### **Zheng He's Maritime Voyages (1405-1433) and China's Relations with the Indian Ocean World** ,2014-08-07

Zheng He's Maritime Voyages (1405-1433) and China's Relations with the Indian Ocean World: A Multilingual Bibliography provides a multidisciplinary guide to publications on this great navigator's activities and their impact on Chinese and world history. Admiral Zheng He commanded the fifteenth-century world's largest fleet. In the course of seven voyages made between 1405 and 1433, his massive ships visited over thirty present-day countries in Asia and Africa. Those voyages reflected and reinforced the development of complex networks of trade, migration, cultural exchange, and political interactions between China and the Indian Ocean world. This bibliography lists sources in thirteen languages, including both scholarly studies and popular works like Gavin Menzies's controversial bestsellers claiming the Chinese sailed around the world before Columbus. Relevant translations, transliterations and annotations are provided to aid the reader.

**A History of Ancient Chinese Geoscience** Wenheng Yang, Qinye Yang, 2025-04-30 This book studies the history of geoscience in ancient China. Building on a comprehensive review of the historical development of Chinese geoscience, the authors map out the trends and patterns in the development of geoscience, thereby filling a research gap in this field and laying the groundwork for a systematic study of the history of Chinese geoscience. The Chinese version of this book was selected as a key national book planning project under China's 12th Five-Year Plan and was funded by the National Publication Foundation. It also won the 6th China Outstanding Publication Award. Encompassing historical accounts of both geography and geology, the book explores the origin, development and prosperity of ancient Chinese geoscience. It introduces a wide range of topics covering a time span from the primitive societies to the Late Qing dynasty. In each time period, as well as discussion of the contexts, topics include the mainstream schools of thought, scientific discoveries and their significance, scholarly works, well-known experts, major research activities, research institutes, educational programmes, academic journals, scientific instruments, and knowledge exchange. The book also deals with the history of several neighbouring disciplines such as climatology, cartology, hydrology, geomorphology and mineral petrology. The authors provide an exceptionally detailed description of geoscience in embryo - the forming of early knowledge of the Earth in primitive society. For the first time, philosophers' geoscientific understanding of the world and the findings of historical mineralogy and petrology are brought to the fore, supported by data from various sources including ancient literature,

archives and documentation, archaeological sites, cultural artefacts and modern experimental evidence. The novel design of contextualising each phase of development in its unique social-political conditions is unprecedented and of high academic and social value. Marked by its specialised interpretation and scientific rigour, this work proves to be unparalleled in revealing the reciprocity between scientific innovation and societal transformation, thus providing valuable lessons and inspiration for future geoscientists. As a reference book on the history of geoscience, it aims to provide specialist guidance for professionals in the field of geoscience, geoscience historians and researchers, university teachers and students in relevant disciplines, and teachers of geography or science in primary or secondary schools.

*Chinese Global Exploration In The Pre-columbian Era: Evidence From An Ancient World Map* Sheng-wei Wang, 2023-10-16 How early did the Chinese explore the world? Did the Treasure Fleets, led by Admiral Zheng He, discover many parts of the world before Christopher Columbus? While it is known that Christopher Columbus discovered America and Europe ushered in the Age of Discovery, there is an ongoing debate on the 'unknown' areas depicted in Western maps from the period and earlier. There is agreement among scholars that certain areas seem to have been mapped out prior to the

arrival of Western explorers.Chinese Global Exploration in the Pre-Columbian Era: Evidence from an Ancient World Map analyses the world's first modern map — known as Kunyu Wanguo Quantu (KWQ) 坤輿萬國全圖 in Chinese, translated as the 'Complete Geographical Map of All Kingdoms of the World' to demonstrate evidence of Chinese global exploration in the Pre-Columbian era. The map of concern was first printed by Italian missionary, Matteo Ricci in 1602, and has been purported to be of entirely European origin, based on Ricci's former maps which he had brought to China in 1582.This book, thus, seeks to be transformational in presenting essential new insights on Pre-Columbian world history and Chinese global exploration, moving away from the norm of the studies of geography and cartography by:

**The Eunuchs in the Ming Dynasty** Shih-shan Henry Tsai,1996-01-01 This book is the first on Chinese eunuchs in

English and presents a comprehensive picture of the role that they played in the Ming dynasty, 1368-1644. Extracted from a wide range of primary and secondary source material, the author provides significant and interesting information about court politics, espionage and internal security, military and foreign affairs, tax and tribute collection, the operation of imperial monopolies, judiciary review, the layout of the palace complex, the Grand Canal, and much more. The eunuchs are shown to be not just a minor adjunct to a government of civil servants and military officers, but a fully developed third branch of the Ming administration that participated in all of the most essential matters of the dynasty. The veil of condemnation and jealousy imposed on eunuchs by the compilers of official history is pulled away to reveal a richly textured tapestry. Eunuchs are portrayed in a balanced manner that gives due consideration to able and faithful service along with the inept, the lurid, and the iniquitous.

**The General History Of Chinese Tourism Culture** Yong Ma,Hongxia Su,Qian Jin,Wei Feng,Jianuo Liu,Wenying Huang,2016-06-30 This book is the first book on the history of Chinese traveling culture. It reviewed the history of Chinese traveling culture, and revealed the cultural significance of China's traveling phenomena and the underlying principles of its changing traveling culture.It has the following features: First, it divided the history of Chinese traveling culture into six periods to create a system to explain the phenomena and changes of traveling culture. Second, it emphasized the significance of travelers in traveling culture, and revealed the influence of zeitgeist on traveling culture. Third, it explained phenomena through investigations of the artifacts, institutions, behaviors and attitudes of traveling culture, and the dynamic interactions between the subjects, objects and media in traveling. Fourth, it expanded the theory of traveling by building upon extant ideas.Published by SCPG Publishing Corporation and distributed by World Scientific for all markets except China

**History of Technology Volume 29** Ian Inkster,2016-09-30 The common question from the western point of view is of the sort; why did China lose its early leadership of productive technologies to Europe during the early modern period? Answers to this seemingly clear enquiry vary from general cultural inwardness to the interferences of imperial governance. This collection surveys such theories but alters the issue by raising the notion that Chinese technologies did not so much fail as move along a path different from that of Europe. Our second collection on the Mindful Hand, also shifts common ground by querying and modifying common views of the links between knowledge and technique in early-modern European development. Scientific or related knowledge was not brought to technique as a socio-cultural gift from an educated elite to the working man. Rather, educated gents, practitioners, instrument makers, craftsfolk and technicians of all kinds intermingled both socially and in terms of the recognition of technical problems as well as in the assemblage of the mental, commercial and cognitive resources required to pursue innovative production projects.

*The History of Chinese Muslims' Migration into Malaysia* Ma Hailong,2017-09-01 The purpose of this paper is to examine the history of the Chinese Muslims who moved to Malaysia and explain the different factors that have influenced this

migration at different historical stages. I separate this history mainly into two parts, namely, before the twentieth century and from the twentieth century onward. Before the twentieth century, the majority of Chinese Muslims who streamed into Malaysia were Chinese immigrants who became Chinese Muslims by converting to Islam. From the twentieth century onward, however, the majority of Chinese Muslims who came to Malaysia were Muslim Hui from China, who believed in Islam and spoke Chinese, and who constituted an ethno-religious minority group.

**The Indian Ocean in World History** Edward A. Alpers, 2014 The Indian Ocean in World History explores the cultural exchanges that took place in this region from ancient to modern times.

**40 Maps That Will Change How You See the World** Alastair Bonnett, 2024-09-17 Turn the pages of this thought-provoking book, and discover maps that challenge conventional wisdom, confront social and political norms and offer fresh perspectives on familiar landscapes. This meticulously curated selection of 40 maps spans the ages, from ancient parchment scrolls to cutting-edge digital creations. Each map is a window into a different facet of our world, shedding light on the complex interplay of geography, geopolitics, art, history, science, and society. Maps have always held the power to transport us, not just from one place to another, but from one state of mind to another. Beyond their utilitarian function, maps have an extraordinary ability to tell stories, reveal truths, and inspire revolutions. They are not mere drawings of geographic boundaries, but gateways to the collective wisdom of humanity. You'll encounter maps that dissect the intricate tapestry of human migration, maps that unveil the secrets of the cosmos and maps, that expose the stark realities of our changing climate. These maps are not just illustrations; they are provocations, invitations to rethink the world. 40 Maps That Will Change How You See the World is not just a book for geographers or history buffs; it is a profound exploration for anyone with a curious mind. Whether you're an armchair traveler, a seasoned explorer, a student of geopolitics, or an art aficionado, this book will challenge your preconceptions, spark lively discussions, and deepen your appreciation for the interconnectedness of our world.
