Bend Food: Stories of Local Farms and Kitchens Sara Rishforth ,2018-06-25 The views surrounding Bend don't exactly conjure notions of traditional farmland. Snowy mountains frame open vistas dotted with gnarled juniper trees and sagebrush. By day, the landscape is blanketed under a blazing sun, while cold nights bring relief beneath bright stars. Despite these extremes, agriculture thrives, thanks to the hard work of dedicated farmers and ranchers. Irrigated fields support bountiful crops at Fields Farm and Mahonia Gardens. Farmers' markets, most notably at NorthWest Crossing, bustle with people buying local produce, dairy, eggs, meat and honey. Visit places like the Great American Egg to learn about the business of raising chickens and Jackson's Corner for a delicious sample of what eating local tastes like. Author Sara Rishforth goes behind the scenes to present the story of the local farm-to-table movement.

Dietary Nutrients, Additives and Fish Health Cheng-Sheng Lee,2015-06-22 Fish nutrition can be the deciding factor between a robust and healthy farmed fish population and low aquaculture production. In an age where chemicals and antibiotics are under greater scrutiny than ever, a strong understanding of the role of nutrients and feed additives is essential in the aquaculture industry. Dietary Nutrients, Additives and Fish Health is a comprehensive review of dietary nutrients, antinutritional factors and toxins, and non-nutrient dietary additives, and their effects on fish performance and immune system function, as well as overall health. The book opens with an overview of fish immune systems and health. Subsequent chapters delve into proteins and amino acids, lipids and fatty acids, carbohydrates, beta glucans, vitamins, minerals, antinutrients, mycotoxins, nucleotides, prebiotics, probiotics, organic acids and their salts, and plant extracts and their impacts on fish health, growth, and development. The text then concludes with a chapter on feeding practices. Authored by leaders in aquaculture, Dietary Nutrients, Additives and Fish Health will be an invaluable resource to graduate students, researchers and professionals alike.

Nutrient Requirements of Fish and Shrimp National Research Council, Division on Earth and Life Studies, Board on

Agriculture and Natural Resources, Committee on the Nutrient Requirements of Fish and Shrimp, 2011-05-25 Aquaculture now supplies half of the seafood and fisheries products consumed worldwide and is gaining international significance as a source of food and income. Future demands for seafood and fisheries products can only be met by expanded aquaculture production. Such production will likely become more intensive and will depend increasingly on nutritious and efficient aquaculture feeds containing ingredients from sustainable sources. To meet this challenge, Nutrient Requirements of Fish and Shrimp provides a comprehensive summary of current knowledge about nutrient requirements of fish and shrimp and supporting nutritional science. This edition incorporates new material and significant updates to information in the 1993 edition. It also examines the practical aspects of feeding of fish and shrimp. Nutrient Requirements of Fish and Shrimp will be a key resource for everyone involved in aquaculture and for others responsible for the feeding and care of fish and shrimp. It will also aid scientists in developing new and improved approaches to satisfy the demands of the growing aquaculture industry.

Marine Ranching Food and Agriculture Organization of the United Nations, 2004-01-01 With coastal fisheries in decline around the world, there is growing concern about how long current sources of seafood can supply world needs. There is an increasing emphasis on restocking and aquaculture-based stock enhancement as a way to rapidly replenish depleted fish stocks and increase fishery landings. This publication contains case studies on the use of sea ranching and marine hatchery enhancement to generate income, re-establish fisheries and conserve aquatic biodiversity, including studies from Norway, Australia, the Pacific Islands, the Caspian Sea with an emphasis on Iran, and Japan.

To be achieved by 2030, the goals are organized around five core pillars: people, planet, prosperity, peace and partnership. As a member of the SDGs Publishers Compact, Frontiers is committed to advocating the themes represented by the SDGs and accelerating progress to achieve them. Nutrition sits at the heart of the SDGs. In addition to achieving ‘Zero Hunger’ (SDG2),

improvements in nutrition are critical to both achieve and reap the benefits of all seventeen global goals. With good nutrition comes improved health and wellbeing (SDG3), enhanced educational and work productivity (SDGs 4 and 8), less poverty (SDG1) and reduced inequalities (SDGs 5 and 10). And with stronger and more sustainable environments, communities, and technologies (SDGs 6, 7, 9, 11-17) improved food security and nutrition will follow. As part of an innovative collection showcasing nutrition in the context of the SDGs, this Research Topic will focus on Sustainable Development Goal 14: Life Below Water.
