Vincenzo Scamozzi and the Chorography of Early Modern Architecture AnnMarie Borys, 2017-07-05 The first English-language overview of the contributions to Renaissance architectural culture of northern Italian architect Vincenzo Scamozzi (1548-1616), this book introduces Anglophone architects and historians to a little-known figure from a period that is recognized as one of the most productive and influential in the Western architectural tradition. Ann Marie Borys presents Vincenzo Scamozzi as a traveler and an observer, the first Western architect to respond to the changing shape of the world in the Age of Discovery. Pointing out his familiarity with the expansion of knowledge in both natural history and geography, she highlights that his truly unique contribution was to make geography and cartography central to the knowledge of the architect. In so doing, she argues that he articulated the first fully realized theory of place. Showing how geographic thinking influences his output, Borys demonstrates that although Scamozzi's work was conceived within an established tradition, it was also influenced by major cultural changes occurring in the late 16th century.

The Court Cities of Northern Italy Charles M. Rosenberg, 2010-06-21 This volume examines the painting, sculpture, decorative arts, and architecture produced in nine important court cities of Italy during the course of the fourteenth, fifteenth, and sixteenth centuries. Although each chapter represents a separate study of a particular geographical locale, many common themes emerge. This volume gives a multifaceted consideration of the art created for princes, prelates, confraternities, and civic authorities - works displayed in public squares, private palaces, churches, and town halls. Including six essays specially commissioned that explore the interaction of artists and their civic and/or courtly patrons within the context of prevailing cultural, political, and religious circumstances, *The Court Cities of Northern Italy* provides a rich supplement to traditional accounts of the artistic heritage of the Italian Renaissance, which has traditionally focused on the Florentine, Venetian, and Roman traditions. The book includes 35 color plates and 221 black and white illustrations.

Reconstructing Theatre Architecture Susanna Clemente, 2022-05-05 The study is aimed at reconstructing the historical process at the base of any significant theatre architecture. The modern space for the show is no longer intended as a direct derivation from classical types, but as a product of the transformation of the urban fabric in our cities. The research was conducted at the academies, state and municipal historical archives of numerous towns, in particular Rome, Milan, Mantua, Ferrara, Venice, London and Prague. All images are original. The work also includes the list of about 700 major

Italian historical theatres.

The Politics of the Piazza Eamonn Canniffe, 2016-03-03 Through a detailed study of the principal spaces of Italian cities, this book explores the relationship between political systems and their methods of representation in architecture. Illustrated by contemporary photographs and analytical drawings, it examines significant piazzas and situates these examples in their social and political contexts, highlighting the urban evidence of shifts between autocratic and democratic forms of government through history. The ideological role of political architecture is analyzed through the work of various theorists including ancient sources, Renaissance thinkers and modern critics. The complex evolution of individual spaces over time is represented by their physical layering from ancient times to the present day. Other examples connect the development of different characteristic types of Italian urban form in chronological sequence, categorized by art historical and political periods.

Twelve Caesars Mary Beard, 2021-09-28 From the bestselling author of *SPQR: A History of Ancient Rome*, the fascinating story of how images of Roman autocrats have influenced art, culture, and the representation of power for more than 2,000 years. What does the face of power look like? Who gets commemorated in art and why? And how do we react to statues of politicians we deplore? In this book—against a background of today’s “sculpture wars”—Mary Beard tells the story of how for more than two millennia portraits of the rich, powerful, and famous in the western world have been shaped by the image of Roman emperors, especially the “Twelve Caesars,” from the ruthless Julius Caesar to the fly-torturing Domitian. *Twelve Caesars* asks why these murderous autocrats have loomed so large in art from antiquity and the Renaissance to today, when hapless leaders are still caricatured as Neros fiddling while Rome burns. Beginning with the importance of imperial portraits in Roman politics, this richly illustrated book offers a tour through 2,000 years of art and cultural history, presenting a fresh look at works by artists from Memling and Mantegna to the nineteenth-century American sculptor Edmonia Lewis, as well as by generations of weavers, cabinetmakers, silversmiths, printers, and ceramicists. Rather than a story of a simple repetition of stable, blandly conservative images of imperial men and women, *Twelve Caesars* is an unexpected tale of changing identities, clueless or deliberate misidentifications, fakes, and often ambivalent representations of authority. From Beard’s reconstruction of Titian’s extraordinary lost *Room of the Emperors* to her reinterpretation of Henry VIII’s famous *Caesarian* tapestries, *Twelve Caesars* includes fascinating detective work and offers a gripping story of some of the most challenging and disturbing portraits of power ever created. Raphael’s Ostrich Una Roman D’Elia, 2016-04-27 Raphael’s *Ostrich* begins with a little-studied aspect of Raphael’s painting—the ostrich, which appears as an attribute of Justice, painted in the Sala di Costantino in the Vatican. Una Roman

D'Elia traces the cultural and artistic history of the ostrich from its appearances in ancient Egyptian hieroglyphs to the menageries and grotesque ornaments of sixteenth-century Italy. Following the complex history of shifting interpretations given to the ostrich in scientific, literary, religious, poetic, and satirical texts and images, D'Elia demonstrates the rich variety of ways in which people made sense of this living "monster," which was depicted as the embodiment of heresy, stupidity, perseverance, justice, fortune, gluttony, and other virtues and vices. Because Raphael was revered as a god of art, artists imitated and competed with his ostrich, while religious and cultural critics complained about the potential for misinterpreting such obscure imagery. This book not only considers the history of the ostrich but also explores how Raphael's painting forced viewers to question how meaning is attributed to the natural world, a debate of central importance in early modern Europe at a time when the disciplines of modern art history and natural history were developing. The strangeness of Raphael's ostrich, situated at the crossroads of art, religion, myth, and natural history, both reveals lesser-known sides of Raphael's painting and illuminates major cultural shifts in attitudes toward nature and images in the Renaissance. More than simply an examination of a single artist or a single subject, Raphael's Ostrich offers an accessible, erudite, and charming alternative to Vasari's pervasive model of the history of sixteenth-century Italian art.
