Plant Natural Products for Human Health Chun-Tao Che, Hongjie Zhang, 2019-03-21 Plants have served mankind as an important source of foods and medicines. While we all consume plants and their products for nutritional support, a majority of the world population also rely on botanical remedies to meet their health needs, either as their own “traditional medicine” or as “complementary and alternative medicine”. From a pharmaceutical point of view, many compounds obtained from plant sources have long been known to possess bio/pharmacological activities, and historically, plants have yielded many important drugs for human use, from morphine discovered in the early nineteenth century to the more recent paclitaxel and artemisinin. Today, we are witnessing a global resurgence in interest and use of plant-based therapies and botanical products, and natural products remain an important and viable source of lead compounds in many drug discovery programs. This Special Issue on “Plant Natural Products for Human Health” compiles a series of scientific reports to demonstrate the medicinal potentials of plant natural products. It covers a range of disease targets, such as diabetes, inflammation, cancer, neurological disease, cardiovascular disease, liver damage, bacterial, and fungus infection and malarial. These papers provide important insights into the current state of research on drug discovery and new techniques. It is hoped that this Special Issue will serve as a timely reference for researchers and scholars who are interested in the discovery of potentially useful molecules from plant sources for health-related applications.

Strategies For Health Steven Horne, RH (AHG), 2022-01-14 If you're looking to solve your own health problems, help someone you love, or you're searching for answers to assist customers or clients, this practical guide to natural remedies will help you succeed. This book is the result of the healing journey I started fifty years ago when I failed to find answers to my own chronic respiratory problems. After years of getting worse with allopathic treatments, I discovered a different approach. I started studying and applying the use of herbs, diet, and other natural modalities. I went from being a sickly teenager, to a healthy young adult. For the past forty years I have been consulting, writing, and teaching, sharing what I have learned to

help other people experience the same health transformation. I wrote Strategies for Health to share this knowledge so that anyone who is struggling with poor health can move beyond symptomatic relief and start learning how to achieve lasting health. To get better results this book teaches you to find and adopt strategies to correct the underlying root causes of disease, such as nutritional deficiencies, exposure to toxins, unresolved stress, and poor lifestyle habits. Because when you look beyond treating disease symptoms and correct these root causes the body returns to its natural state--health. This is the approach that I have taken to successfully care for myself and my family. It has also helped me transform the lives of my clients and teach hundreds of successful natural health consultants to do the same. And I hope the information in this book will help bring the same health and wellbeing to you and many others. -Steven Horne, RH(AHG), DHS, DHM
