Clinical Psychology David C.S. Richard,Steven K. Huprich,2011-09-02 Clinical Psychology is a graduate-level introduction to the field of clinical psychology. Supporting Self-Regulated Learning and Student Success in Online Courses Glick, Danny,Bergin, Jeff,Chang, Chi,2023-03-07 Students who self-regulate are more likely to improve their academic performance, find value in their learning process, and continue to be effective lifelong learners. However, online students often struggle to self-regulate, which may contribute to lower academic performance. Likewise, less experienced online teachers who are in the process of implementing—or have implemented—a shift from in-person to distance learning may struggle to enable their students to employ effective self-regulation techniques. *Supporting Self-Regulated Learning and Student Success in Online Courses* examines current theoretical frameworks, research projects, and empirical studies related to the design, implementation, and

evaluation of self-regulated learning models and interventions in online courses and discusses their implications. Covering key topics such as online course design, student retention, and learning support, this reference work is ideal for administrators, policymakers, researchers, academicians, practitioners, scholars, instructors, and students.

Ethical Reasoning for Mental Health Professionals Gary G. Ford, 2006-01-13 I would really recommend this as an excellent class text and desk reference. I would describe this as a very comprehensive, up to date text on ethics that includes most mental health professionals. This was very thorough and well written....the inclusion of case examples throughout the chapters really brought home the points that the author was trying to make. The author was very skilled at going into depth while covering the ethical dimensions and did not merely provide superficial discussion. -- Kathleen M. Salyers, The University of Toledo -- Kathleen M. Salyers, Ethical Reasoning for Mental Health Professionals addresses a fundamental need of ethics training in psychology and counseling: the development of reasoning skills to resolve the complex professional ethical issues that arise. Author Gary G. Ford provides readers with a background in ethical reasoning and introduces them to an easy-to-follow eight step model of ethical decision making. Key Features: Covers philosophical models of ethical reasoning: Readers are provided with the needed background for understanding sources of ethical duties and the metaethical justification underlying the ethical code of their profession. Addresses APA and ACA ethics codes: A greater understanding between the professions of psychology and counseling is illustrated by covering current versions of ethical codes for both fields (APA, 2002 & ACA, 2005). Recommendations are given for those who wish to pursue certification, degree, or licensure in the other field. Exemplifies ethical dilemmas and ethical responses: Treats the issue of ethical dilemmas, in which two or more ethical duties actually conflict. Other texts present issues one at a time, supplemented by case examples involving 'right' and 'wrong' answers, leaving professionals ill-equipped to apply ethical principles to novel circumstances, particularly

where multiple ethical duties conflict. Reflects the complexity of real-life situations: Numerous thought-provoking case examples help students apply ethical principles to novel professional circumstances. In-depth coverage of ethical concerns in assessment, therapy, industrial/organizational, teaching, research, and forensic activities is provided, as well as in emerging areas such as e-therapy and Internet research. Addresses multicultural concerns: The ubiquitous nature of cultural influences in our lives and professional activities is demonstrated. Readers are guided to identify cultural biases in their own life and the ethical principles and practices of the mental health professions. Intended Audience: This text is perfect for students studying ethical issues in psychology and counseling, as well as a great resource for clinical/counseling psychologists, psychotherapists, and practitioners. This text is perfect for students studying ethical issues in psychology and counseling, as well as a great resource for clinical/counseling psychologists, psychotherapists, and practitioners.

The Crisi Wartegg System (CWS) Alessandro Crisi, Jacob A. Palm, 2018-02-15 The Wartegg Drawing Completion Test (WDCT) is a semi-structured, graphic, performance-based personality test, created by Ehrig Wartegg (1939). With a foundation in Gestalt and Psychodynamic theory, the WDCT has been used widely throughout Europe, South America, and Japan, but only recently has become available in the United States. Initial scoring systems for the WDCT were considered cumbersome and lacked research-driven validation. In response to these factors, Alessandro Crisi, following years of clinical

practice and research, developed the Crisi Wartegg System (CWS; 1998, 2007), a normed and standardized administration, scoring, and interpretation system for the WDCT. Over the past three decades, Dr. Crisi has refined and expanded the CWS through research, broadening the scope of the measure, and increasing the accessibility of the system to clinicians. This manual provides a comprehensive guide to the CWS, made available to English-speaking clinicians for the first time.
