The City and the Hospital Daniel Skinner,Jonathan R. Wynn,Berkeley Franz,2023-11-07 A surprising look at how hospitals affect and are affected by their surrounding communities. An enduring paradox of urban public health is that many communities around hospitals are economically distressed and, counterintuitively, medically underserved. In *The City and the Hospital* two sociologists, Jonathan R. Wynn and Berkeley Franz, and a political scientist, Daniel Skinner, track the multiple causes of this problem and offer policy solutions. Focusing on three urban hospitals—Connecticut’s Hartford Hospital, the flagship of the Hartford Healthcare system; the Cleveland Clinic, which coordinates with other providers for routine care while its main campus provides specialty care; and the University of Colorado Hospital, a rare example of an urban institution that relocated to a new community—the authors analyze the complicated relationship between a hospital and its neighborhoods. On the one hand, hospitals anchor the communities that surround them, often staying in a neighborhood for decades. Hospitals also craft strategies to engage with the surrounding community, many of those focused on buying locally and hiring staff from their surrounding area. On the other hand, hospitals will often only provide care to the neighboring community through emergency departments, reserving advanced medical care and long-term treatment for those who can pay a premium for it. In addition, the authors show, hospitals frequently buy neighborhood real estate and advocate for development programs that drive gentrification and displacement. To understand how urban healthcare institutions work with their communities, the authors address power, history, race, and urbanity as much as the workings of the medical industry. These varied initiatives and effects mean that understanding urban hospitals requires seeing them in a new light—not only as medical centers but as complicated urban forces.

Black Women Taught Us Jenn M. Jackson, 2024-01-23 A reclamation of essential history and a hopeful gesture toward a better political future, this is what listening to Black women looks like—from a professor of political science and columnist for Teen Vogue. “Jenn M. Jackson is a beautiful writer and excellent scholar. In this book, they pay tribute to generations of Black women organizers and set forward a bold and courageous blueprint for our collective liberation.”—Imani Perry, author of South to America FINALIST FOR THE PEN OPEN BOOK AWARD This is my offering. My love letter to them, and to us. Jenn M. Jackson, PhD, has been known to bring historical acuity to some of the most controversial topics in America today. Now, in their first book, Jackson applies their critical analysis to the questions that have long energized their work: Why has Black women's freedom fighting been so overlooked throughout history, and what has our society lost because of our refusal to engage with our forestrugglers' lessons? A love letter to those who have been minimized and forgotten, this collection repositions Black women's intellectual and political work at the center of today's liberation movements. Across eleven original essays that explore the legacy of Black women writers and leaders—from Harriet Jacobs and Ida B. Wells to the

Combahee River Collective and Audre Lorde—Jackson sets the record straight about Black women’s longtime movement organizing, theorizing, and coalition building in the name of racial, gender, and sexual justice in the United States and abroad. These essays show, in both critical and deeply personal terms, how Black women have been at the center of modern liberation movements despite the erasure and misrecognition of their efforts. Jackson illustrates how Black women have frequently done the work of liberation at great risk to their lives and livelihoods. For a new generation of movement organizers and co-strugglers, *Black Women Taught Us* serves as a reminder that Black women were the first ones to teach us how to fight racism, how to name that fight, and how to imagine a more just world for everyone.

Betrayed by Nature Robin Hesketh, 2012-05-08 Seven million people die from cancer each year around the world, and many more are impacted by this universal scourge. In *Betrayed by Nature*, research scientist and lecturer Robin Hesketh demystifies the nature of cancer. Hesketh provides a concise and comprehensive history of both the science and the medical advances made over the decades. He takes the reader on a riveting tour of human biology; he explains how cancers start, what is meant by ‘a mutation’, and how mutations can make cells grow abnormally and spread around our bodies. Drawing on the latest discoveries from the Human Genome Project, Hesketh reveals the strides being made in understanding this malevolent disease and makes accessible the science of today’s treatments. *Betrayed by Nature* looks forward to the day when many cancers can be treated readily and effectively. With cancer afflicting one in three people worldwide, this is an illuminating and optimistic look at the past, present, and future of cancer.

Afterlives of Discovery heidi andrea restrepo rhodes, 2025-03-28 In *Afterlives of Discovery*, heidi andrea restrepo rhodes traces global and national histories as they entangle through the concept and material life of Discovery across Colombia’s evolution into a liberal settler colonial state. Rather than seeing Discovery as a singular event or bygone era, rhodes theorizes Discovery as a globally encompassing, racialized formation of domination and geographic speculation that continues to structure settler colonialism. Discovery’s logics, they argue, are rooted in colonial and capitalist fantasies projected onto the racialized space and place of the colonized other. rhodes draws on critical theory, human rights research, and Colombian archives to challenge dominant narratives that maintain the Colombian armed conflict began as a Marxist insurgency in 1964. Instead, rhodes shows that the conflict is an extension of Discovery’s ongoingness via projects of dispossession, extraction, whitening, and epistemic and political hegemony. Given that Colombia’s national past, present, and future are grounded in Discovery, rhodes asks: How is it possible to build futures that escape Discovery’s grasp?

The American Cardiovascular Pandemic David Gordon, 2021-11-02 As Americans and citizens of other industrializing countries began to enjoy lives of increasing affluence and ease during the first half of the 20th century, a rising tide of heart attacks and strokes displaced infectious diseases as the leading cause of death, killing millions in the United States and throughout the world. Although cardiovascular disease remains serious and widespread, the significant decline of per capita

deaths is one of the greatest accomplishments of modern public health and medicine. Death rates from heart attack and stroke have fallen dramatically by 80% in the past 50 years -- the progress has been hard won by a combination of basic and applied laboratory research, broad and far-reaching epidemiological studies by physicians, scientists, and public health experts. Cardiovascular disease is no longer viewed as an inevitable feature of the natural course of aging, and complacency has given way to hope. This book focuses on developments that influenced the rise and decline of cardiovascular mortality since 1900, but also includes insider insights from the author, a 42-year NIH employee.

Viral Justice Ruha Benjamin, 2022-10-11 An inspiring vision of how we can build a more just world—one small change at a time “A book as urgent as the moment that produced it.”—Jelani Cobb, Columbia Journalism School Long before the pandemic, Ruha Benjamin was doing groundbreaking research on race, technology, and justice, focusing on big, structural changes. But the twin plagues of COVID-19 and anti-Black police violence inspired her to rethink the importance of small, individual actions. Part memoir, part manifesto, *Viral Justice* is a sweeping and deeply personal exploration of how we can transform society through the choices we make every day. Vividly recounting her personal experiences and those of her family, Benjamin shows how seemingly minor decisions and habits could spread virally and have exponentially positive effects. She recounts her father’s premature death, illuminating the devastating impact of the chronic stress of racism, but she also introduces us to community organizers who are fostering mutual aid and collective healing. Through her brother’s experience with the criminal justice system, we see the trauma caused by policing practices and mass imprisonment, but we also witness family members finding strength as they come together to demand justice for their loved ones. And while her own challenges as a young mother reveal the vast inequities of our healthcare system, Benjamin also describes how the support of doulas and midwives can keep Black mothers and babies alive and well. Born of a stubborn hopefulness, *Viral Justice* offers a passionate, inspiring, and practical vision of how small changes can add up to large ones, transforming our relationships and communities and helping us build a more just and joyful world.

Made by Humans Ellen Broad, 2018-07-30 Who is designing AI? A select, narrow group. How is their world view shaping

our future? Artificial intelligence can be all too human: quick to judge, capable of error, vulnerable to bias. It's made by humans, after all. Humans make decisions about the laws and standards, the tools, the ethics in this new world. Who benefits. Who gets hurt. *Made by Humans* explores our role and responsibilities in automation. Roaming from Australia to the UK and the US, elite data expert Ellen Broad talks to world leaders in AI about what we need to do next. It is a personal, thought-provoking examination of humans as data and humans as the designers of systems that are meant to help us.

Centering Humanism in STEM Education Bryan Dewsbury, Susannah McGowan, Sheila S. Jaswal, Desiree Forsythe, 2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion, particularly for students with marginalized identities. This poses problems particularly when science permeates every aspect of contemporary American life. Institutions' repeated failures to disrupt systemic oppression in STEM has led to a mostly white, cisgender, and male scientific workforce replete with implicit and/or explicit biases. Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom. Maintaining views on science as inherently objective isolates it from the world in which it is performed. STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students' social and educational capital. We must create a STEM environment in which students with marginalized identities feel respected, listened to, and valued. We must assist students in understanding how their positionality, privilege, and power both historically and currently impacts their meaning making and understanding of STEM.

Fighting for Reproductive Justice Ngeri Nnachi, 2024-01-01 Reproductive rights have been hot-button issues for generations, and recent legal decisions have put these arguments back in the spotlight. Black women activists have been leading the fight for reproductive justice for more than a century. They want everyone to be able to choose when and whether to have children. They want people, especially women, to be able to decide for themselves what happens to their bodies. And they want everyone to have safe, accessible medical care. But the United States has a long history of people in

power, who have tended to be wealthy white men, believing they have the right to make decisions about women's bodies, especially if those women are poor or not white. Explore the history of reproductive justice in the United States, including forced and voluntary sterilization, consent to medical testing, access to contraceptives and other health care, and safe and legal abortion. And get to know the Black women activists who have worked so hard to make sure women in this country have the right to reproductive justice.

The Frontlines of Artificial Intelligence Ethics Andrew J. Hampton, Jeanine A. DeFalco, 2022-06-30 This foundational text examines the intersection of AI, psychology, and ethics, laying the groundwork for the importance of ethical considerations in the design and implementation of technologically supported education, decision support, and leadership training. AI already affects our lives profoundly, in ways both mundane and sensational, obvious and opaque. Much academic and industrial effort has considered the implications of this AI revolution from technical and economic perspectives, but the more personal, humanistic impact of these changes has often been relegated to anecdotal evidence in service to a broader frame of reference. Offering a unique perspective on the emerging social relationships between people and AI agents and systems, Hampton and DeFalco present cutting-edge research from leading academics, professionals, and policy standards advocates on the psychological impact of the AI revolution. Structured into three parts, the book explores the history of data science, technology in education, and combatting machine learning bias, as well as future directions for the emerging field, bringing the research into the active consideration of those in positions of authority. Exploring how AI can support expert, creative, and ethical decision making in both people and virtual human agents, this is essential reading for students, researchers, and professionals in AI, psychology, ethics, engineering education, and leadership, particularly military leadership.

Aging Harry R. Moody, Jennifer R. Sasser, 2020-07-16 Winner of the 2022 Textbook & Academic Authors Association's The McGuffey Longevity Award *Aging: Concepts and Controversies* is structured to encourage a style of teaching and learning that goes beyond conveying facts and methods. This innovative text focuses on controversies and questions rather than on assimilating facts or creating a single correct view about aging or older people. Drawing on their extensive expertise, authors Harry R. Moody and Jennifer R. Sasser first provide an overview of aging in three domains: aging over the life

course, health care, and socioeconomic trends. Each section then includes data and conceptual frameworks, helping students to make sense of the controversies and understand their origin, engage in critical thinking, and develop their own views. The Tenth Edition of this hallmark textbook includes amplified discussions focused on differences, diversity, structural inequalities, and inclusion, as well as contemporary issues, including climate change and immigration. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.

The Ethics of Invention Sheila Jasanoff, 2016-08-30 We live in a world increasingly governed by technology—but to what end? Technology rules us as much as laws do. It shapes the legal, social, and ethical environments in which we act. Every time we cross a street, drive a car, or go to the doctor, we submit to the silent power of technology. Yet, much of the time, the influence of technology on our lives goes unchallenged by citizens and our elected representatives. In *The Ethics of Invention*, renowned scholar Sheila Jasanoff dissects the ways in which we delegate power to technological systems and asks how we might regain control. Our embrace of novel technological pathways, Jasanoff shows, leads to a complex interplay among technology, ethics, and human rights. Inventions like pesticides or GMOs can reduce hunger but can also cause unexpected harm to people and the environment. Often, as in the case of CFCs creating a hole in the ozone layer, it takes decades before we even realize that any damage has been done. Advances in biotechnology, from GMOs to gene editing, have given us tools to tinker with life itself, leading some to worry that human dignity and even human nature are under threat. But despite many reasons for caution, we continue to march heedlessly into ethically troubled waters. As Jasanoff ranges across these and other themes, she challenges the common assumption that technology is an apolitical and amoral force. Technology, she masterfully demonstrates, can warp the meaning of democracy and citizenship unless we carefully consider how to direct its power rather than let ourselves be shaped by it. *The Ethics of Invention* makes a bold argument for a future in which societies work together—in open, democratic dialogue—to debate not only the perils but even more the promises of technology.

Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.
