The Math Teacher's Toolbox Bobson Wong, Larisa Bukalov, 2020-06-04 Math teachers will find the classroom-tested lessons and strategies in this book to be accessible and easily implemented in the classroom The Teacher's Toolbox series is an innovative, research-based resource providing teachers with instructional strategies for students of all levels and abilities. Each book in the collection focuses on a specific content area. Clear, concise guidance enables teachers to quickly integrate low-prep, high-value lessons and strategies in their middle school and high school classrooms. Every strategy follows a practical, how-to format established by the series editors. The Math Teacher's Toolbox contains hundreds of student-friendly classroom lessons and teaching strategies. Clear and concise chapters, fully aligned to Common Core math standards, cover the underlying research, required technology, practical classroom use, and modification of each high-value lesson and strategy. This book employs a hands-on approach to help educators quickly learn and apply proven methods and techniques in their mathematics courses. Topics range from the planning of units, lessons, tests, and homework to conducting formative assessments, differentiating instruction, motivating students, dealing with "math anxiety," and culturally responsive teaching. Easy-to-read content shows how and why math should be taught as a language and how to make connections across mathematical units. Designed to reduce instructor preparation time and increase student engagement and comprehension, this book: Explains the usefulness, application, and potential drawbacks of each instructional strategy Provides fresh activities for all classrooms Helps math teachers work with ELLs, advanced students, and students with learning differences Offers real-world guidance for working with parents, guardians, and co-teachers The Math Teacher's Toolbox: Hundreds of Practical ideas to Support Your Students is an invaluable source of real-world lessons, strategies, and techniques for general education teachers and math specialists, as well as resource specialists/special education teachers, elementary and secondary educators, and teacher educators.

Ethics and the Good Teacher Andrew Peterson, James Arthur, 2020-04-29 Ethics and the Good Teacher brings together reviews of existing literature and analysis of empirical data from three research projects conducted by the Jubilee Centre for Character and Virtues – The Good Teacher, Schools of Virtue and Teacher Education – to explore the ethical dimensions of the teaching profession. The book is premised on the idea that what constitutes a good teacher involves more than technical skills and subject knowledge. Understood as a professional activity, teaching involves an important ethical dimension, a fact that has come under increased scrutiny – and some would argue increased threat – over recent years as education and schooling have become shaped by market logic and accountability. Addressing the influence of personal and professional character on teachers and teaching, and containing clear implications for policy, practice and research, this book will be of great interest to teachers and other professionals working in education settings, as well as those working in educational policy. It will also appeal to academics, undergraduate students and postgraduate students researching the teaching profession and ethics/morality in education more generally.

Food Leadership Catherine Etmanski,2017-06-09 So much more than a human necessity, food is an entry point into a range of different topics: culture and tradition, health and well-being, small and large-scale business, ecology and politics, science and the arts, poverty and social justice, land use and civil society, global trade, Traditional Ecological Knowledge, and more. From seed to table, the policies and practices related to all aspects of the food cycle create rich sites for learning and multiple opportunities for leadership. Although the topic of food has been gaining momentum in the field of Adult Education over the past decade, food has been relatively underexplored in the field of Leadership Studies. The purpose of this book, therefore, is to deepen our understanding and knowledge about leadership and adult learning in food-related movements worldwide. With contributing authors representing four countries and various Indigenous groups, this book examines the diverse ways in which food activists, scholars, students, and practitioners are already demonstrating, debating, and documenting leadership and learning in the context of global food systems transformation. Furthermore, it documents how these actions are supporting the innovation needed to address the increasingly complex and interconnected socio-economic and environmental challenges associated with food and agriculture. Whereas much leadership theory continues to be developed from cases in business, social movements, or other, more traditional leadership sectors, this book invites leaders and educators to look to their plates and, by extension, to local, small-scale farmers and to nature itself as sources of inspiration in their work.

Equity Audits and School Resource Allocation William A. Owings,Leslie S. Kaplan,2024-08-30 Equity Audits and School Resource Allocation explores how to apply Critical Resource Theory (CReT) to conduct school equity audits, ultimately preparing educational leaders to find equity disparities, engage in more equitable resource allocation in their schools, and improve equal educational opportunity for every student. With case study scenarios woven throughout the book, the authors explore key equity factors, including per-pupil expenditures, poverty, teacher and principal quality, program equity, and achievement equity. They also walk through the process of implementing the 5-step CReT equity audit within a school district or school at any level. Owings and Kaplan also describe the communication and interpersonal factors that equity advocates will need to leverage to gain community support for equity process, considering the data, and rethinking their policies and practices. In today's education context, the problems of equitably funding public schools and allocating learning resources to generate more equal opportunities and higher outcomes for traditionally underserved children are particularly relevant. This important book is designed for course use in leadership preparation programs, for practicing principals and superintendents,

and for educational leadership scholars.

Forward-Facing® for Educators Cheryl Fuller, M.Ed., Rebecca Leimkuehler, M.Ed., J. Eric Gentry, Ph.D., 2022-03-18 The evidence is undeniable: Educators are some of the hardest-working and underappreciated professionals on earth, a truth highlighted by the epidemic proportions of compassion fatigue and burnout occurring across the field. There's no doubt that educators are purpose-driven, passionate helpers of children, families, and their communities, but with a never-ending list of responsibilities and reductions in many school resources year after year, the suffering and stress involved are fast outweighing the resilience reserves of so many. With Forward-Facing® for Educators: A Journey to Professional Resilience and Compassion Restoration, it doesn't have to be that way. Co-written by long-time educators Cheryl Fuller and Rebecca Leimkuehler alongside trauma expert and Forward-Facing® Institute founder Dr. J. Eric Gentry, this book teaches and validates the distinct challenges of being an educator today, while putting the power of personal healing and restoration firmly back in your hands-where it belongs. Envision each school day characterized by physical and mental comfort no matter what happens, as you work and live in accordance with your values and goals, and enjoy social connections and self-care practices that nourish, support, and give you a deep sense of peace and fulfillment. These are the five skills offered by the Forward-Facing® process for professional resilience, and they have the potency to transform every facet of your career in education, personal journey, and mission to help children beginning today.

Multi-Tiered Systems of Support Gary E. Schaffer, 2022-08-11 Multi-Tiered Systems of Support: A Practical Guide to Preventative Practice, by Gary Schaffer, makes it easy to decipher this important framework for delivering evidence-based interventions to improve students' learning, behavior, and social-emotional outcomes. This text focuses on the common elements of the intervention service delivery models comprising Multi-Tiered Systems of Support (MTSS) to offer step-by-step guidance for each stage of the process. Covering MTSS from a whole child perspective, Multi-Tiered Systems of Support empowers current and future educators to set up learners for the greatest success in school and beyond. This book simplifies the MTSS model using an overall analogy of the four basic steps to building a house. We start with the foundation as the history of MTSS, the walls as the four main intervention service delivery models, the framework as common components that link all delivery models, and then the roof that represents MTSS as a whole. Diagrams, checklists and flowcharts accompany each step of the MTSS model to organize and summarize the information on each model. Case studies offer practical, in-depth examples of implementation strategies across models within MTSS. Unique sections on data-based decision making and infusing culturally responsive practices into RTI, SWPBS, Social-Emotional RTI, and Suicide Prevention and Intervention offer readers ways to better adapt and refine their implementation of MTSS. Through this text, readers will have a convenient resource that will save them time locating information on interventions, measures of universal screening, and progress monitoring unique to each intervention service delivery model within MTSS.

Getting Evidence into Education Stephen Gorard, 2020-03-31 Worldwide, there has been considerable progress in the quality of research evidence generated for use in education, but not the equivalent growth in knowledge of how best to get this evidence into actual use. Yet with far-reaching implications, all of education is damaged when persuasive but poor-quality evidence has widespread influence, or good research lies unused. Focused on the work of the Durham University Evidence Centre for Education, *Getting Evidence into Education* addresses this problem, examining what can be done to improve the take-up of suitable research evidence and inform the public service of education. Containing a variety of case studies, from evidence-based policies for early childhood education in Brazil, to the use of evidence on contextualized admissions to Scottish universities, the volume explores a variety of different ways to approach the problem, addressing the questions: What is the existing evidence on different approaches to getting research evidence into use? What are the factors which influence the uptake of high-quality research evidence by policy or practice? Which are the most effective pathways for evidence-into-use in particular contexts? Considering both the practical and ethical implications, the book builds towards key recommendations for the research community, practitioner bodies and policy-makers and advisors, directing them on how to communicate better with each other for the benefit of everyone.

Psychological Impact of Behaviour Restrictions During the Pandemic Barrie Gunter, 2022-07-12 This volume examines the undesirable or harmful cognitive, emotional and behavioural side-effects of COVID-19 and of the behavioural restrictions imposed by governments on their populations during the pandemic. Societal lockdowns and other intervening behavioural restrictions, built significantly around social isolation, used by governments to control the spread of COVID-19 disrupted the lives of most people. There were economic costs for many as workplaces closed down, as well as severe stresses on friendships and romantic relationships, an increase in instances of abuse and domestic violence, and concerns about people drinking too much alcohol or gambling too much as compensatory behaviours. Understanding which people were at risk, and in what ways, could teach important lessons for the future. Presenting a timely review of the most recent international research and evidence, author Barrie Gunter assesses the major collateral, psychological side-effects of the pandemic. Looking forward, Gunter also considers how new models might be developed that take into account not just the need to halt the spread of a new virus, but also minimise collateral damage which could be every bit as severe in both the short term and long term. Identifying and analysing the nature and severity of collateral side-effects of pandemic-related behaviour restrictions, this is essential reading for students and researchers in psychology, public health and medical sciences and policymakers assessing government strategies, responses and performance.

Teaching in the Pandemic Era in Saudi Arabia, 2022-06-20 In March 2020, as the world was still baffled with the unknowns of the COVID-19 pandemic, Alghamdi began documenting how teaching and learning in higher education changed its face as a result of the global health outbreak. The outbreak of the novel coronavirus (SARS-CoV-2) was first reported from

Wuhan, China, and soon swept the world over. Teachers across the globe, including Saudi Arabia, began undertaking a plethora of on-the-ground work to combat and alleviate the impact of the pandemic. Teaching in the Pandemic Era in Saudi Arabia presents to educators, parents, and other interested readers a variety of perspectives, challenges, and highlights of the teaching methods that could be useful in the era of COVID-19. Its purposes are to not only document an important time of human history, education, and the outbreak of unknown pandemics but also outline strategies to serve as insights into and predictions of the unknown future of humanity, diseases, and human learning.

Forensic Mental Health Michele P. Bratina, 2022-09-08 In this book author Michele P. Bratina demonstrates how the Sequential Intercept Model (SIM) supports integration of the U.S. healthcare and justice systems to offer more positive outcomes for offenders with mental illness. The book describes a criminal justice-mental health nexus that touches every population—juvenile and adult male and female offenders, probationers and parolees, the aging adult prison population, and victims of crime. In the United States today, the criminal justice system functions as a mental health provider, but at great cost to society. The author summarizes the historical roots of this crisis and provides an overview of mental illness and symptoms, using graphics, case studies, and spotlight features to illustrate the most pressing issues encountered by justice and behavioral health professionals and the populations they serve. *Forensic Mental Health* takes a multidisciplinary approach, addressing social work, psychology, counseling, and special education, and covers developments such as case law related to the right to treatment and trauma-informed care. Designed for advanced undergraduates, this text also serves as a training resource for practitioners working with the many affected justice-involved individuals with mental illness and co-occurring substance use disorders, including juveniles and veterans.

Technology-Enhanced Language Teaching and Learning Karim Sadeghi, Michael Thomas, Farah Ghaderi, 2023-02-23 The Covid-19 pandemic has directly impacted the way teachers and learners worldwide teach and learn languages, forcing numerous educational activities in technologically-deprived contexts to stop altogether and those in technologically-rich environments to go online on an emergency basis. This volume provides a collection of theoretical and practical insights into the challenges and affordances faced globally during the pandemic and lessons learnt about the application of digital technologies for language teaching and learning. The chapters explore the vital role of technology in its various forms, including the internet, social media, CALL (Computer-Assisted Language Learning), MALL (Mobile Assisted Language Learning), TALL (Technology Assisted Language Learning) and TELL (Technology Enhanced Language Learning). Topics explored include the new avenues digital technology has opened up for language teachers and learners, options and

challenges in applying technology in various contexts, and how the second language education industry could have been adversely impacted at the time of the pandemic without technological affordances. The contributions showcase studies from various geographical contexts, revealing how the global crisis was received and tackled differently in Australia, Hong Kong, Iran, Italy, Japan, New Zealand, the UAE, the UK and the USA.

Introduction to Childhood Studies Mary Jane Kehily, 2015-09-16 This popular and bestselling textbook provides an introduction to the field of childhood studies and offers a broad-based, comprehensive and accessible resource which brings together key themes in the area of childhood studies to provide a timely and scholarly introduction. This new collection includes all the key themes of debate and interest and each chapter is written by an expert in a specific area of childhood studies and many chapters are authored by leading figures in their field. The new third edition builds on the success of earlier editions, maintaining chapters of enduring value while incorporating some fresh new chapters on integrated working with children; childhood sexualisation; and child soldiers. Hence the book remains intellectually robust, scholarly and confident in its academic approach, a feature that distinguishes the title from many of its competitors. The new edition also introduces additional pedagogy with interactive activities, annotated suggestions for further reading, and end-of-chapter bullet point summaries. An Introduction to Childhood Studies 3E is invaluable reading for students, lecturers and practitioners from a range of professional and academic interests and particularly for those studying courses in Childhood Studies and Early Childhood Studies. Promoting Student Attention Robin Wisniewski, 2024-10-02 A research-based guide to help teachers support students with attention challenges. Why can't my students pay attention? It's a deceptively simple question that's increasingly on teachers' minds. It's not about fixing students facing distractions—digital or otherwise. Rather, it's about looking at inattention in new ways and adopting proven, attention-promoting strategies that are learner-centered, respectful, and effective. In Promoting Student Attention, psychologist and educator Robin Wisniewski • Discusses what attention is and

offers a framework for thinking about student attention. • Explains how to assess inattention in the classroom and find root causes. • Introduces five principles for promoting attention, along with strategies to use right away. • Addresses ADHD—what it is and isn't—and presents targeted approaches to help students with specific inattention or impulsivity issues. • Shares the experiences of real teachers who have created conditions for attention in their classrooms. Students can't learn if they can't focus. Use this book to better support students who struggle with attention issues and to create an improved learning environment for all the students you teach.

Advancing Surgical Education Debra Nestel, Kirsten Dalrymple, John T. Paige, Rajesh Aggarwal, 2019-11-05 This book is designed for anyone involved in surgical education. While it is intended as a core reference for surgeons who want to develop their surgical education knowledge and practice, it also a valuable resource for anyone undertaking a higher degree in health professions education. Divided into five parts, it starts with chapters on foundational knowledge, exploring the past before documenting the current state of surgical education and highlighting various educational leadership and governance topics. The second part examines a range of theories that inform surgical education – cognitive, behavioural and social, while the third part offers practical guidance on elements of surgical education – curriculum design, selection, feedback, assessment, evaluation, simulation and managing trainee underperformance. It also includes chapters on supporting the development of psychomotor skills, operative skills in theatre, professionalism, teamwork and patient safety. The next part shifts the focus to research in surgical education, introducing readers to all phases of conducting education research based on qualitative, quantitative and mixed methods paradigms. The final part looks to the future of surgical education and of surgical educators. Assembling these topics in one volume makes this book invaluable to anyone involved in surgical education.
