is a continuum, with evidence-based history and archaeology at one end, and fake history and outright fraud at the other. In between there lies a huge expanse of uncertainty: sagas that may contain shards of truth, characters that may be partly historical, real archaeology that may be interpreted through the fictions of saga, and fragmentary evidence open to responsible and irresponsible interpretation. Norse America is a book that tells two stories. The first is the westward expansion of the Norse across the North Atlantic in the tenth and eleventh centuries, settling in Greenland and establishing a shore station at L'Anse aux Meadows in Newfoundland (to which a chapter of the book is devoted) and ending (but not culminating) in a fleeting and ill-documented presence on the shores of the North American mainland. The second is the appropriation and enhancement of the westward narrative by Canadians and Americans who want America to have had white North European origins, who therefore want the Vikings to have 'discovered' America, and who in the advancement of that thesis have been willing to twist and manufacture evidence in support of claims grounded in an ideology of racial superiority.

Mound Builders and Monument Makers of the Northern Great Lakes, 1200-1600 Meghan C L Howey, 2012-11-20 Rising above the northern Michigan landscape, prehistoric burial mounds and impressive circular earthen enclosures bear witness

to the deep history of the region's ancient indigenous peoples. These mounds and earthworks have long been treated as isolated finds and have never been connected to the social dynamics of the time in which they were constructed, a period called Late Prehistory. In *Mound Builders and Monument Makers of the Northern Great Lakes, 1200-1600*, Meghan C. L. Howey uses archaeology to make this connection. She shows how indigenous communities of the northern Great Lakes used earthen structures as gathering places for ritual and social interaction, which maintained connected egalitarian societies in the process. Examining "every available ceramic sherd from every northern earthwork," Howey combines regional archaeological investigations with ethnohistory, analysis of spatial relationships, and collaboration with tribal communities to explore changes in the area's social setting from 1200 to 1600. During this time, cultural shifts, such as the adoption of maize horticulture, led to the creation of the earthen constructions. Burial mounds were erected, marking claims to resources and defining areas for local ritual gatherings, while massive circular enclosures were constructed as intersocietal ceremonial centers. Together, Howey shows, these structures made up part of an interconnected, purposefully designed cultural landscape. When societies incorporated the earthworks into their egalitarian social and ritual behaviors, the structures became something more: ceremonial monuments. The first systematic examination of earthen constructions in what is today Michigan, *Mound Builders and Monument Makers of the Northern Great Lakes, 1200-1600* reveals complicated indigenous histories that played out in the area before European contact. Howey's richly illustrated investigation increases our understanding of the diverse cultures and dynamic histories of the pre-Columbian ancestors of today's Great Lake tribes.

Company Towns of Michigan's Upper Peninsula Christian Holmes, 2015-06-15 In the company towns of Michigan's Upper Peninsula, a worker's boss did extra duty as landlord, store owner and constable. The on-site mill manager in Simmons, a town named after the furniture maker, even ran a successful baseball team. Built around iron mines and lumber concerns and directed by prominent entrepreneurs like Henry Ford, these industrial hamlets once lined the shores of Lakes Michigan and Superior. Author Christian Holmes uncovers rich stories of struggle and celebration as he explores the vestiges of these vanished communities and their lasting legacy in the identity of the Upper Peninsula.
