Dr. Iftekhhar Ahmed Shams

The Approach of Armageddon? Muhammad Hisham Kabbani, 2003 A scholar from the Middle East offers a chronicle of scientific breakthroughs and world events that will occur during the last days, as foretold by Prophet Muhammad. Time-honored beliefs held by one-fifth of the world's population, but little known in the West, are expertly presented in this compelling book.

A CONCISE GUIDE TO THE QURAN: Answering Thirty Critical Questions Dr. A. M. Awal PhD, 2023-08-18 Investigating the authenticity of the Koran from a mathematical standpoint and a numerical point of view, to scientifically and historically verify whether Mohammed wrote the Koran.

The Truth and the Light: Jesus was a Servant and Prophet of God Adebola Sanusi, 2022-12-21 The Truth and the Light: Jesus was a Servant and Prophet of God By: Adebola Sanusi About the Book The Truth and the Light: Jesus was a Servant and Prophet of God expresses the oneness of God and one religion. It brings out the truth, shedding more light from the hidden and correcting the misconception about who God really is. This book sets the record straight from the confusion people have about God and His religion, which He ordained for mankind and jinn.

The Palpable Universe Mohammed Muflahi, 2014-03-28 In a feeble attempt to deceive mankind, Stephen W. Hawking and Richard Dawkins, among others of their ilk, have painstakingly persevered in creating a Godless society, in the hope intelligent people will accept the theory of evolution as the source that caused the universe to exist. Bringing forward arguments, they create a multitude of problems they cannot answer, resulting in guesses and lies. Not knowing where we came from and why we are here, scientists will never cease their search for the Truth. I have written this book in refutation

of their claims and expounded on the subject for clarification.

The Key to Understanding Islam Abdurrahman Al-Sheha, 2018-07-02 This book explains that Islam is a code of living that covers all aspects of life. It comprises a set of acts of worship: some verbal, some practical and others that are constituents of belief. All of them play important roles in placing morality on a solid foundation and in strengthening the good qualities in people so that they are keen to follow the right path, ensuring social unity and strengthening bonds within the community.

Life in Hell Dr. Iftekhhar Ahmed Shams, 2023-03-22 The Life in Hell. Life is a journey from Allah (SWT) to Allah (SWT); the best return is when he is pleased with us. And the journey afterlife is beautiful if you are a good Muslim, but it's scary and painful for the one who is the rejecter of the words of Allah and the teaching of our beloved prophet (saw). In this book, the reader will go through the journey of a bad soul from the beginning to his last place; in between the scary, horribly and painful things he experiences from the first day in the grave to the Day of Judgment, the questioning, the scale, the bridge and more. You will read how he ends up in hellfire and his punishments from the Quran and the authentic sunnah of our Prophet (saw).

Knowledge that brings Happiness and Bliss Aybek Izzatov , 2023-06-22 You shall embark upon a profound journey of discovering the very essence of existence, a voyage that shall awaken within you the depths of motivation, happiness, and pure bliss. Through this wondrous odyssey, you will unravel the secrets of the universe, uncovering the hidden truths that shall illuminate your path with a radiant glow. With each step forward, your heart shall dance with joy, your spirit shall soar on the wings of inspiration, and your soul shall be embraced by the sweet embrace of fulfillment. May this voyage of enlightenment forever grace your life with the purest forms of love and enchantment, as you uncover the true nature of existence and embrace the abundant treasures it holds. This book presents a unique fusion of mystical, scientific, and philosophical concepts, blending them into a cohesive whole. For those in search of knowledge and absolute truth, this book offers a captivating journey of learning and self-discovery. Through contemplation of the ideas and events depicted within its pages, readers will gain a new understanding of the world, igniting their minds with the flame of reasoning. This profound realization transcends the boundaries of human consciousness, transforming life into an enchanting voyage through a wonderland and a captivating journey through a magical fairytale. The backdrop for the events in this book is the remote and beautiful landscapes of Central Asia, where ancient civilizations have thrived for millennia. Amidst these lands, traditions dating back thousands of years continue to thrive, untouched by the political and economic turmoil of the Western world. The people of these regions embody remarkable hospitality, readily inviting strangers into their homes and treating them with utmost respect and honor. An ancient proverb speaks of guests being held in higher regard than the head of the family, conveying the belief that one's guest could be none other than a divine presence. Another catalyst for the creation of this book stems from the contemporary issues surrounding religion and the interpretation of sacred texts. Many individuals,

lacking a comprehensive understanding themselves, attempt to influence others by referencing these holy writings, inadvertently leading astray those who seek truth with genuine hearts. It is a plea from the author to readers to approach this invaluable treatise with attentiveness and discernment. Within its pages, the nature of creation and the purpose of existence unfold, offering profound insights into the origins and ultimate destiny of all things. The events recounted in this book are not works of fiction; they happened to real individuals who come to life through its characters. Scientists and philosophers alike will discover a wealth of precious knowledge within these pages, while those with astute minds may find themselves making discoveries and drawing conclusions even in the present day. As a medical doctor, the author occasionally delves into medical topics, although they are not the primary focus. In an effort to present the information in a clear and concise manner, the descriptive portions of the narrative have been streamlined to allow for a more comprehensive exploration of the book's genius sections. This decision was made with the reader's best interests in mind. While the book contains numerous events, each one serves the purpose of leading readers towards the central idea of truth. Skipping the initial sections would result in missing this pivotal concept. For those who find it challenging to grasp the essence of truth, a suggestion is made to reread the book from the beginning. By understanding the meaning within these pages, readers will gain not only a profound comprehension of life's purpose at its culmination but also a transformative perspective on their present existence.

Miracles of Quran : Scientific facts that already revealed by Quran 1400 years ago Adam Jordan,2025-06-25
Modern science figured out that The universe is expanding. It is already mentioned by Quran 1400 years ago. Modern science figured out that the ratio of sea is 71 % and land is 29%. Quran mentioned the word Sea (32 : (ﻟﻮﺍﺝ times Land (: (ﺑﻨﺎﺩﻯ 13 times → Total = 45 Ratio: Sea = $32/45 \approx 71.1\%$ Land = $13/45 \approx 28.9\%$ This matches modern estimates of Earth's surface: ~71% water and ~29% land. Read this amazing book. Open your heart. Open your mind.

The Last Call Mohamad Idrakisyah,2020-06-24 The current state of Islamophobia has distanced many from learning about Islam and ironically, in some cases, even the Muslims began to doubt the teachings of Islam. There is a clear lack of understanding among the non- Muslims and the deviant acts of some Muslims in the name of Islam jeopardises this even further. Discussions are made on these selected verses to prove how the Quran addresses the current political, economic and social problems that beleaguers the world today. These are words of God which has provided perfect solutions to the woes of mankind of the past and would continue to do so in the present and future.

Discovery of historical evidence of the Holy Quran Abdul Waheed, Today the whole world knows that the source of knowing history is also the holy religious texts from which we get to know the history of that time. Among them, the Holy Quran is also a religious text from which we get to know the history of that time and also the ancient history. There are many things in the Quran which were not discovered earlier but now they have been discovered, the details of the same are given in this book. There are still many things left in this book, if you know about them, then let me know, I will try to include your articles. Thank you

THE CREATION, LIFE, PROPHETS SANA OUBARI,2012-01-01

Tribal Modern Miriam Cooke,2014-01-21 *Tribal Modern* analyzes what is most distinctive about Arab Gulf culture over the past 15 years and how this culture shapes distinctive national identities. It highlights the tribal as the decisive element in modern Arab Gulf culture and identity. The question incredulous outsiders ask is: how could fishermen, pearl divers and pastoral nomads catch up with the rest of the modernized world? Observers remain skeptical about the apparent clash between the modern and the backward tribal. But in these newly rich desert societies different meanings attach to the tribal generally coded non-modern. Tribes here are not primitive; they are the instruments and symbols of identity for hypermodern Gulf societies. Nationals make claims based on a newly imagined tribal identity that entitles them alone to the rights and privileges of modern citizenship. *Tribal Modern* explores the interweaving of the tribal and the modern into a national brand. Structural, performative and cognitive, the brand is being built into heritage and fantasy architecture; it is performed in neo-tribal sports, dress codes and language, especially neo-Bedouin poetry contests. The tribal signals a new aristocratic identity in the anonymity of 21st century globalization. The tribal in the Arab Gulf states is a fundamental and constitutive part of the modern. The tribal modern shapes a national brand to project political power abroad and prestige at home. Most studies of these new, mega-rich countries come from the social sciences. *Tribal Modern* looks at cultural indices of local self-assertion. It provides a cultural analysis of Gulf Arab social formation that examines the intersection of race, class and gender--Provided

Great Proof Rustam Khakimov, 2018-01-24 This book provides 100 percent evidence on God's existence and erases all doubts that people have. This is not a philosophical book that many current authors struggle to provide about the existence of God, rather it is a book that no intellectual human can deny, and it provides undeniable evidences with clear proofs.

The Rays Of Islam Omar Awel, 2025-03-20 This Islamic eBook is a work of devotion and a pursuit of truth, illuminating the beauty, perfection, and peace of Islam as a way of life while correcting widespread misconceptions, both within the Muslim community and beyond. Inspired by the observation that many false notions about Islam circulate, I, the compiler, have carefully selected content and chapters, researched and verified them with the aid of modern AI tools, and incorporated my own knowledge. My aim is to provide readers—whether Muslims or non-Muslims—with clear access to the pure sources of Islam, the Quran and the Sunnah of the Prophet Muhammad, demonstrating that Islam is a complete, peaceful, and beautiful religion, as Allah states: Today I have perfected your religion for you (Surah 5:3). The book covers a wide range of topics that reflect the versatility and depth of Islam. It begins with eschatological matters, such as supplications for Paradise and protection from Hell, based on authentic Hadiths, like *Allahumma inni as'aluka al-jannah wa a'udhu bika min an-nar* (Sunan at-Tirmidhi, Hadith 2572). These Duas highlight the hope and fear that drive believers and offer practical guidance for daily life. Furthermore, the book delves into the impressive history of Muslim inventions in technology and mechanics, such as Al-Jazari's crankshaft or the Banu Musa brothers' automatic control systems, which laid the foundation for modern technologies. These sections illustrate how Islam promoted science and progress, inspired by the Quran (Surah 16:8). A central part addresses ethical and social principles, such as dealing with neighbors, supported by Hadiths like *Whoever believes in Allah and the Last Day should not harm his neighbor* (Sahih Muslim, Hadith 48). These teachings emphasize the importance of community and respect, regardless of religion or origin. Likewise, contemporary issues like gender debates are examined from a Sunni perspective. Islam recognizes only two genders (Surah 53:45-46), allowing room for medical exceptions, while rejecting non-binary identities as contrary to Fitra (natural disposition). The role of Qiwwa is explained as a just complement, not dominance (Surah 4:34), showcasing the balance between rights and responsibilities. The book also highlights practical aspects, such as the respect for Allah's name, which should not be uttered in impure places like bathrooms (Sahih Muslim, Hadith 373), providing readers with clear instructions to preserve the sanctity of sacred texts. It is an invitation not to judge Islam by the mistakes of Muslims—Every son of Adam makes mistakes (Sahih al-Bukhari, Hadith 6781)—but by its perfection, rooted in its sources. I am convinced that, with Allah's help, we can correct misunderstandings and effect change in society, whether through knowledge, dialogue, or inviting others to Islam. The chapters are designed to appeal to both Muslims seeking to deepen their knowledge and non-Muslims wishing to understand or explore Islam. Readers are encouraged to engage with the book in a clean place and share it with colleagues, friends, and family to spread

knowledge and accumulate good deeds. The book offers insight into the rich traditions of Islam and demonstrates their relevance to people of other faiths by emphasizing universal values like peace, respect, and knowledge. It is a work that inspires reflection and builds bridges between cultures and religions.

Bible Compared to Quran others,

The religion that captivated minds with its logic Hatem Yahia, 2016-11-01 This book is based upon selected (translated) verses from the holy book: the Quran; verses that contain logical information or reasoning with the human mind. These verses indicate that Islam is a religion that respects, moreover rewards, thinking and contemplation. The verses present irrefutable logic that leave a person astonished as he gradually comprehends the weight of what he is presented with, leaving him thinking deeply. If a person truly grasps the logic, and is objective in his deductions without being hindered by pride, he will end up with one option: submission to the one God. But to those who doubt that the verses are from God, it is up to them to decide whether these verses are within a human's capability and knowledge to compose or if they surpass human limits. For I believe, that within everyone is a God-given innate instinct that can recognize what is unique and sent from Him. The book will be divided into sections, each section responding to a false claim via simple logic provided in the Quran. This will begin by responding to the basic claim that there is no God, and progressing systematically through the sections to reach the final logical conclusion; the truth. The purpose of the book is to encourage people to choose their religion by applying logic. It is intended for the general populace. If the book manages to activate a person's mind, setting him on the path of deep thought and self-dependence, then the book has accomplished a large part of its purpose.

An Illusion of Harmony Taner Edis, 2010-03-05 Current discussions in the West on the relation of science and religion focus mainly on science's uneasy relationship with the traditional Judeo-Christian view of life. But a parallel controversy exists in the Muslim world regarding ways to integrate science with Islam. As physicist Taner Edis shows in this fascinating glimpse into contemporary Muslim culture, a good deal of popular writing in Muslim societies attempts to address such perplexing questions as: - Is Islam a scientific religion? - Were the discoveries of modern science foreshadowed in the Quran? - Are intelligent design conjectures more appealing to the Muslim perspective than Darwinian explanations? Edis examines the range of Muslim thinking about science and Islam, from blatantly pseudoscientific fantasies to comparatively sophisticated efforts to Islamize science. From the world's strongest creationist movements to bizarre science-in-the-Quran apologetics, popular Muslim approaches promote a view of natural science as a mere fact-collecting activity that coexists in near-perfect harmony with literal-minded faith. Since Muslims are keenly aware that science and technology have been the keys to Western success, they are eager to harness technology to achieve a Muslim version of modernity. Yet at the same time, they are reluctant to allow science to become independent of religion and are suspicious of Western secularization. Edis examines all of these conflicting trends, revealing the difficulties facing Muslim societies trying to adapt to the modern

technological world. His discussions of both the parallels and the differences between Western and Muslim attempts to harmonize science and religion make for a unique and intriguing contribution to this continuing debate.
