La conquista de México Iván Vélez, 2019-03-06 V Centenario del inicio de la Conquista de México. 1519-2019 En el V Centenario de la llegada de Cortés a México es imprescindible volver sobre aquellos hechos que las crónicas antiguas nos han legado. Lo ocurrido desde 1519 hasta la caída del Imperio mexica constituye el primer avance continental hispano en el Nuevo Mundo. Estos acontecimientos se han prestado a diversas mitificaciones que presentan a los españoles como una suerte de superhombres de relucientes corazas, pero también como a una banda depredadora que acabó con un mundo arcádico. Iván Vélez, con gran agudeza y sentido crítico, analiza los complejos aspectos —bélicos, jurídicos, económicos y religiosos— que acompañaron a la conquista, pero también al orden político que la sucedió. Una historia cruda, emocionante y extraordinaria sobre una de las más grandes aventuras que el mundo ha visto.

Estructura y conservación de las comunidades de aves en humedales del sudeste ibérico (Almería, España) Mariano Paracuellos Rodríguez, 2004-07-21 Desde 1990 a 2000 se analizaron diversos aspectos relacionados con la ecología de las comunidades de aves no Passeriformes y Passeriformes en los humedales de la provincia de Almería. Para ello se tuvo en cuenta, por un lado, el examen de la estructura fenológica de los agregados orníticos en función de los rasgos ambientales presentes en cada uno de los hábitats palustres más extendidos, como fueron los de aguas abiertas, saladar y carrizal, dado el gran vacío de información genérica existente. Una vez fueron tipificadas dichas comunidades, se abordaron cuestiones relacionadas con su conservación, en las que, debido al elevado valor ecológico de los humedales y a su grado de amenaza, se prestó un especial interés a la evaluación de diferentes variaciones ambientales y paisajísticas relacionadas con la fragmentación del hábitat en dichos entornos, valorándose posteriormente sus consecuencias sobre determinadas alteraciones en la estructura y composición de la avifauna que los habita. Se observaron máximos en aves durante la invernada o el período postnupcial del estiaje. Se explicó la distribución de la avifauna en las zonas palustres almerienses en función de las características intrínsecas de las últimas. Teniendo en cuenta la composición en aves acuáticas, se discriminaron dos conjuntos de localidades con diferentes rasgos bióticos y abióticos: el de las lagunas profundas y salobres/dulces con especies nadadoras-buceadoras como dominantes, así como el de las someras y salinas principalmente con vadeadoras, gaviotas y afines. Determinados humedales almerienses permanentes se conformaron probablemente como óptimos refugios para *Oxyura leucocephala* cuando las condiciones hídricas presentes en otros complejos usados tradicionalmente por la especie fueron precarias debido a la escasez de lluvias. Los hábitats de vegetación emergente más extendidos en los humedales analizados ostentaron comunidades orníticas simplificadas y bastante estacionales, dada la pobre complejidad estructural de los medios. Los cañaverales no parecieron sustituir adecuadamente a los carrizales en cuanto a composición avifaunística, siendo una de las posibles causas que provocaron tales disimilitudes los contrastes en disponibilidad de invertebrados encontrados entre ambos biotopos. Principalmente el tamaño de las manchas palustres (lagunas o carrizales en cada caso), aunque también el grado de aislamiento de las mismas o su desarrollo en vegetación emergente, fueron los principales parámetros pronosticadores de la riqueza en aves existente en cada localidad. La abundancia se conformó como uno de los principales rasgos de las especies que predijo su capacidad de ocupación de parches húmedos (sampling hypothesis). Independientemente, los procesos de colonización de las lagunas por las aves también parecieron encontrarse condicionados por otras características integrales de las últimas, como fueron aquellas relacionadas con su selección de hábitat. De esta forma, las especies menos generalistas, o más dependientes de recursos

sensibles a los procesos de fragmentación del medio, presentaron peor habilidad para la colonización de retazos palustres que las más ubiqüistas o normalmente ligadas a recursos no área-sensibles. Tanto las diferencias en abundancia como en selección de recursos de las distintas aves probablemente favorecieron, de forma paralela, la pérdida jerárquica de especies a la par que el área de las manchas húmedas se restringió (patrón nested), debiendo alcanzarse niveles limitantes para las más escasas, o susceptibles a la alteración del medio, en retazos palustres reducidos que posiblemente dificultaron de forma crítica su supervivencia en ellos. Se pusieron a prueba las hipótesis de partida planteadas en relación con las pautas de fragmentación del hábitat acaecidas en un complejo húmedo almeriense que experimentó un proceso de degradación y atomización del medio provocado por la invasión de los cultivos de regadío en su entorno a lo largo de la segunda mitad del siglo XX. En función de los resultados obtenidos, se recomienda la creación, conservación o restauración del mayor número de localidades húmedas, prestando especial atención a las más extensas, menos aisladas de otros complejos y con mejor desarrollo vegetal de orilla, con objeto de preservar el mayor número de especies de aves frente a la acusada perdida y fragmentación antrópica de la superficie palustre que está acaeciendo actualmente en el ámbito mundial y que es fuente de detrimento en diversidad biológica. Por otro lado, para contribuir a la salvaguarda de las especies de aguazales más escasas, sensibles o amenazadas (como *Marmaronetta angustirostris*, *O. leucocephala* o *Acrocephalus melanopogon* en el caso de estudio), se requiere de medidas de gestión que favorezcan un incremento en la disponibilidad de los recursos utilizados por las mismas y en sus poblaciones, con objeto de aumentar su estabilidad en los humedales a mayor escala, haciéndolas más persistentes en el tiempo y menos proclives a la extinción.

Cognitive, Social, and Individual Constraints on Linguistic Variation Jeroen Claes, 2016-12-19 The present volume tries to answer the question: What constrains morphosyntactic variation? By analyzing the variable agreement of presentational haber ('there to be') in Caribbean Spanish with advanced statistical tools and theoretical constructs of Cognitive Sociolinguistics, psycholinguistics, and variationist sociolinguistics, it proposes an innovative theoretical model of the constraints that govern morphosyntactic variation.

El municipio medieval: nuevas perspectivas Javier Alvarado Planas,Oleg Aurov,María Magdalena Martínez Almira,Manuel Estrada,Luz Valle Videla,Miguel Angel Chamocho,Isabel Ramos Vázquez,Rafael Sánchez Domingo,Aniceto Masferrer,Carmen Losa Contreras,Regina María Pérez Marcos,Juan Sainz Guerra,Andrés Gambah Gutiérrez,Leandro Martínez Peñas,Consuelo Juanto Jiménez,María del Carmen Sáenz Berceo,Fernando Suárez Bilbao,Maria del Mar Sánchez González,Beatrix Badorrey Martín,Jesús Gómez Garzas,Jose Cano Valero,Juan Carlos Domínguez Nafría,Gonzalo Oliva Manso,2009-11-10 En esta obra colectiva, varios historiadores del derecho y de las instituciones estudian la evolución de las estructuras municipales desde la época tardo-romana hasta la Edad Media y las formas de prefeudalismo y feudalismo

hispánico. También se analiza la pervivencia de la tradición islámica en las instituciones concejiles, la contribución franca a la formación urbana de los reinos peninsulares y la autonomía concejil frente a las encomiendas monásticas. En varios capítulos se estudia la administración territorial y local, la potestad normativa y sancionadora municipal así como diversas instituciones singulares como las merindades, la caballería de sierra, etc. In this collective work several historians of law and of institutions study the evolution of municipal structures from the Late Roman period to the Middle Ages, as well as the prefeudal and feudal forms in Spain. They analyze as well the persistence of Islamic traditions in council institutions, the Frankish contribution to the urban formation of the kingdoms of the Iberian Peninsula and the autonomy of councils vis-à-vis monastic encomiendas. Several chapters are devoted to territorial and local administration and the municipal lawmaking and punitive powers, and to the study of various peculiar institutions such as merindades, caballería de sierra, etc.
