

The Sheep Look Up

Ernest J. Yanarella

The Sheep Look Up John Brunner, 2014-04-01 Nebula Award Finalist: A “brilliantly crafted, engrossing” dystopian novel of environmental disaster by the Hugo Award-winning author of *Stand on Zanzibar* (The Guardian). In a near future, the air pollution is so bad that everyone wears gas masks. The infant mortality rate is soaring, and birth defects, new diseases, and physical ailments of all kinds abound. The water is undrinkable—unless you’re poor and have no choice. Large corporations fighting over profits from gas masks, drinking water, and clean food tower over an ineffectual, corrupt government. Environmentalist Austin Train is on the run. The “trainites,” a group of violent environmental activists, want him to lead their movement; the government wants him dead; and the media demands amusement. But Train just wants to survive. More than a novel of science fiction, *The Sheep Look Up* is a skillful and frightening political and social commentary that takes its place next to other remarkable works of dystopian literature, such as Margaret Atwood’s *The Handmaid’s Tale*, Aldous Huxley’s *Brave New World*, Ray Bradbury’s *Fahrenheit 451*, and George Orwell’s 1984.

The John Brunner Collection Volume One John Brunner, 2018-05-15 Three visionary sci-fi novels from the Hugo Award-winning author whose dystopian prescience made him “one of the most important” (SF Site). British science fiction master John Brunner remains one of the most influential and respected authors of all time, and now many of his classic works are being made available to new generations of readers. The very definition of timeless, Brunner’s skillful and often frightening political and social commentary takes its place alongside the most iconic works of Arthur C. Clarke, Aldous Huxley, Margaret Atwood, and George Orwell. *The Sheep Look Up*: In a near future of poison air and soaring health hazards, environmentalist Austin Train is on the run—from the insurrectionists who want him to lead and the government that wants him dead, in this Nebula Award Finalist. “An arresting diary of what’s in store for us.” —The Washington Post *The Crucible of Time*: On a planet hurtling precariously through space, an alien civilization struggles for generations against ice ages and catastrophic meteors while scientists slowly develop the technology that will ultimately save them. “Impeccably detailed, and beautifully thought out, even to the fascinating alien personalities, speech patterns, and thoughts: Brunner in top form.” —Kirkus Reviews, starred review *The Jagged Orbit*: In this Nebula Award Finalist, a journalist tries to expose the corrupt director of a mental hospital in a dystopian future where drug abuse, organized crime, and the inhumane treatment of anyone deemed “insane” have all but destroyed social order. “One of his most trenchant dystopias, yet it is as irresistible as it

is biting.” —SFReviews.net

Challenging Anthropocentrism in Eco-Science Fiction Novels Fatma Gamze Erkan, 2024-01-03 This book explores the relationship between humanity and nature while challenging the notion that anthropocentric behaviour causes the environmental catastrophes depicted in the four selected British eco-science fiction novels. These novels are John Christopher's *The Death of Grass* (1956), J. G. Ballard's *The Drought* (1965), Brian Aldiss's *Earthworks* (1965), and John Brunner's *The Sheep Look Up* (1972), all of which fictionalise the fact that the consequences of environmental problems can be diverse but equally serious. This book examines how even the smallest damage caused by human beings to the environment negatively affects them, other living beings, and the ecosystem they need to live and flourish. In conjunction with these, the factors and conditions that push characters in the novels to ignore and harm the environment are also scrutinised. While examining how and why the environmental problems in the novels have arisen, it is evaluated whether the authors propose solutions to these problems and, if so, what they are.

John Brunner Jad Smith, 2013-01-30 Under his own name and numerous pseudonyms, John Brunner (1934-1995) was one of the most prolific and influential science fiction authors of the late twentieth century. During his exemplary career, the British author wrote with a stamina matched by only a few other great science fiction writers and with a literary quality of even fewer, importing modernist techniques into his novels and stories and probing every major theme of his generation: robotics, racism, drugs, space exploration, technological warfare, and ecology. In this first intensive review of Brunner's life and works, Jad Smith carefully demonstrates how Brunner's much-neglected early fiction laid the foundation for his classic *Stand on Zanzibar* and other major works such as *The Jagged Orbit*, *The Sheep Look Up*, and *The Shockwave Rider*. Making extensive use of Brunner's letters, columns, speeches, and interviews published in fanzines, Smith approaches Brunner in the context of markets and trends that affected many writers of the time, including Brunner's uneasy association with the New Wave of science fiction in the 1960s and '70s. This landmark study shows how Brunner's attempts to cross-fertilize the American pulp tradition with British scientific romance complicated the distinctions between genre and mainstream fiction and between hard and soft science fiction and helped carve out space for emerging modes such as cyberpunk, slipstream, and biopunk.

John Brunner John Brunner, 2014-07-17 *THE SHEEP LOOK UP*: Environmentalist Austin Train is on the run. The

Trainites, environmental activists and sometime terrorists, want him to lead their movement. The government wants him in jail, or preferably, executed. The media wants a circus. Everyone has a plan for Train, but Train has a plan of his own. THE SHOCKWAVE RIDER: Nickie Haflinger had lived a score of lifetimes ... but technically he didn't exist. He was a fugitive from Tarnover, the high-powered government think tank that had educated him. First he had broken his identity code - then he escaped. THE TRAVELLER IN BLACK: This is a collection of stories of the Traveller in Black. It is set in a world where chaos rules. One man - the man with many names, but one nature - is charged with creating order out of the warring forces of nature.

The Cross, the Plow and the Skyline Ernest J. Yanarella,2022-03-01 The apocalyptic, pastoral, and urban traditions have fundamentally shaped Western history and influenced American religion, culture, and politics. This book argues that these traditions have not only been decisive in giving form and substance to classic and modern American literature, but have been appropriated by contemporary science fiction. As a loosely connected set of cultural narratives, the Cross, the Plow, and the Skyline have through the medium of science fiction and fantasy provided a bold vista on the future grounded in an emergent ecological imagination. In the expanded second edition of the original 2001 publication, the author argues that a significant shift has taken place in contemporary Anglo-American science fiction and fantasy (SF/F) from twentieth-century SF/F critically analyzed in the first edition's critical inquiry. Avantgarde works in twenty-first century speculative fiction--extensively examined in representative works in interludes separating the slightly revised original chapters--have become: darker in their visions of the possible future; more focused on slowness over breakneck speed; more amenable to gender, racial, and global diversity in authorship, plot, and subgenre creation; less attached to anchor concepts like the city, wilderness, and the domesticated landscape in plot development; more prone to dystopian and critical dystopian tropes; simultaneously more open toward, but critical of, Young Adult fiction; and more supportive of the breakdown of borders and antagonisms between science fiction and fantasy and SF/F and literary fiction. Ensconced in the cultural, social, and political zeitgeist of the New Millennium's first two decades, these features of twenty-first century science fiction and fantasy may yet settle into and inform emergent and pluralistic varieties of ecological politics spreading across the globe and confronting the Earth's social and environmental crises of our times and coming decades.

Historical Dictionary of Utopianism Toby Widdicombe, James M. Morris, Andrea Kross, 2017-06-21 Utopian thinking embraces fictional descriptions of how to create a better (but not a perfect) alternative way of life as well as intentional communities (that is, groups of people leading lives in small communities for their own betterment and the betterment of others). The first edition almost exclusively dealt with the intentional-community side of utopianism; this second edition offers a much more inclusive definition of the key term utopia by offering a great many entries devoted to describing fictional or literary utopian works. It is also heavily illustrated with plates from utopian works, especially those from the heyday of utopianism in the late nineteenth century. This second edition of *Historical Dictionary of Utopianism* contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 1000 cross-referenced entries on broad conceptual entries; narrower entries about specific works; and narrower entries about specific intentional communities or movements. This book is an excellent resource for students, researchers, and anyone wanting to know more about Utopianism.
