Religious Diversity in Australia Douglas Ezzy, Anna Halafoff, Greg Barton, Rebecca Banham, 2024-03-07 This book documents the structure of religious diversity in Australia and examines this diversity in the context of the law, migration, education, policing, the media and interfaith communities. Focusing on Melbourne and Tasmania, it articulates the benefits and opportunities of diversity, alongside the challenges that confront religious and ethnic minorities, including discrimination and structural inequalities generated by Christian and other forms of privilege. It articulates constructive strategies that are deployed, including encouraging forms of belonging, structured ways of negotiating disagreement and respectful engagement with difference. While scholars across the West are increasingly attuned to the problems and promises of growing religious diversity in a global age, in-depth empirical research on the consequences of that diversity in Australia is lacking. This book provides a rich, well-researched, and timely intervention.

Identity and Belonging Among Chinese Australians Jennifer Martin, Dharma Arunachalam, Helen Forbes-Mewett, 2023-11-20 This book describes the ethnic identity construction involved in 'being', 'feeling' and 'doing' Chinese for multi-generation Australian-born Chinese, who were born and raised in a different social environment. It demonstrates how Chineseness is manifested in a multitude of ways and totally debunks any notion that being Chinese is a simple identity marker. The book shows that while there are commonalities with the American-born, the experiences of Australia-born Chinese are distinct in many ways. This book is a timely and critically examination of the inescapability of Chineseness particularly when social and economic stability is threatened and those in power are looking for a scapegoat.

Popular Music and Australian Culture Bruce Johnson, 2022-11-29 This volume explores aspects of popular music and culture from the twentieth century to the present day. It brings together contributions challenging or reassessing assumptions about how individual, subjective experience comes to terms with modernity. While the emphasis is on Australian case studies, the essays here raise larger questions, ranging from our disempowerment as consumers demanding instant gratification to our ambiguous status as observers of and participants in historical change. They examine the complex relationship between sound and visual media in the formation of various communities, and how this relates to daily lived experience.

Buddhism in Australia Cristina Rocha, Michelle Barker, 2010-12-07 The number of Buddhists in Australia has grown dramatically in recent years. In 2006, Buddhists accounted for 2.1 per cent of Australia's population, almost doubling the 1996 figures, and making it the fastest growing religion in the country. This book analyses the arrival and localisation of Buddhism in Australia in the context of the globalisation of Buddhism. Australia's close geographical proximity to Asia has encouraged an intense flow of people, ideas, practices and commodities from its neighbouring countries, while at the same time allowing the development of the religion to be somewhat different to its growth in other Western countries. The book seeks to explore the Buddhist experience in Australia, looking at the similarities and particularities of this experience in relation to other Western countries. The inception of Buddhism in Australia is investigated, and a voice is provided to people on the ground who have been fundamental in making this process possible. For the first time, academic analysis and practitioners' experience are juxtaposed to show the adaptations and challenges of Buddhism in Australia from above and below. This book is a unique and valuable contribution to the study of Buddhism in the West, globalization of religion, and studies in Asian Religion.

Australia Elizabeth Cornelia, 1978-12 Introduces the history, geography, people, customs, government, arts, and day-to-day life of the fifth largest country in the world.

Migration and Identity Rina Benmayor, Andor Skotnes, The theme of Migration and Identity is of special concern at a time both of massive worldwide migration and of apparently intensifying national, ethnic, and racial conflicts. Problems of migration and the resulting reconfigurations of social identity are fundamental issues for the twenty-first century. This volume spans the whole complex global web of migratory patterns with contributions linking Africa, Asia, Australia, Europe, North and South America, without losing the particularities of local and personal experience. This paperback edition in the Memory and Narrative series explores these issues and the sustaining or abandoning of memory and identity as people move between fundamentally different cultures, in a number of recent social settings, from a number of methodological

perspectives. These focused case studies offer glimpses into the interior migration experiences, into the processes of constructing and reconstructing identity without forgetting that, both theoretically and empirically, the problem of identity is complex and multifaceted. All of the essays rely heavily on oral history and personal testimony, highlighting the experience of individuals and small groups, without ignoring the tension that exists between the local and the global. Memories of oppression or totalitarianism are one of the driving forces behind some of these migrations; and the transmission of memories and myths between family generations is one of the ways in which migrations are interpreted. In looking both backward and forward, *Migration and Identity*, offers an acute view of migratory patterns and their impact on the newcomers and the local cultures. It will be of interest to cultural and oral historians and researchers of concerned with migration and integration. Rina Benmayor is professor of oral history, Latino studies and literature in the Department of New Humanities for Social Justice at California State University Monterey Bay. She is currently president of the International Oral History Association. Her recent publications include *Telling to Live: Latino Feminist Testimonies* and *Latino Cultural Citizenship*. Andor Skotnes is associate professor of history of the Americas at The Sage Colleges in Troy, New York. He teaches courses in working-class, African-American, Native American, and Latin American history and culture, and in oral history.

Bridging Imaginations Dr Amit Sarwal, 2012-02-11 Migration of the South Asian peoples to Australia has resulted in a continually growing and flourishing diaspora, one of the most prosperous communities, with an ever-increasing role and responsibility in all areas of society. One of the challenges in writing about the South Asian diaspora in Australia is the nature of the beast: the multifarious migration and entry points into Australia range from colonial indentured workers to political asylum seekers to transnational marriages to students and high-end professionals. How did their journeys and experiences generate bridges that have influenced the historical, cultural, social and academic perceptions of the ever-changing continents? It is hoped that this critical anthology will help present a dynamic community in transit, and showcase the achievements of the South Asian diaspora during the last decade, which have not only made a significant impact on Australia's multicultural landscape but also furthered South Asian-Australian engagement.

Militarization and the Global Rise of Paramilitary Culture Brad West, Thomas Crosbie, 2021-10-12 This edited book demonstrates a new multidimensional comprehension of the relationship between war, the military and civil society by exploring the global rise of paramilitary culture. Moving beyond binary understandings that inform the militarization of culture thesis and examining various national and cultural contexts, the collection outlines ways in which a process of paramilitarization is shaping the world through the promotion of new warrior archetypes. It is argued that while the paramilitary hero is associated with military themes, their character is in tension with the central principals of modern military organization, something that often challenges the state's perceived monopoly on violence. As such paramilitization has profound implications for institutional military identity, the influence of paramilitary organizations and broadly how

organised violence is popularly understood

Inside Australian Culture Baden Offord, Erika Kerruish, Rob Garbutt, Adele Wessell, Kirsten Pavlovic, 2014-07-01 “Inside Australian Culture: Legacies of Enlightenment Values” offers a critical intervention in the continuing effects of colonization in Australia and the structures it brought, which still inform and dominate its public culture. Through a careful analysis of three disparate but significant moments in Australian history, the authors investigate the way the British Enlightenment continues to dominate contemporary Australian thinking and values. Employing the lens of Indian cultural theorist Ashis Nandy, the authors argue for an Australian public culture that is profoundly conscious of its assumptions, history and limitations.

Architectural Conservation in Australia, New Zealand and the Pacific Islands John Stubbs, William Chapman, Julia Gatley, Ross King, 2023-12-22 The fourth in a series that documents architectural conservation in different parts of the world, *Architectural Conservation in Australia, New Zealand and the Pacific Islands: National Experiences and Practice* addresses cultural heritage protection in a region which comprises one third of the Earth’s surface. In response to local needs, Australia, New Zealand and the Pacific Islands have developed some of the most important and influential techniques, legislation, doctrine and theories in cultural heritage management in the world. The evolution of the heritage protection ethos and contemporary architectural conservation practices in Australia and Oceania are discussed on a national and regional basis using ample illustrations and examples. Accomplishments in architectural conservation are discussed in their national and international contexts, with an emphasis on original developments (solutions) and contributions made to the overall field. Enriched with essays contributed from fifty-nine specialists and thought leaders in the field, this book contains an extraordinary breadth and depth of research and synthesis on the why’s and how’s of cultural heritage conservation. Its holistic approach provides an essential resource and reference for students, academics, researchers, policy makers, practitioners and all who are interested in conserving the built environment.

Genes, Language, & Culture History in the Southwest Pacific Jonathan S. Friedlaender, 2007-04-19 The broad arc of islands north of Australia that extends from Indonesia east towards the central Pacific is home to a set of human populations whose concentration of diversity is unequaled elsewhere. Approximately 20% of the world’s languages are spoken here, and the biological and genetic heterogeneity among the groups is extraordinary. Anthropologist W.W. Howells once declared diversity in the region so Protean as to defy analysis. However, this book can now claim considerable success in describing and understanding the origins of the genetic and linguistic variation there. In order to cut through this biological knot, the authors have applied a comprehensive battery of genetic analyses to an intensively sampled set of populations, and have subjected these and complementary linguistic data to a variety of phylogenetic analyses. This has revealed a number of heretofore unknown ancient Pleistocene genetic variants that are only found in these island populations, and has also identified the genetic footprints of more recent migrants from Southeast Asia who were the ancestors of the Polynesians. The

book lays out the very complex structure of the variation within and among the islands in this relatively small region, and a number of explanatory models are tested to see which best account for the observed pattern of genetic variation here. The results suggest that a number of commonly used models of evolutionary divergence are overly simple in their assumptions, and that often human diversity has accumulated in very complex ways.

Popular Culture and Its Relationship to Conflict in the UK and Australia since the Great War Andrekos Varnava, Michael J.K. Walsh, 2022-12-26 This book shows how cultural production derived from, or in anticipation of, conflict can be used to create specific social identities, national histories, and contemporary concepts of memory in Britain and Australia. Studies on the politics of cultural production have usually focussed on one conflict, or on one particular cultural medium, at a time. This volume, however, presents a broader horizon to draw attention to more popular forms of cultural production from the Great War up to and including its Centenary. The chapters in this volume interrogate the contentious philosophical notion that culture thrives in times of war, and expires in peace, and asks whether 'art', as a form of social barometer, can anticipate conflict rather than merely respond to it. This is a fascinating read for students, researchers, and academics interested in British and Australian History and its relationship with Popular Culture. The chapters in this book were originally published as a special issue of Contemporary British History.
