*Hollywood and History* Jem Duducu,2023-09-15 There is no shortage of Hollywood films about historical events, but what do the movies actually get right, and why do they get so much wrong? Hollywood loves a story: good guys versus bad guys, heroes winning the day, and the guy gets the girl. But we all know real life isn't exactly like that, and this is even more true when we look at history. Rarely do the just prevail and the three-act story cannot exist over continents and decades of human interaction. So, when Hollywood decides to exploit history for profit, we end up with a wide array of films. Some are comedies like Monty Python and the Holy Grail, others are little more than action films playing dress up like *Gladiator*, and many are Oscar contenders burdened with an enormous sense of self-importance. But very few are historically accurate. From *Cleopatra* to *Da 5 Bloods*, the reality is no matter what Hollywood's intentions are, almost all historical films are an exaggeration or distortion of what really happened. Sometimes the alterations are for the sake of brevity, as watching a

movie in real time about the Hundred Years War would literally kill you. Other additions may be out of necessity, since nobody thought to write down the everyday conversations between King Henry VIII and his second wife, Anne Boleyn, for *The Other Boleyn Girl*. And some projects twist the facts to suit a more sinister purpose. In *Hollywood and History*, Jem Duducu takes readers through thousands of years of global history as immortalized and ultimately fictionalized by Hollywood, exploring many facets of the representation of history in movies from the medieval times to the wild west and both World Wars. Along the way, readers will also better understand Hollywood's own history, as it evolved from black and white silent shorts to the multiplex CGI epics of today. As studios and audiences have matured through the years, so too have their representations of history. Armies will clash, leaders will be slain, empires will fall, and a few historical inaccuracies will be pointed out along the way. A must-read for film and history fans alike.

**The Transpacific Experiment** Matt Sheehan, 2020-08-04 A timely, vital account of California's unique relationship with China, told through the exploits of the entrepreneurs, activists, and politicians driving transformations with international implications. Tensions between the world's superpowers are mounting in Washington, D.C., and Beijing. Yet, the People's Republic of China and the state of California have built deep and interdependent socioeconomic exchanges that reverberate across the globe, making California and China a microcosm of the most important international relationship of the twenty-first century. In The Transpacific Experiment, journalist and China analyst Matt Sheehan chronicles the real people who are making these connections. Sheehan tells the story of a Southern Californian mayor who believes a Chinese electric bus factory will save his town from meth labs and skinheads. He follows a Chinese AI researcher who leaves Google to compete with his former employer from behind the Great Firewall. Sheehan joins a tour bus of wealthy Chinese families shopping for homes in the Bay Area, revealing disgruntled neighbors and raising important questions about California's own narratives around immigration and the American Dream. Sheehan's on-the-ground reporting reveals movie sets in the "Hollywood of China," Chinese-funded housing projects in San Francisco, Chinese immigrants who support Donald Trump, and more. Each of these stories lays bare the new reality of twenty-first-century superpowers: the closer they get to one another, the more personal their frictions become. "Cuts right to the heart of the relationship between Silicon Valley and China: the tangled history, the current tensions, and the uncertain future . . . a must-read."—Kai-Fu Lee, former president of Google China and founder of Sinovation Ventures
