Hit the Headlines Colin Macfarlane, 2012-05-16 Hit the Headlines charts out a series of fun and inspiring, cross-curricular journalism workshops that enhance key skills and confidence in areas such as: Writing and editing. Critical assessment. Interviewing and observation. Mental flexibility and resourcefulness. Role-playing and teamwork. This book will enable teachers of 9 - 15 year-olds to involve their students in a number of effective and well-tested exercises, games and scenarios, which will encourage them into enthusiastically seeking out and gaining further knowledge in areas such as news, journalism, social issues, IT, data assessment, 'intelligent observation', and enhanced questioning and listening. This is 'organic learning' at its best! An introduction to the theory behind the book summarises short and long term learning outcomes which your students can achieve through these methods, explaining why scenarios which feel 'real' can immerse students and inspire them to achieve greater proficiency. The author also flags up particular aspects of the book which encourage readers to read and use it systematically, as well as to take on specific challenges themselves in order to better assist their students in the writing and editing challenges it contains. Practical photocopiable templates for many chapters are provided, which can be used as classroom (and out-of classroom) exercises, examples and solutions to exercises. Through these engrossing journalistic scenarios, students will learn how to critically assess levels of 'interest and importance' of diverse facts, and so begin to understand that report or presentation writing of any sort involves sequencing a critical balance between these two factors. Readers and users of this book can go on to customise their own scenarios, drawing on the stimulating techniques outlined to improve their students' factual writing and related thinking skills. In particular, classroom teachers in primary, middle and secondary schools and all literacy co-ordinators will find this book extremely useful, as well as students studying for PGCEs and NQTs.

Writing Facts Susanne Knaller, 2023-01-02 »Fact« is one of the most crucial inventions of modern times. Susanne Knaller discusses the functions of this powerful notion in the arts and the sciences, its impact on aesthetic models and systems of knowledge. The practice of writing provides an effective procedure to realize and to understand facts. This concerns preparatory procedures, formal choices, models of argumentation, and narrative patterns. By considering »writing

facts« and »writing facts«, the volume shows why and how »facts« are a result of knowledge, rules, and norms as well as of description, argumentation, and narration. This approach allows new perspectives on »fact« and its impact on modernity.

Why Read the Classics? Italo Calvino,2014-12-16 This collection of essays by the acclaimed author of *Cosmicomics* offers a fascinating, personal journey through some of literature's greatest works. Classics, according to Italo Calvino, are not only works of enduring cultural value, but also personal touchstones. They are the books we are always rereading in order to understand our world and ourselves. Here, Calvino introduces more than thirty works from his own ideal library in essays of warmth, humor, and striking insight. He discusses great authors ranging from Homer to Jorge Luis Borges, and from Charles Dickens to the Persian folklorist Nezami. Whether tracing the links between Ovid's *Metamorphoses* and Alain Robbe-Grillet's objectivity, discovering the origins of science fiction in the writings of Cyrano de Bergerac, or convincing us that the Italian novelist Carlo Emilio Gadda's works are like artichokes, Calvino offers a new perspective on beloved favorites and introduces us to hidden gems. "This book serves as a welcome reminder that the great works are great because they can mean so much to readers, and Calvino is a most knowledgeable guide to all the best destinations."—San Francisco Chronicle
