Vesuvius, Campi Flegrei, and Campanian Volcanism Benedetto De Vivo,Harvey E. Belkin,Giuseppe Rolandi,2019-10-11

Vesuvius, Campi Flegrei, and Campanian Volcanism communicates the state-of-the-art scientific knowledge on past and active volcanism in an area characterized by elevated risk due to high-density population. Eruptions, lahars and poisonous gas clouds have killed many thousands of people over recorded history, but volcanoes have given people some of the most fertile soil known in agriculture. The research presented in this book is useful for policymakers and researchers from these and other countries who are looking for risk assessment and volcanic evolution models they can apply to similar situations around the world. Naples and its surrounding area, in particular, the area situated between Vesuvius and the Campi Flegrei volcanic area has a population in excess of 4 million people. The volcanic areas that have similarly large populations in proximity to dormant, but hazardous volcanoes, i.e., Indonesia and Central America can also benefit from this work. - Covers the fundamental science of volcanoes, including new developments in the last decade relating to the use of crystals and melt inclusions to model the nature and evolution of volatiles - Includes the latest research on volcanism in Southern Italy that is presented as a case study for active and inactive volcanoes across the globe - Presents research that is applicable around the world, for people, scientists and policymakers living on, or near, active volcanoes

Computational Intelligence Methods for Bioinformatics and Biostatistics Davide Chicco,Angelo Facchiano,Erica Tavazzi,Enrico Longato,Martina Vettoretti,Anna Bernasconi,Simone Avesani,Paolo Cazzaniga,2022-11-25 This book constitutes revised selected papers from the 17th International Meeting on Computational Intelligence Methods for Bioinformatics and Biostatistics, CIBB 2021, which was held virtually during November 15-17, 2021. The 19 papers included in these proceedings were carefully reviewed and selected from 26 submissions, and they focus on bioinformatics,

computational biology, health informatics, cheminformatics, biotechnology, biostatistics, and biomedical imaging.

Advancements in Catalytic Conversion of Biomass into Biofuels and Chemicals Tae Hyun Kim, Chang Geun Yoo, 2020-12-07 Numerous efforts have been devoted to using biomass as a feedstock for the production of bio-based materials, biochemicals, and biofuels that reduce greenhouse gas emissions and dependence on conventional fossil resources. Conversion strategies for the production of platform chemicals, building blocks, fine chemicals, and biofuels include a wide range of processes such as chemical and mechanical pretreatment for improved carbohydrate production, fractionation of biomass into carbohydrates and lignin and their further conversions, microbial and enzymatic conversion of biomass into valuable products, and direct catalytic conversion of biomass or its components into chemicals and fuels. This Special Issue introduces recent innovative research results in the area of bioenergy and value-added chemicals from various feedstocks through chemical and biological catalytic processes.

Biomathematics and Related Computational Problems L.M. Ricciardi, 2012-12-06 Biomathematics emerged and rapidly grew as an independent discipline in the late sixties as scientists with various backgrounds in the mathematical, biological and physical sciences gathered together to form Departments and Institutes centered around this discipline that many at that time felt should fall between the cracks of legitimate science. For various reasons some of these new institutions vanished in the mid-seventies, particularly in the U. S. , the main reason for their demise being economic. Nevertheless, good biomathematical so that the range research has been ceaselessly carried on by numerous workers worldwide of this activity appears now as truly impressive: from useful and effective mathematical statements about problems that are firmly rooted in the 'wet' reality of biology to deep theoretical investigations on outstanding basic questions. It is also interesting to take note that some ideas and theories set forth by 'paleo-biomathematicians' almost a quarter of century ago are now becoming highly appreciated also by scientists engaged in quite different research fields. For instance, neural nets is the hot topic in computer science these days! Well aware of the growing interest in this relatively new field, years back I organized a small workshop on Biomathematics: Current Status and Future Perspectives which was held at the University of Salerno during the middle of April, 1980.

GEOPOLIMERI POLIMERI INORGANICI CHIMICAMENTE ATTIVATI Seconda Edizione ICerS ICerS, 2014-03-14 Il testo, in seconda edizione riveduta e ampliata, riassume lo stato dell'arte delle conoscenze sui geopolimeri, leganti idraulici e materiali ceramici di tipo alluminosilicatico a bassissimo contenuto di calcio. L'attivazione alcalina porta alla parziale dissoluzione di materie prime, sia naturali che scarti industriali, che danno origine a paste lavorabili e consolidabili a freddo. La buona stabilità termica e le buone proprietà meccaniche, portano i geopolimeri a essere materiali interessanti per diverse applicazioni: matrici per refrattari ed antifiamma, materiali da costruzione e restauro, matrici per l'inertizzazione di rifiuti tossici e radioattivi ecc. Il basso impatto ambientale dovuto alle materie prime e al processo a freddo necessario per il loro

ottenimento li rendono ecosostenibili. Il testo si rivolge sia ai tecnologi industriali dei materiali, sia ai ricercatori che lavorano nelle università e nei centri di ricerca, proponendo una aggiornata numerosità di applicazioni.

Nonlinear Optics and Optical Physics Iam-Choon Khoo, Juan-Francesco Lam, Francesco Simoni, 1994 This book consists of contributions by leading authorities in nonlinear optics and optical physics. The topics covered include fundamental theories and formalisms on nonlinear optics and current topics of interest in optical physics, as well as more specialized subjects such as phase conjugation, nonlinear guided waves, parametric oscillations and some novel materials. The coverage is comprehensive but pedagogical in nature.

Nonlinear Optics And Optical Physics: Lecture Notes From Capri Spring School Iam-choon Khoo, J F Lam, Francesco Simoni, 1994-08-15 This book consists of contributions by leading authorities in nonlinear optics and optical physics. Cannabinoids as Therapeutics Raphael Mechoulam, 2006-03-30 In recent years, cannabis research has concentrated on the potential of cannabinoids as therapeutic substances, particularly in serious chronic illnesses such as multiple sclerosis. Most volumes published on cannabinoids so far concentrate on the biological activity, biochemistry and pharmacology, whereas this volume concentrates on the diseases, the physiological effects and therapeutic use of cannabinoids. The volume editor Prof. Mechoulam was the first who isolated the prime active constituent (THC, Tetrahydrocannabinol) of marijuana. He published extensively on the pharmacological activities of cannabinoids. The volume is of interest to researchers and clinicians from pharmacology, neuroscience, and medicinal research.

Advances in Practical Applications of Heterogeneous Multi-Agent Systems - The PAAMS Collection Yves Demazeau, Franco Zambonelli, Juan M. Corchado Rodríguez, Javier Bajo Pérez, 2014-05-14 This book constitutes the refereed proceedings of the 12th International Conference on Practical Applications of Agents and Multi-Agent Systems, PAAMS 2014, held in Salamanca, Spain, in June 2014. The 12 revised full papers and 14 short papers were carefully reviewed and selected from 52 submissions and are presented together with 19 demonstrations. The papers report on the application and validation

of agent-based models, methods, and technologies in a number of key application areas, including: agent-oriented software engineering, conversations, motion coordination and unmanned aerial vehicles, web and service systems, robotics exploration, smart cities and infrastructures, and social systems.

Functional Lipidomics Li Feng, Glenn D. Prestwich, 2005-09-14 Lipids play an essential role in cell signaling and subcellular structure. Systematic analysis of the total lipid structure of a cell or organism, the lipodome, can reveal novel avenues of therapeutic intervention and diagnosis. This analysis is best modeled after the lessons learned from proteomics. With contributions from pioneering researchers f

Augmented Urban Spaces Fiorella De Cindio, 2016-04-08 There have been numerous possible scenarios depicted on the impact of the internet on urban spaces. Considering ubiquitous/pervasive computing, mobile, wireless connectivity and the acceptance of the Internet as a non-extraordinary part of our everyday lives mean that physical urban space is augmented, and digital in itself. This poses new problems as well as opportunities to those who have to deal with it. This book explores the intersection and articulation of physical and digital environments and the ways they can extend and reshape a spirit of place. It considers this from three main perspectives: the implications for the public sphere and urban public or semi-public spaces; the implications for community regeneration and empowerment; and the dilemmas and challenges which the augmentation of space implies for urbanists. Grounded with international real-life case studies, this is an up-to-date, interdisciplinary and holistic overview of the relationships between cities, communities and high technologies.

Waves And Stability In Continuous Media - Proceedings Of The 13th Conference On Wascom 2005 Roberto Monaco, Salvatore Rionero, Tommaso Ruggeri, G Mulone, 2006-03-27 The book contains recent contributions in the field of waves propagation and stability in continuous media. In particular, the contributions consider discontinuity and shock waves, stability in fluid dynamics, small parameter problems, kinetic theories towards continuum models, non-equilibrium thermodynamics, and numerical applications. The volume is the fourth in a series published by World Scientific since 1999. The following distinguished authors contribute to the present book: S Bianchini, R Caflish, C Cercignani, Y Choquet-Bruhat, C Dafermos, L Desvillettes, V Giovangigli, H Gouin, I Muller, D Parker, B Straughan, M Sugiyama and W Weiss.
