**How to Think About Algorithms** Jeff Edmonds, 2008-05-19 This textbook, for second- or third-year students of computer science, presents insights, notations, and analogies to help them describe and think about algorithms like an expert, without grinding through lots of formal proof. Solutions to many problems are provided to let students check their progress, while class-tested PowerPoint slides are on the web for anyone running the course. By looking at both the big picture and easy step-by-step methods for developing algorithms, the author guides students around the common pitfalls. He stresses paradigms such as loop invariants and recursion to unify a huge range of algorithms into a few meta-algorithms. The book fosters a deeper understanding of how and why each algorithm works. These insights are presented in a careful and clear way, helping students to think abstractly and preparing them for creating their own innovative ways to solve problems.

**Critical Thinking in Psychology** Robert J. Sternberg, Diane F. Halpern, 2020-01-16 Good scientific research depends on critical thinking at least as much as factual knowledge; psychology is no exception to this rule. And yet, despite the importance of critical thinking, psychology students are rarely taught how to think critically about the theories, methods, and concepts they must use. This book shows students and researchers how to think critically about key topics such as experimental research, statistical inference, case studies, logical fallacies, and ethical judgments. Using updated research findings and new insights, this volume provides a comprehensive overview of what critical thinking is and how to teach it in psychology. Written by leading experts in critical thinking in psychology, each chapter contains useful pedagogical features, such as critical-thinking questions, brief summaries, and definitions of key terms. It also supplies descriptions of each chapter author's critical-thinking experience, which evidences how critical thinking has made a difference to facilitating career development.

*Think-Aloud Protocols in Second Language Writing* Chengsong Yang, Lawrence Jun Zhang, 2023-09-26 This book addresses the validity of think-aloud protocols (TAPs) in L2 writing research through a mixed methods study and proposes effective approaches for their valid implementation. The book uncovers the reactive effects that TAPs have on L2 writing performance and processes, and examines how individual factors moderate this reactivity. It further presents and categorizes

participants' perceptions regarding reactivity and veridicality. To enhance veridicality, the book identifies incomplete TAPs using retrospective verbal reports as a reference point. Recommendations for utilizing TAPs include considering participants' individual differences, recent experiences, and emotions. This book will be valuable to educators teaching methodology in second or foreign language education, applied linguistics, or writing research, and to L2 researchers or graduate students with a broad interest in research methods, process-based research, or writing studies, or planning to incorporate TAPs into their research.

*Critical Essays in Sport Management* Andy Gillentine,Robert Baker,Jacquelyn Cuneen,2017-09-29 This collection of essays, written by a number of respected sport management scholars, addresses many of the challenges and issues facing today's sport management academic programs. It is intended to begin a professional and scholarly discussion to identify the best, or at least the most logical, paths to follow for sport management programs and the industry with which they are so closely aligned. Contributors, invited to participate based on their recognized areas of expertise, address specific topics using their own unique voices and writing styles. In the ebook version, essays link to video introductions by the authors and to online discussion forums where readers can respond to the issues presented in the essays. From the Preface: The field of sport management stands at an academic crossroads; the essays in this book address the following and other emerging questions: Should our successful field of study continue to model other disciplines and perpetuate their successes, as well as their shortcomings, or should we determine our own specific model for academic success? How are we doing in preparing future sport managers to perform in the industry and on the global stage? Where do we belong in the scheme of academe? The book's goal is to generate discussion among sport management professors, industry professionals who serve as adjunct faculty and participate on sport management program advisory boards, doctoral students who intend to teach in sport management programs, and others who explore and critique higher education in general.
