**Heather A. Smith, Owen J. Furuseth**

**The Routledge Companion to Children's Literature** David Rudd, 2012-07-26 The Routledge Companion to Children's Literature is a vibrant and authoritative exploration of children's literature in all its manifestations. It features a series of essays written by expert contributors who provide an illuminating examination of why children's literature is the way it is. Topics covered include: the history and development of children's literature various theoretical approaches used to explore the texts, including narratological methods questions of gender and sexuality along with issues of race and ethnicity realism and fantasy as two prevailing modes of story-telling picture books, comics and graphic novels as well as 'young adult' fiction and the 'crossover' novel media adaptations and neglected areas of children's literature. The Routledge Companion to Children's Literature contains suggestions for further reading throughout plus a helpful timeline and a substantial glossary of key terms and names, both established and more cutting-edge. This is a comprehensive and up-to-date guide to an increasingly complex and popular discipline.

**Latinos in the New South** Heather A. Smith, Owen J. Furuseth, 2006 Latinos have emerged as one of the fastest-growing ethnic populations in the American South. This book presents a multidisciplinary examination of the impacts and responses across the Southeastern United States to Latino immigration. Drawing on theoretical perspectives and empirical research, each chapter is centred on the nexus between the immigrants' experiences and the construction of transformed social, economic, political and cultural spaces.

Principles of Tissue Engineering Robert Lanza, Robert Langer, Joseph P. Vacanti, Anthony Atala, 2020-03-26 Now in its fifth edition, Principles of Tissue Engineering has been the definite resource in the field of tissue engineering for more than a decade. The fifth edition provides an update on this rapidly progressing field, combining the prerequisites for a general understanding of tissue growth and development, the tools and theoretical information needed to design tissues and organs, as well as a presentation by the world's experts of what is currently known about each specific organ system. As in previous editions, this book creates a comprehensive work that strikes a balance among the diversity of subjects that are related to tissue engineering, including biology, chemistry, material science, and engineering, among others, while also emphasizing those research areas that are likely to be of clinical value in the future. This edition includes greatly expanded focus on stem cells, including induced pluripotent stem (iPS) cells, stem cell niches, and blood components from stem cells. This research

has already produced applications in disease modeling, toxicity testing, drug development, and clinical therapies. This up-to-date coverage of stem cell biology and the application of tissue-engineering techniques for food production – is complemented by a series of new and updated chapters on recent clinical experience in applying tissue engineering, as well as a new section on the emerging technologies in the field. - Organized into twenty-three parts, covering the basics of tissue growth and development, approaches to tissue and organ design, and a summary of current knowledge by organ system - Introduces a new section and chapters on emerging technologies in the field - Full-color presentation throughout

**The Split Economy** Nimi Wariboko,2020-11-01 Starting with Marx and Freud, scholars have attempted to identify the primary ethical challenge of capitalism. They have named injustice, inequality, repression, exploitative empires, and capitalism's psychic hold over all of us, among other ills. Nimi Wariboko instead argues that the core ethical problem of capitalism lies in the split nature of the modern economy, an economy divided against itself. Production is set against finance, consumption against saving, and the future against the present. As the rich enjoy their lifestyle, their fellow citizens live in servitude. The economy mimics the structure of our human subjectivity as Saint Paul theorizes in Romans 7: the law constitutes the subject as split, traversed by negativity. The economy is split, shot through with a fundamental antagonism. This fundamental negativity at the core of the economy disturbs its stability and identity, generating its destructive drive. The Split Economy develops a robust theoretical framework at the intersection of continental philosophy, psychoanalytic theory, theology, and political economy to reveal a fundamental dynamic at the heart of capitalism.
