Reablement in Long-Term Care for Older People Tine Rostgaard, John Parsons, Hanne Tuntland, 2024-05-14 This book introduces reablement, a radical new integrated care approach which seeks to empower older people to regain and maintain functioning and independence.

Reablement Services in Health and Social Care Valerie Ebrahimi, Hazel Chapman, 2018-03-16 This ground-breaking text book introduces the theoretical underpinnings and practical considerations of the growing area reablement. With contributions from a number of professions including occupational therapy, nursing and social work this book encourages and supports collaborative working. It also offers service user, carer and support worker perspectives, in order to offer a rounded introduction to effective reablement practices. *Reablement Services in Health and Social Care* develops the knowledge and understanding of students in this field on a wide range of courses – from nursing and occupational therapy to social work, physiotherapy and beyond. It may also appeal to support staff and associated professionals already working in reablement services and associated fields of enquiry.

Ageing in Australia Kate O'Loughlin, Colette Browning, Hal Kendig, 2016-11-18 This stimulating volume examines the many faces of Australia's ageing population, the social and health issues they contend with, and the steps being taken—and many that should be taken—to help ensure a more positive and productive later life. Individual and societal ageing are conceptualized as developmental in nature, socially diverse, and marked by daily life challenges stemming from the country's economic structures, attitudes, geography, political landscape, and infrastructure. Wide-ranging coverage (e.g., health, inequalities, employment, transportation) assesses options available to older people, and the role of families, employers, service providers, government agencies, and others in promoting or expanding those choices. The book's double emphasis on challenges in older people's lives and opportunities for enhancing their quality of life is on clear display as case studies examine policy issues—and propose solutions—in a societal and individual context. Included in the coverage:

- Australian developments in ageing: issues and history.
- Cultural diversity, health, and ageing.
- Indigenous Australians and ageing: responding to diversity in policy and practice.
- Enhancing the health and employment participation of older workers.
- Housing and the environments of ageing.
- Health services and care for older people.

The rich examples in *Ageing in Australia* contain a depth of understanding and evidence for sociologists, gerontologists and psychologists studying ageing,

health care professionals providing care to older people, and policy analysts assessing areas for improvement.

Rehabilitation Goal Setting Richard J. Siegert, William M. M. Levack, 2014-07-10 Written to provide clinicians, educators, researchers, and students in rehabilitation with a comprehensive overview of the theory, practice, and evidence base of goal setting, this first-of-its-kind reference provides an authoritative, state-of-the-art knowledge of the practice. The authors cover a broad range of different approaches to goal setting, with input from experts from North America, Europe, and Australia. This book is applicable to patients with stroke, traumatic brain injury, neurological disorders, spinal cord injury, and other conditions.

Quantitative Research Methods for Social Work Barbra Teater, John Devaney, Donald Forrester, 2017-09-16 Quantitative research makes a very important contribution to both understanding and responding effectively to the problems that social work service users face. In this unique and authoritative text, a group of expert authors explore the key areas of data collection, analysis and evaluation and outline in detail how they can be applied to practice.

Geriatric Medicine and Elderly Care Claire G. Nicholl, K. Jane Wilson, Shaun D'Souza, 2025-02-10 GERIATRIC MEDICINE AND ELDERLY CARE Lecture Notes Ninth Edition An essential resource for meeting the needs of an ageing patient population As the global population ages, geriatric medicine is steadily becoming one of the most important areas of medical research and care. Healthcare systems in developed countries are adapting to this shift in the population, and doctors are finding that a larger and larger proportion of their patients are older. Current medical training often does not include adequate coverage of geriatric medicine, and students may well find they require more extensive resources for meeting older patients' needs. Lecture Notes: Geriatric Medicine and Elderly Care meets this need with a set of comprehensive but straightforward introductions to the foundational concepts of geriatric medicine. Combining a user-friendly format with extensive high-quality figures and illustrations, it is a must-have resource for medical students looking to deepen their knowledge of a widening area of essential care. Now thoroughly revised and updated to reflect the latest research and medical knowledge of ageing and elder care, this is an essential contribution to the popular Lecture Notes series. Readers of the ninth edition of Lecture Notes: Geriatric Medicine and Elderly Care will also find: New chapters on the 'science of ageing' including immunosenescence and rejuvenation research, and geriatric oncology Full coverage of the British Geriatrics Society and European undergraduate curriculums A companion website with appendices, key revision points for each chapter and further readings Lecture Notes: Geriatric Medicine and Elderly Care is ideal for medical students and Foundation Year doctors in most specialties who are treating frail older people. It also provides a starting point for revision for higher specialty examinations in geriatric medicine. Anki Revision Cards A set of 'Anki App' digital revision cards is available to go with this textbook. The cards contain the material from the self-test questions in the book. Anki App is a cross-platform mobile and desktop flashcard app that can support your studies (see www.ankiapp.com). It uses an algorithm to

present cards you know less well more frequently. You can keep the cards on your mobile device and study them in your downtime. Visit www.lecturenoteseries/paediatrics to download the card set to your device.

Long-term Care for the Elderly in Europe Bent Greve, 2016-12-01 Long-term care is an increasingly important issue in many contemporary welfare states around the globe given ageing populations. This ground-breaking book provides detailed case studies of 11 EU-member states' welfare regimes within Europe to show how welfare states organize, structures and deliver long-term care and whether there is a social investment perspective in the delivery of long-term care. This perspective is important because the effect of demographic transitions is often used as an argument for the existence of economic pressure on welfare states and a need for either direct retrenchment or attempts to reduce welfare state spending. The book's chapters will look specifically into how different welfare states have focussed on long-term care in recent years and what type of changes have taken place with regard to ageing populations and ambitions to curb increases in public sector spending in this area. They describe the development in long-term care for the elderly after the financial crisis and also discuss the boundaries between state and civil society in the different welfare states' approaches to the delivery of care.

The Art and Science of Personalising Care with Older People with Diabetes Trisha Dunning, 2018-08-06 This unique book is intended for all health professionals caring for older people with diabetes such as specialist and general nurses, doctors, primary care practitioners and dietiticians. Although there is an increasing body of work about personalised care, no publications were identified that encompass the focus and scope of the proposed book. The global population is ageing and increasing age is a key risk factor for diabetes. Older people with diabetes are often vulnerable, have complex care needs and often have cognitive changes, which makes personalising care challenging for health professionals. Thus, this is an internationally relevant book filling a gap in the current literature. This is a practical and updated book that will use an engaging and easy to read narrative style. It challenges readers to reflect in and on their practice. It encompasses people with diabetes' and authors' stories, which are known to have a special interest to readers, make it easier to apply the information to practice, enhance learning, and hence the relevance and value of the book. It is relevant to advocacy organisations as well as managers and service planners. Researchers and scientists may find relevant information on grant and ethics applications, research protocols, plain language statements for potential participants and operationalising research protocols.

Diabetes in Old Age Alan J. Sinclair, 2009-05-26 With over 10% of the elderly suffering from diabetes, this new edition Provides up-to-date and comprehensive information about the key aspects of managing older people with diabetes, predominantly Type 2 diabetes. an overview of the field of diabetes in the elderly, covering standard problems such as diagnosis and topics specific to the elderly such as falls, dementia and nursing home care. diabetes education and nutritional impairment in the el

Practice & Leadership in Nursing Homes JoAnne Reifsnnyder, Ann Kolanowski, Jacqueline Dunbar-Jacob, 2023-11-01
“This in-depth, evidence-based roadmap to high-quality care in nursing homes is a powerful compilation of the expertise of leaders in our field. This is a must-read!” -Heather M. Young, PhD, RN, FAAN, FGSA Professor, Betty Irene Moore School of Nursing, University of California, Davis “I highly recommend this exceptional book. It’s timely, comprehensive, and written by distinguished authors and interprofessional contributors who are among the very best in the field.” -Kathleen (Kitty) Buckwalter, PhD, RN, FAAN Professor of Research & Distinguished Nurse Scientist in Aging Donald W. Reynolds Center of Geriatric Nursing Excellence, College of Nursing Oklahoma University Health Sciences Center Professor Emerita, University of Iowa College of Nursing Long-term care settings are highly regulated environments where the emphasis historically has been on compliance. Many misconceptions persist about practice in nursing homes, and these go largely unaddressed within nursing education programs. Herein lines one of the significant barriers to improving nursing home care. Practice & Leadership in Nursing Homes dispels many misconceptions and provides a foundation for clinical practice in a unique, exciting setting—illustrating how high-quality nursing care can result in positive resident outcomes. This book challenges educators and students to look beyond incorrect perceptions and negative attitudes to see a vibrant, growing healthcare sector ripe for nurses to make an impact and build rewarding careers. Expert authors cover the following and more: · Comprehensive care planning · Models of care delivery · Common geriatric syndromes · Staff development and training · Nursing home financing and regulatory information ABOUT THE AUTHORS JoAnne Reifsnnyder, PhD, MSN, MBA, RN, FAAN, is Professor, Health Services Leadership and Management, at the University of Maryland School of Nursing. She has held executive and leadership roles in hospice, hospice-related medication management, and skilled nursing. Ann Kolanowski, PhD, RN, FAAN, is Professor Emerita at the Penn State Ross and Carol Nese College of Nursing and conducts research on nonpharmacological interventions for symptoms of distress and delirium in people living with dementia in nursing homes. Jacqueline Dunbar-Jacob, PhD, RN, FAAN, is Distinguished Service Professor and Dean Emeritus (Nursing) at the University of Pittsburgh. She was the founding Co-chair of the Implementation Steering Committee for the 2021 Essentials for the American Association of Colleges of Nursing.

Beyond Successful and Active Ageing Virpi Timonen, 2016-04-29 These days, the concept of successful and active aging has become near ubiquitous, deployed by policy makers and marketing professionals alike. Beyond Successful and Active Ageing argues that while this approach to aging may seem benign, it actually exacerbates inequalities among older populations. Virpi Timonen puts forth a new theory designed to make sense of the popularity of these concepts and enable readers to view them through the prism of model aging, a theory that sheds light on the causes and consequences of attempts to depict aging as a stage of life that requires direction, reshaping, and control.

A Comprehensive Guide to Rehabilitation of the Older Patient E-Book Shane O'Hanlon, Marie Smith, 2020-11-17

This book will help all health professionals involved in the rehabilitation of older people to provide their patients with the highest possible quality of life and autonomy. Advances in Social and Organizational Factors Peter Vink, 2020-07-19 An exploration of how ergonomics can contribute to the solution of important societal and engineering challenges, *Advances in Social and Organizational Factors* discusses the optimization of sociotechnical systems, including their organizational structures, policies, and processes. It includes coverage of communication, crew resource management, work design, design of working times, teamwork, participatory design,

community ergonomics, cooperative work, new work paradigms, organizational culture, virtual organizations, telework, and quality management. The book provides research on urban infrastructures and how to shape urban spaces, including stadiums and museums. It covers warning systems in cars, voice-based interfaces, and the positive effects on manufacturing processes available from health informatics and management systems. Several chapters examine the role human factors can play in counter-terrorism efforts and in interpreting deceptive behaviors. They provide suggestions on how to improve enterprise resource planning systems and stress the importance of lifelong learning, personalized learning, and work-life balance. The book also highlights issues with special populations, detailing how to design and adapt products and work situations for these groups. In addition to exploring the challenges faced in optimizing sociotechnical systems, the book underlines themes that play a role in all the challenges and how they are linked to each other. It concludes with an exploration of emotional ergonomics and the important positive effects of making people happy and healthy. With authors from around the globe, the book supplies a broad look at current challenges and possible solutions.

Older People: Improving Health and Social Care Bea L. Dijkman, Irma Mikkonen, Petrie F. Roodbol, 2018-11-11 This contributed volume is based on the European Core Competences Framework for health and social care professionals working with older people (ECCF), developed and verified in a unique international cooperation between 26 universities and universities of applied sciences in 25 European countries, part of the European Later Life Active Network (ELLAN). In addition to the framework, the book outlines the necessary qualifications and describes the roles of professionals working with older people in health and social services. It explores healthy ageing for older people from different perspectives and describes the seven roles of health and social care professionals (Expert, Communicator, Collaborator, Organizer, Health and Welfare Advocate, Scholar, and Professional), before going on to define 18 related competences and elaborating them in performance indicators. Beyond the ECCF, the book explains the widely used CanMED role model and puts forward theories to support a client centered and integrated approach on health and social care in order to change attitudes toward older clients and offer better care and support. It also provides health and social care professionals, for example nurses, allied health professionals and social workers with new contextual information and cultural awareness. It gives a voice to students by addressing selected perspectives for professional development. The book includes questions for reflective learning helping to make the book a vital practical instrument for use in the educational context throughout Europe. Europe's ageing populations represent a major challenge for both public health and social care systems. 18% of the population is 65 years old and over, and this proportion will increase in the coming years. As a result, more and more health and social care professionals will work with older people in different settings – at home, in the community, in hospitals or in long-term care settings. Older people, and especially the frail, face a host of interrelated issues, e.g. cognitive restrictions, functional restrictions, psychosocial problems, multimorbidity, polypharmacy and social isolation. These problems call for an integrated

approach to health and social care, which this book supplies. It is intended for health and social care professionals, students and educators, for a better understanding of Europe's ageing society and of the impact on care and services. Furthermore, the ECCF offers educational institutes a unique resource for curriculum development, education, training and assessment.

Integrated Care in Europe Arno van Raak, 2003 The book *Integrated Care in Europe* examines the provision of integrated care in Finland, Sweden, Austria, Spain, the Netherlands, and England. It is written by authors from these countries. Several target groups are described, but the elderly with multiple needs are the main focus. The country-specific chapters address the main characteristics of their care systems, and cover care sectors, funding, legislation and policy; the nature of integrated care (target groups, providers and services, organisational features of care delivery); promoting and inhibiting factors; a case description for illustrative purposes; and reflections. Taking the six countries as the basis the book compares and contrasts the countries, draws lessons, presents a number of useful tools, and makes a number of suggestions for further study and research. There is also an appendix with a checklist for managers interested in optimising integrated care.

Oxford Textbook of Old Age Psychiatry Tom Denning, Alan Thomas, 2013-09-26 Broad in scope and with global appeal The *Oxford Textbook of Old Age Psychiatry*, second edition is the definitive resource on old age psychiatry. It comprehensively provides the latest knowledge on the science and practice of treating later life mental disorders, focusing on the health and social issues that arise around ageing, dementia, co-morbidity, dependency, and the end of life in progressively ageing societies across the world. Published in previous incarnations as the much loved *Psychiatry in the Elderly*, this core resource for all old age psychiatrists, trainees, and other clinical professionals treating older people's mental health, has been fully revised, updated, and significantly expanded. Twelve months inclusive access to the online version, including the full text (which can be browsed by the contents list, index, or searched), links from references to external sources (via PubMed, ISI, and CrossRef), and the ability to download all figures and illustrations into PowerPoint ensures that it remains the leading text on old age psychiatry in the field. Maintaining the classic combination of comprehensive coverage, clear writing style, and the provision of authoritative and up-to-date information from earlier editions, this highly respected volume covers the underpinning basic science, both the neurobiological and social varieties, clinical practice, and specific disorders, as well as providing information on psychiatric services for older people, and medico-legal and ethical issues that often present hard challenges for those treating older patients. Taking a global approach by highlighting both the common burdens and the differences in management from country to country and with a much expanded cast of contributors providing a truly

international perspective, The Oxford Textbook of Old Age Psychiatry, second edition includes information on all the latest improvements and changes in the field. New chapters are included to reflect the development of old age care; covering palliative care, the ethics of caring, and living and dying with dementia. Existing chapters have also been revised and updated throughout and additional information is included on brain stimulation therapies, memory clinics and services, and capacity, which now includes all mental capacity and decision making. Providing extensive coverage and written by experts the field, the second edition of the Oxford Textbook of Old Age Psychiatry is an essential resource; no old age psychiatrist, trainee, or anyone working in the field of mental health care for older people should be without a copy on their bookshelf.

Disabling Barriers - Enabling Environments John Swain, Sally French, Colin Barnes, Carol Thomas, 2013-11-10 Since it was first published in 1993, Disabling Barriers, Enabling Environments has established itself as essential reading for anyone coming to the subject of disability studies. The book tackles a wide range of issues in numerous succinct chapters written by contributing authors, many of whom are disabled themselves. From the outset, the chapters take a multidisciplinary and international approach. The third edition is made up of 42 chapters, 15 of which are completely new to this edition, including:

- Early seminal writings in disabled studies
- Death and dying
- Psychology
- Hate crime and the criminal justice system
- Sport
- Psycho-emotional disablism and internal oppression.

This seminal textbook conveys the continuing developments in the lives and experiences of disabled people. It is valuable reading for students and professionals in the fields of social work, sociology, social policy, health and nursing as well as disabled people.
