

Angkor Thom Bayon Temple

JG Myers

Bayon Reconsidered Vittorio Roveda, Olivier Cunin, Claude Jacques, 2007-01 The first multidisciplinary study of the Bayon - towered-temple located in the center of Angkor Thom, Cambodia.

The Bayon of Angkor Thom Sachchidanand Sahai, 2007

Angkor Wat Alison Behnke, 2008-09-01 Traces the history and development of one of the largest ancient structures in the world, Angkor Wat.

Bayon Joyce Clark, 2007 It is more than 30 years since the story was last told of the Bayon, the enigmatic state temple of Jayavarman VII, the greatest king of ancient Angkor. Recently, researchers from several disciplines have again been probing the mysteries of this extraordinary monument and its giant face towers. Under an eminent editorial team, *Bayon: New perspectives* brings together for the first time leading scholars whose findings and insights challenge, not always in consensus, many of the earlier interpretations of the Bayon's art, architecture and inscriptions. Claude Jacques distills decades of research in a close-up of Jayavarman's life, family and immediate successors. T. S. Maxwell conducts the first in-depth study of the Bayon's short inscriptions and through them the unique Buddhist-Hindu-ancestral religion imposed by Jayavarman. Olivier Cunin draws on new technology and sophisticated techniques for precisely tracking the temple's bewildering architectural design changes. Peter Sharrock uncovers clear signs of the Tantric Buddhism of the ancient Khmers and proposes we see the Tantric supreme Buddha Vajrasattva in the renowned face towers. Anne-Valerie Schweyer discovers how the inscriptions of the neighbouring Chams, among whom Jayavarman spent his early adult life, throw new light on the king's psychology and life - which Vittorio Roveda carefully tracks in the detailed political reliefs of the Bayon's outer gallery. Ang Choulean then paints the living Bayon in its vivid local folklore - the great monument as it is seen by the people who live in the villages around it today. These intense engagements to unravel the meaning of the temple draw a masterly new preface from Hiram Woodward, who pioneered the current wave of reinterpretations of the Bayon a quarter of a century ago. Michael Vickery's rigorous scholarly imprint, alongside the sustained energy and commitment of editor Joyce Clark permeate every page of this volume, as it yields a more contoured and credible story of the king's remarkable career. The religion and mythology of the new Khmer Buddhist state are rendered with a more subtle brush and a new vision emerges of the historical and political significance of the Bayon. 242 photographs

Threatened Freshwater Animals of Tropical East Asia David Dudgeon, 2022-08-04 This book offers a comprehensive account of the current state of inland waters in tropical and subtropical East Asia, exploring a series of case studies of

freshwater fish, reptiles, amphibians, birds, mammals and water bodies at particular risk. The book highlights the rich freshwater biodiversity of tropical East Asia and draws attention to the various threats it faces due to human activities and rapid environmental change. It addresses the question of whether the contributions of these animals and habitats, or biodiversity in general, to ecosystem functioning and service provision provide sufficient basis for arguments supporting nature conservation. Drawing on instances from the rivers and lakes of tropical East Asia, the book also asks whether the benefits accruing from intact ecosystems are likely to be enough to ensure their preservation. If the answer to either or both these questions is 'no', then what are the prospects for freshwater biodiversity in rapidly changing tropical East Asia? This book will be of interest to students and scholars of biodiversity, conservation, freshwater ecology, ecosystem services and Asian Studies.

Buddhist Architecture Huu Phuoc Le, 2010 The volume thoroughly examines the origins and principal types of Buddhist architecture in Asia primarily between the third century BCE-twelfth century CE with an emphasis on India. It aims to construct shared architectural traits and patterns alongwith the derivative relationships between Indian and Asian Buddhist monuments. It also discusses the historical antecedents in the Indus Civilization and the religious and philosophical

foundations of the three schools of Buddhism and its founder, Buddha. Previously obscure topics such as Aniconic and Vajrayana (Tantric) architecture and the four holiest sites of Buddhism will also be covered in this comprehensive volume. The author further investigates the influences of Buddhist architecture upon Islamic, Christian, and Hindu architecture that have been overlooked by past scholars.

Treasures of the Buddha Tom Lowenstein,2006 Treasures of the Buddha presents, in stunning color photographs, a vivid portrait of Buddhism including its teachings and its great treasures -- from its place of origin in northern India and out among the different kingdoms and empires of central, southern and eastern Asia.

The Civilization of Ancient India and Southeast Asia Tom Lowenstein,2012-12-15 Buddhism has produced a cultural legacy more glorious than most great faiths. Initially spreading throughout Asia, over the centuries it triumphed not by the might of military conquest but by virtue of its revolutionary ideas and profound insights. For two-and-a-half millennia, both wealthy patrons and humble devotees have created a rich legacy of sacred art and architecture, from devotion paintings and manuscripts to some of the most magnificent temples and monasteries ever built. Stunning color photographs present a vivid portrait of this venerable religion and its great treasures—from its place of origin in northern India and out through its diffusion among the different kingdoms and empires of central, southern and eastern Asia—examining each geographical region in turn and Buddhism's influence on and contribution to the culture. An illuminating commentary places the creations of Buddhist artists and artisans in their geographical, historical, and artistic contexts and explains the significance of the faith's devotional paintings, manuscript art, sculptures, architecture, and sacred motifs and symbols.

Lost Religious Cities Amelia Khatri,AI,2025-02-14 Lost Religious Cities explores the fascinating histories of urban centers defined by religious significance, now abandoned and rediscovered through archaeology. The book delves into how the architecture and urban planning of these cities reflected their belief systems, offering insights into ancient religious life. It examines the socio-political dynamics and environmental factors that contributed to their decline, revealing the precarious

nature of even the most powerful religious communities. The book progresses chronologically and geographically, starting with early examples in the Near East and Anatolia, then moving to the Mediterranean world and Asia. Each section focuses on the unique characteristics of these sites, their religious practices, and the reasons for their abandonment. By studying these forgotten cities, we gain invaluable insights into the complex interplay between religious belief, social organization, and environmental influences, providing lessons applicable to contemporary issues.

Water Civilization Yoshinori Yasuda, 2012-10-24 Water Civilization: From Yangtze to Khmer Civilizations comprises three major topics: 1) Discovery of the origin of rice agriculture and the Yangtze River civilization in southern China was mainly based on investigation of the Chengtoushan archaeological site, the earliest urban settlement in East Asia. The origin of rice cultivation can be traced back to 10000 BC, with urban settlement starting at about 6000 BP; 2) The Yangtze River civilization collapsed around 4200 BP. Palaeoenvironmental studies including analyses of annually laminated sediments in East and Southeast Asia indicate a close relationship between climate change and the rise and fall of the rice-cultivating and fishing civilization; and 3) Migrations from southern China to Southeast Asia occurred after about 4200 BP. Archaeological investigation of the Phum Snay site in Cambodia, including analyses of DNA and human skeletal remains, reveals a close relationship to southern China, indicating the migration of people from southern China to Southeast Asia. This publication is an important contribution to understanding the environmental history of China and Cambodia in relation to the rise and fall of the rice-cultivating and fishing civilization, which we call water civilization.
