London Is the Best City in America Laura Dave, 2007-01-30 A tender and quirky novel about the romantic choices we make from the author of the New York Times Bestseller and Reese's Book Club Pick, *The Last Thing He Told Me* Emmy Everett is reluctantly heading home to New York for her brother Josh's wedding. She has spent the last three years in a fishing town in Rhode Island and, having little to show for it, she doesn't particularly want to answer the questions she is sure to face about her (ex)-fiance, her (questionable) career choices, her (unknown) future. But she is still shocked when her typically resolute brother Josh confesses he is having doubts about his imminent marriage – and he asks Emmy the hardest question of all: what do I do now? With seventy-two hours until the wedding, Emmy embarks with Josh on a road trip to help him find a mystery woman, and to answer some long overdue questions about who he wants to spend his life with. It isn't only Josh who has some lessons to learn. Along the way, Emmy discovers some undeniable truths about what she wants from her own life; and she begins to realize that perhaps her own happy ending is not as far away as it seems.

The Sustainable City XI C.A. Brebbia, A. Galiano-Garrigos, 2016-09-21 Covering the proceedings of the 11th International Conference on Urban Regeneration and Sustainability held in Alicante, Spain, this volume addresses the multidisciplinary aspects of urban planning; a result of the increasing size of cities, the amount of resources and services required and the complexity of modern society. Most of the earth's population live in cities and the process of urbanisation still continues to generate problems originating from the drift of the population towards them. These problems can be resolved by cities becoming efficient habitats, saving resources in a way that improves the standard of living. The process faces a number of challenges related to reducing pollution and improving main transportation and infrastructure systems. These challenges can contribute to the development of social and economic imbalances and require the development of new solutions. Large cities are probably the most complex mechanisms to manage, nevertheless they represent a productive ground for architects, engineers, city planners, and social and political scientists able to conceive new ideas and time them according to technological advances and human requirements. The Sustainable City XI follows a succession of very successful international conferences and covers the following fields: Urban planning and design; Urban development and management; Urban conservation and regeneration; The community and the city; Eco-town planning; Landscape planning and design; Environmental management; Sustainable energy and the city; Transportation Quality of life; Socio-economic and political considerations; Cultural quarters and interventions; Waterfront development; Case studies - sustainable practices; Architectural issues; Cultural heritage issues; Appropriate technologies for smart cities; Planning for resilience; Disaster and emergency response; Urban safety and security; Waste management; Urban infrastructure and Urban metabolism.

The Evolution of Great World Cities Christopher Kennedy, 2011-01-01 Some cities seem destined to become major financial capitals, yet never do--Seville, for instance, was the centre of Spain's opulent New World Empire, but failed to become a financial metropolis. Others, like former colonial backwater Hong Kong, defy the odds by growing into major trading centres. What are the key factors distinguishing those cities that become wealthy from those that don't? Christopher Kennedy illuminates how geography, technology, and especially the infrastructure of urban economies allow cities to develop and thrive. The Evolution of Great World Cities unfolds through the tales of several urban centres--including Venice, Amsterdam, London, and New York City--at key junctures in their histories. Kennedy weaves together significant insights from urbanists such as Jane Jacobs and economists such as John Maynard Keynes, drawing striking parallels between the

functioning of ecosystems and of wealthy capitals. The Evolution of Great World Cities offers an accessible introduction to urban economies that 'will change the way you think about cities.'

DIY House Shows and Music Venues in the US David Verbuč,2021-09-29 DIY House Shows and Music Venues in the US is an interdisciplinary study of house concerts and other types of DIY (do- it- yourself) music venues and events in the United States, such as warehouses, all- ages clubs, and guerrilla shows, with its primary focus on West Coast American DIY locales. It approaches the subject not only through a cultural analysis of sound and discourse, as it is common in popular music studies, but primarily through an ethnographic examination of place, space, and community. Focusing on DIY houses, music venues, social spaces, and local and translocal cultural geographies, the author examines how American DIY communities constitute themselves in relation to their social and spatial environment. The ethnographic approach shows the inner workings of American DIY culture, and how the particular people within particular places strive to achieve a social ideal of an intimate community. This research contributes to the sparse range of Western popular music studies (especially regarding rock, punk, and experimental music) that approach their subject matter through a participatory ethnographic research.
